Last Modified on 02/27/2025 1:02 pm CST

#### Tool Search: Special Ed Documents

Evaluations are used to document the student's educational needs and the student's determination of eligibility for special education. This document describes each editor, the section(s) of the print format that include the entered information, a description of each field on the editor, and any special considerations and instructions for using the editor and fields.

An evaluation must be created whether or not the student is determined to have a disability. A copy of the evaluation summary report, including the documentation of eligibility, is given to the student's parents by the school district. For information on general functionality, navigation, and additional plan and evaluation features, see the core Plan and Evaluation Information article.

The current format of this document is the **HI Eval 2022**. Evaluation formats are selected in the Eval Types tool.

## **Evaluation Status**

The Evaluation Status editor includes general information about the evaluation, including relevant dates, the type of evaluation, and basic student information.

This editor must be saved before continuing to other parts of the evaluation.

This is the final step when documenting if a student meets the eligibility criteria under Chapter 60. The team completes this form AFTER discussing the student's educational history and summary of current performance. Team members compare the data about the child to see if there is a match to one of the eligibility categories defined in chapter 60. Deaf means that the student has a hearing loss that impairs the auditory processing of linguistic information through hearing with or without amplification OR the hearing loss adversely affects educational performance. Criteria for the eligibility category of Deaf is documented below: SECTION I. EVIDENCE OF DEAFNESS (both must be checked "yes") The student has a significant hearing loss, averaging greater than 70dB (decibels) in the speech frequencies (500 Hz to 4,000 Hz). * Yes  Yes  Levience the student by an audiologist to determine hearing loss. * Explain or reference data or evidence:
