Activity Registration Maintenance (SIS-150293)

The following improvements were made to Activity Registration.

- When copying an activity, users can now select future dated forms as long as the copied activity has dates within the same range as the form.
- When moving between the Activity Monitor and the Activity Dashboard in the new look and feel of Campus, the filters were not being cleared. This issue was corrected.
- When creating a new activity, the second screen of the Activity Builder was not displaying the Ad Hoc filters in alphabetical order. This issue was corrected.
- In some instances, inactive activities were displaying as active. This issue was corrected. As part of this change, inactive Categories in the Activity Builder now display with red text that says ""Inactive."" Also, when users try to save an activity when all categories are inactive, the following error message will display: ""Product failed to save. No active categories found.""

Blended Learning

Blended Learning Groups - Adjust Blended Learning Group Updates (SIS-149681) **[Enhancement]**

The following modifications have been made to the Adjust Blended Learning Groups tool:

- Validation text and associated error messages now match the validation text and associated error messages on the Adjust Student Group Assignment tool when entering Start and End

Dates.
- All groups can now be selected when the list of available groups is long. Previously, groups listed in the second half of the list could not be selected.
- Informational text has been modified to explain the logic used when adjusting group start and end dates.
- Remote Day Records are not created for days that are after the group end date.
- Future groups can now be selected for adjustment.

Campus Student/Parent

New - Enhanced Portal Preferences (SIS-131349) **[Enhancement]**

The Portal Preferences have been updated to allow schools to set display options by calendar and schedule structure to determine what data is available in the Campus Student and Campus Parent Portals.

Display options are managed in templates, which users then assign to the appropriate calendars. For example, a school may have templates for their main, ALC, and summer calendars. These templates can be reused year after year by assigning them to new calendars as they are created. From the Display Options tab, click New Template to create one. New templates can also be created by opening an existing template, clicking the arrow button next to Save and choosing Save & Copy. You can then start a new template based on the options selected for another.

In the main view of the Display Options tab, access Template options by clicking the name of the template in the first column. Access Calendar (Structure) options by clicking the name of the calendar (structure) in the second column. The current Status, indicating if the access to the portals is enabled or disabled, displays, as well as Enabled Terms.

Template Options

To view template information, click on the name of the template. Each template needs a name and may have a description. Within a template, all of the Display Options controlling which tools and data display for parents and students display. In fact, with this release, users also have the option of setting display options differently for Campus Parent and Campus Student. For example, an elementary school may want to give parents access to more data and tools than students.

Calendar and Term Settings

Click on a calendar to view additional information and options for enabling data. Calendar options are also available by clicking the Manage Calendars button when viewing a template. From here, indicate whether the portals should be enabled for this calendar. A new option allows users to keep access to the calendar's data enabled once the active school year has been changed at the end of

the year. This option may be helpful to keep data such as grades available to parents and students once the calendar has ended. Data can also be enabled by specific Terms, with options to automatically enable terms based on Term Dates.

Existing Data

With this release, currently established display options have been converted into a template that is assigned to all calendars, to simplify the transition. If desired, users can modify the automatically-created template or create new ones to assign to their calendars.

Additional Changes

- Users can now view historical report cards and schedules in the future school year on the portals.
- Added a display option to hide period times from displaying on student schedules.
- The existing option on the Student Grades tab to 'View as Portal User' has been replaced by options to 'View as Campus Student' and 'View as Campus Parent.'
- Students can now view an assignment in the term it is assigned, even if it isn't due until the next term and the next term is not enabled.

With this enhancement, the following additional issues were addressed:

- Students could view future schedules when they had not been enabled by manipulating the URL.
- Students could see websites for schools in which they were not enrolled if their guardian was enrolled in the school.
- Students would receive notifications for attendance even if that tool was disabled, if the student had multiple enrollments. Additionally, Kentucky users received a notification for Unknown attendance events when the related attendance preference was disabled.

Census – Enrollment (Grade) Field In Household Not Populating (SIS-69732)

When viewing a summary of the student's household, the Enrollment (Grade) column was not displaying information for household members who have a school enrollment. This has been fixed.

Article(s):Student Summary

Path: Census > People > Households; Student Information > General > Summary

Census – Secondary Household Displayed as Primary Household for Students (SIS-78904)

If a student's membership to their primary household was end dated and the student was later added back to the household with a secondary household membership, the Relationships tab still displayed the household as primary for the student. This has been fixed.

Article(s): Relationships

Path: Census > People > Demographics

Census – ID History (tab) Comment Column Displaying Wrong Value (SIS-87217)

The ID History tab (Census) is used to track changes made to person ID fields (Student ID, Staff ID, etc.) in Campus. When a change is made to an ID field, the Comments column of ID History displays the location of where the change was made. Previously, the value displaying here was incorrect. This has been fixed.

OneRoster

OneRoster - Class and Student Cache Updates (SIS-149930) **[Enhancement]**

The Class cache has been updated to refresh hourly on the same timeline as the Student cache.

Both the Student and Class caches have been updated to refresh when any of the following changes are made, if there is not a refresh in the queue when changes are made:

- Switching the Active year.
- Modifying External LMS Exclude for a calendar, course, section, enrollment, or grade level.
- Creating, deleting, or updating any of the listed fields following records:
  - Enrollments (Grade Level, No Show)
  - Courses (Active, Homeroom, Name, Number, Subject, Core Subject, SCED Subject Area, SCED Course ID)
  - Section (Number, Room, Teacher Display Name)
  - User Account (Disabled, Homepage, Username, Expiration Date)

Additionally, the Class cache has been updated to check the generated class name (course name, number, section number), trialID, calendarID, calendar start/end dates, and room location when making updates. Varchar fields are now truncated to meet OneRoster definitions. Additionally,

both the Student and Class caches have been updated to support refreshing for a list of Section IDs.

90/10 Deposit Request Rule Removed (SIS-148823) **[Enhancement]**

The deposit process was updated to deposit 100% of the district's available balance. All eligible transactions are now deposited whether an account balance is positive or negative. Previously, the deposit process only used 90% of the available balance in the deposit request.

Note: If a district has multiple accounts with some negative balances, none of the deposits can exceed the available balance (even if the sum of the deposits nets out to the available balance).

After the negative deposits complete, the remainder is available to be deposited.

New York Programs Fact End Date Logic Update (SIS-148634)

Previously, there was an issue with the Programs Fact extract incorrectly reporting End Dates. The logic for reporting has been updated to correct this issue:

The program is reported if the Eligibility is either Free or Reduced, the Certified Type is NOT Declined, Denied, or Did Not Apply, AND the date range is either the most recent record from the current year or the most recent eligibility record in the previous two years.

The Beginning Date reports as either the Start Date of the Eligibility record, if in the current year, OR the student's earliest Enrollment Start Date for the year if the Eligibility record starts before the date.

The Ending Date reports as the End Date of the Eligibility record, if in the current year. Otherwise, "Null" reports.
