OLR-5.1.26 (07/31/2018)

- Minor performance fixes were applied.
- Corrected a very rare bug when saving English translations in OLR Literal.

OLR-5.1.25 (07/24/2018)

- Corrected the bad path in package.xml that was preventing script from pulling into the package.
- Verified the script runs when people have OLR preference.
- Verified columns exist in Legacy Contact table.
- Triggered a change event for the New Home Address checkbox when initially loading its value so it triggers the toggling properly on page load.
- Corrected the ISO List Reference for the Information Center dropdown contents check to use the Campus Attribute Object rather than name, since the name is not always consistent.
- Modified the display of the Parent > Demographics page to automatically hide the Emancipated Disabled text.

OLR-5.1.24 (07/18/2018)

This OLR release is compatible with Campus.1829 Release Pack and higher.

The jump in version numbers is a result of an update to the process. The previous release to OLR is version 5.1.6, made available May 2018.

- Corrected misspellings of the word *submitted*.
- Displayed Contact Preference headers on the parent section if only text is enabled.
- Removed a requirement that race lists are set correctly to save hard coded race fields.
- Corrected an issue with posting documents when the user has white space characters in their name.
- Corrected the error sending notifications when all users eligible to receive them have disabled user accounts.
- Made overall performance enhancements.
- Updated the posting of Ohio-specific field Birth Place and converted to Birth City.
- Updated the date pickers to allow dates past 2018 to be selected.
- Corrected the error with Mass Repost where multiple records may be created.
- Updated Staff Processing to always consider the Include Unsubmitted Applications, no matter what application status is selected.

- Enabled Auto Deploy.

OLR-5.1.6 (05/31/2018)

- Added additional translation literals for validation text.
- Stopped the save process if there is an error during the document upload process in order to prevent false validation positives.
- Adjusted order of the Batch posting medication check so the override setting is checked first in order to speed up execution when the override is enabled.
- Corrected Student Processing Review list to correctly determine if a student is in the boundary of the selected school and to account for schools with multiple calendars.
- Corrected the loading of the HasNoMailing check box when there is an end dated Existing mailing address.
- Added a "Decline to State" race option for California districts to match a new state race option in Campus.
- Corrected notification query performance.
- Modified the Students with Submitted Applications Report to count applications that are submitted by staff
- Split related pair updates into two queries for performance.
