

# Release Information

Last Modified on 01/14/2026 2:27 pm CST

Release notes provide the applicable personnel the ability to review enhancements, modifications and regulated changes prior to accepting an update. It is advised that users review the release notes carefully and alert appropriate district staff to changes in the product.

Questions or concerns regarding an update should be submitted by the district's Authorized Technical Contact via a [Support Case](#).

For additional information on version and platform support, please refer to the [Supported Platforms](#) article.

## Release Schedule

At Infinite Campus, we follow a continuous release cycle to keep your system current, secure, and compliant. Here's how it works:

### Regular Release Packs

We deliver Release Packs every four weeks, each containing a carefully selected group of:

- New enhancements
- Regulatory updates
- Bug fixes

### Rx Pack for Critical or Time-Sensitive Updates

In addition to regular Release Packs, we provide Rx Packs as needed for:

- Urgent, high-priority defect fixes that cannot wait for the next scheduled release.
- State-regulated reports or updates when a complication prevents them from making their targeted Release Pack.

## Planning for Updates

We recommend that districts:

- Review each release in the context of your current processes and needs.
- Deploy updates first to a staging environment for evaluation and user acceptance testing (UAT).
- Apply the update to your production environment once validated.

Your district's Authorized Technical Contact can manage and schedule updates through the [Updates tool](#) in the Support Case Portal. This tool allows you to:

- Request version updates to production and staging environments
- Schedule database refreshes for sandbox and staging sites

## Anticipated Release Dates

Please note that on occasion, the actual release date may be postponed, to ensure that the product being released is ready for customers. The actual release will be published to the front page of Community as well as posted as an Announcement in the Community Forums.

Releases follow a naming convention of Campus.YYWW where YY is the year (such as 20) and WW is the week of the year (such as 29).
