Manage KG Readiness Records | KG Readiness Field Descriptions

Tool Search: KG Readiness

The KG Readiness tool allows districts to assess a student's progress towards a successful educational career prior to the start of their kindergarten year.

KG Readiness records CANNOT overlap. This means a student can only have one active record at any given time. A new record can only be added if the previous record has an End Date.

KG Readiness Editor

Use the Federal/State Program Updater tool to import KG Readiness information to this tool.

Manage KG Readiness Records

To add a new record, click the **New** button and enter a **Start Date** on the KG Readiness Detail. Select Yes, No or Unknown from each of the lists fields, as appropriate for the selected student. Click the **Save** button when finished.

To end a record, select the applicable saved KG Readiness record and enter an End Date.

To completely remove the record, select the applicable saved KG Readiness record and click the **Delete** button. This should only be done if the record was added in error.

KG Readiness Field Descriptions

Start Date

Lists the Start Date of the student's KG Readiness record.
