Rx Pack - Campus.2203

Last Modified on 12/22/2025 1:35 pm CST

The following corrections are included in Rx Packs for January and February 2022. Rx Packs contain a small number of critical cases to fix urgent issues, with delivery in an immediate time frame (e.g., the fix cannot wait for the next four week Release Pack).

It is recommended that customers apply all subsequent Release Packs immediately following Rx Packs. Doing so will benefit both customers and Infinite Campus when it comes to supporting the patch.

Rx Packs are cumulative; each Rx pack will automatically include all previous Rx packs within that release. These cases will also be included in the Campus.2207 pack unless otherwise noted.

Below is a list of all Rx Packs for Campus.2203 and the date of availability:

- Rx Pack Campus.2203.7 - February 9, 2022
- Rx Pack Campus.2203.6 - February 2, 2022
- Rx Pack Campus.2203.5 - January 27, 2022
- Rx Pack Campus.2203.3 - January 20, 2022
- Rx Pack Campus.2203.1 - January 17, 2022

See the Release Pack Campus.2203 - January 2022 article for a full list of cases included in the Campus.2203 release.

Compromised Password Ad Hoc Field Added to Ad Hoc Reporting (SIS-152791)

The Ad hoc field 'accountManagement.pwnedPassword' has been added to Ad Hoc Reporting tools. If the 'Prohibit Passwords That Have Been Previously Disclosed in a Data Breach' Account Security Preference is enabled, Infinite Campus accesses and utilizes a global database used to track passwords and accounts affected by data breaches of non-Infinite Campus systems and identifies any passwords within your system that matches passwords on this database. All passwords flagged as compromised can be pulled into Ad hoc filters and reports using this new 'pwnedPassword' field.

You can access this field via Campus Usage > Account Management > pwnedPassword.

Account Security Preferences are set via System Administration > User Security > User Preference

Management > Account Security Preferences
