Campus Release Pack Enhancements

Last Modified on 05/28/2026 2:10 pm CDT

Enhancements play a vital role in the evolution of Infinite Campus. With each Release Pack, a number of enhancements are included to continuously improve existing functionality and provide new functionality to advance the Infinite Campus experience.

This page describes all major enhancements included per Release Pack and serves as a convenient way for users to view/reference when an enhancement was added.

For information about enhancements in Release Packs prior to .2539, see the following PDFs:

Click here to expand...

- Campus-Release-Pack-Enhancements .2439 - .2535
- Campus-Release-Pack-Enhancements .2239 - .2435
- Campus-Release-Pack-Enhancements .2227 - .2335
- Campus Release Pack Enhancements .2128 -. 2223
- Campus Release Pack Enhancements .2028 - .2124
- Campus Release Pack Enhancements .1929 - .2024
- Campus Release Pack Enhancements .1829 - .1925

This page covers major functionality modifications and does not describe all cases considered enhancements. For a comprehensive list of all modifications made (including bugs and state reporting modifications), please review the release notes for each Release Pack.

Campus.2623

Quizzes - Randomize Question Selection

New options have been added to the page-level question settings for quizzes. In addition to the option to Randomize Question Order, teachers now have the option to:

- Randomize Question Selection - delivers a random selection of questions from those on the page.
- Number of Questions to Deliver - the number of questions delivered from the page.
- Points Per Question - the proportion of total points possible each question is worth.

For example, if a page of a quiz has 10 questions and a teacher randomizes selection and enters a Number of 5, each student who takes the quiz will see 5 random questions from the 10 available on that page. If the teacher reassigns the quiz, students will see the same questions, but if the student reattempts the quiz, they'll get a new randomized set of questions.

Linking Directly to Attachments

When teachers attach content to a piece of curriculum, they now have the option to **Link Directly to Content**. When this option is selected and a student clicks the assignment in Campus Student, the attached content opens, bypassing the assignment details such as dates and grading. This option is helpful when sharing a resource such as a syllabus or linking directly to a class website or materials. If there are multiple pieces of content linked, students are shown a list of attachments.

Keep in mind that students cannot view any additional assignment information, including the description and grading. Assignments with Link Directly to Content selected should not have other tasks linked, such as quizzes or discussions, since students won't be able to access them.

Pushing Course and Master Data - Inactive Courses

Options for inactive courses have been added to the Push All Course Masters tool:

- Push Mode of 'Push locked data' - new option: **Push to inactive courses**
- Push Mode of 'Overwrite' - new option: **Include inactive courses**

An option to **Include inactive courses** has also been added to the Push All Courses tool. The Course Status tool now displays inactive courses with '(Inactive)' appended to the name.

Map Columns to Multiple Database Fields

The Assessment Center has been improved to enable users to map a single import column to multiple fields, offering greater flexibility for import scenarios. For example, a column containing raw scores could be mapped to both "Raw Score" and "Scale Score" at the same time.

Key highlights:

- Users can create multiple field mappings for a single column via the Options modal
- Each mapping is displayed as a separate tab within the Options modal
- The database field dropdown filters out fields already selected in other tabs for the same column
- The main grid shows a red "!" icon if ANY tab for that column is incomplete
- Column headers show a comma-delimited list of all mapped field names

Scheduling Board - Load Settings, Unload Filters

The Scheduling Board options for Load have been updated for the following:

- The Settings side panel is now Load Settings.
- A new Unload Filters side panel has been added to allow the unloading of courses by grade

and ad hoc filter. When unloading, course or section locks already in place are not unloaded.
- The list of Load options now displays in alphabetical order

Scheduling Board - Secondary Teacher Role Assignment

In the Campus.2619 Release, the Scheduling Board was updated to allow the assignment of a Primary Teacher when right-clicking on a section. Now, a Secondary Teacher assignment can be added.

Right-click on the Section, locate the Assign Teachers and Roles section. Here, the Primary Teacher and Primary Role fields are visible. Click Add to add additional teachers to the section.

Options for Roles cannot be modified.

Add Section Student Details to Ad Hoc for State Edition

State Edition users in states that use the Section Student Detail tool can now access Section Student Detail fields in Ad hoc to run reports on that data. The Section Student Detail fields will only appear in Ad hoc, not in the user interface.

This change applies to State Edition users only. This functionality was already enabled for North Carolina (NC) and Montana (MT) State Edition users.

Sent Message Log 2.0 Enhancements

The following enhancements were made to the Sent Message Log 2.0:

- Users can now filter the Sent Message Log 2.0 by all eligible Delivery Modes (Inbox, Email, Voice, and Text).
- Use the 'All Messages' view to search for messages by the name of the person who created the message.
- Use the "All Messages" view to search for messages containing an attachment.

SIF Unity – Resync SIF Data and Export Object Viewer Results

Resync functionality has been added to the SIF Person Data and Configuration Object Viewer tools to allow users to send objects outside of a trigger.

The Object Viewer in the Configuration tool has also been updated with an option to export generated results in CSV or JSON format.

SIF – Sent Record History Duration

A 'Days to keep SIF Sent Record History records' field has been added to the System Preferences to allow districts to set the amount of time that SIF Logs will be stored.

Ed-Fi Data Tool Update for Staff and Parent/Contact-based Resources

The Ed-Fi Data tool has been updated to include Staff and Parent/Contact-based resources.

The location of the Ed-Fi Data tool has been moved to the Census module.

Individual tool rights have been introduced for the Compare/Get Ed-Fi JSON button and the Resync button in the Ed-Fi Data tool.

Ed-Fi – Tool Name Updatess

The following tools in the Ed-Fi module have had their tool names prepended with 'Ed-Fi' in the navigation menu:

- Ed-Fi Configuration
- Ed-Fi Data Comparison
- Ed-Fi Delete Tool
- Ed-Fi Error Log
- Ed-Fi Event Queue
- Ed-Fi Event Queue Statistics Report
- Ed-Fi Identity Mapping Report
- Ed-Fi Resync
- Ed-Fi Import Tool (WI)
- Ed-Fi Attendance Audit (NE)

Campus.2619

Scheduling - New Course Rules for Precedes/Follows and Before/After

New Scheduling Rules have been added for the Precedes/Follows and Before/After rules, allowing the rules to apply to either Terms or Periods. Previously, the rules only applied to the Term. Logic for rules with '(by Term)' in the name has not been changed.

Before and After

The existing rules of Before and After are now:

- Before (by Term) and After (by Term)
- Before (by Period) and After (by Period)

Choosing ‘by Term’ means the student must take the course in a term that comes before the current term or a term that comes after the current term during any point in the school year.

Choosing ‘by Period’ means the student must take the course in a period that comes before or after the period in which that course section is scheduled at any time during the day.

Period order is based on the SEQUENCE of the period as entered in Calendar Periods, not by the Name of the period.

Precedes and Follows

The existing rules of Precedes and Follows are now:

- IMMEDIATELY Precedes (by Term) and IMMEDIATELY Follows (by Term)
- IMMEDIATELY Precedes (by Period) and IMMEDIATELY Follows (by Period)

Choosing ‘by Term’ means the student must take the course in a term in the preceding consecutive term - e.g., if the course is scheduled in Term 2, the other course must be scheduled in Term 1).

Choosing ‘by Period’ means the student must take the course in a period in the preceding consecutive period - .e.g, if the course is scheduled in Period 2, the other course must be scheduled in Period 1.

See the Course Rules article for additional explanation and examples.

Seating Charts Redesigned - Limited Release

The Seating Charts tool has been redesigned to improve the usability, flexibility, and accessibility of the tool. Improvements include:

- Greater flexibility in seat placement to more closely mirror non-traditional classroom layouts and larger seating arrangements.
- Option to copy a seating chart between sections and years, allowing teachers to reuse a classroom setup rather than recreating it every term.
- Enhanced keyboard navigation.

To avoid disruption at a time when many school years are ending, **this update is not being automatically enabled on customer sites**. If a district is interested in this new functionality for training and planning purposes, they can submit a request with Campus Support to have the new functionality enabled. Note: the change will apply to the entire district and once new Seating Charts are enabled, a district cannot go back to the previous Seating Charts tool.

These changes will be released to all customers this summer, targeting the Campus.2627 release at the end of June.

Scheduling Board, Staff Planner - Teacher Role Assignment

The Scheduling Board and the Staff Planner now include the option to assign a Role to the staff person. When the Role is populated in the Staff Planner, it is automatically populated on the Scheduling Board.

In the Scheduling Board, right-click on a Section and select a value for the new field **Assign Primary Teacher Role.**

In Staff Planner, select a staff person and enter a **Role** for them. Or filter the staff list and apply the same role to the selected staff using the **Batch Edit Staff** option.

Options for Roles cannot be modified.

Deleting Assignments with Student Work and/or Scores

Assignments can now be deleted even if they have student work submitted and/or have been scored. If the assignment has student work or score records associated with it, a confirmation pop-up displays when a user attempts to delete the assignment, stating that once the assignment is deleted, it cannot be recovered. The user must mark the "I understand and wish to continue" checkbox to delete the assignment.

New Quiz Feature - Question Banks

A new feature has been added to quizzes called Question Banks. Question Banks are a type of curriculum that is only visible to teachers and other curriculum staff. Banks collect questions together to make it simpler to store, access, and reuse quiz questions. Teachers can create banks for subjects, units, or any other grouping that makes sense for their curriculum.

From a bank, teachers can copy questions into an existing piece of curriculum or a new one. They can also start with an assignment and copy questions from a bank to a quiz.

One recommended workflow is to create question banks in the My Curriculum tool, which can then be used to make quizzes in any of a teacher's sections.

New Quiz Setting - Require Responses

Previously, students had to answer each question in a quiz before they could submit it. A new option has been added to Quiz Settings that allows teachers to control whether students can submit incomplete quizzes. The option is called "Require responses before submitting." If the teacher leaves the checkbox marked, students must answer all questions before submitting. If the checkbox is not marked, students can submit the quiz even if they haven't answered some or all questions.

Fee Dispute Update

Fees now flag disputed payments and block payments or fees until resolved, then resume normal behavior.

Embedding Google Docs in Curriculum

Google Docs can now be embedded in the text editors on curriculum. Previously, an embedded Google Docs were stripped out when the curriculum was saved.

Campus Learning Usage Report Update

The Campus Learning Usage Report has been updated to include data for Discussions, Section Feeds, Engagement Check-In, and Ask a Question tools.

SIF Unity – Object Viewer Update

Functionality has been added to the SIF Unity Object Viewer tool to allow users to apply additional search criteria to objects to view additional data.

DIS - Error Log Update

Start Date and End Date fields have been added to the DIS Error Log to allow users to find errors within a specified date range.

Recipient Call Status Enhancement

The Recipient Call Statuses in Sent Message Log 2.0 have been enhanced to include more descriptive statuses, as well as additional Status Details.

Campus.2615

Scheduling Board - Load Balance Options for Programs

The Scheduling Board now includes a Load Balance option for Programs in the Section Balance side panel. This feature lets schedulers distribute students with program records across either a small number or many course sections, supporting equitable placement.

Currently, load balancing is available for:

- English Learners (EL) (Student Information > English Learners (EL)
- Gifted & Talented (Student Information > Program Participation)

- Section 504 (Student Information > Program Participation)

Only Gifted & Talented and Section 504 programs tracked in Student Information > Program Participation are included. Records tracked on the enrollment record (e.g., a Section 504 checkbox in State Reporting Fields) or in custom tools are not included.

Sent Message Log 2.0 Enhancements

Sent Message Log 2.0 has been reformatted to accommodate different message criteria and support the future consolidation of sent messages from various Messenger tools into a single location. A new Message Type filter has also been added, making it easier to narrow results by the type of message sent. Additionally, more information has been added to our Sent Message Log 2.0 documentation on the Delivery Summary and Message Duration sections of the Sent Message Report.

Areas of Sent Message Log 2.0 impacted:

- Sent Messages
- Message Details
- Report Export
- Recipient Log

Add Functionality to State Edition Academic and Graduation Programs Management Push

Enhancements have been made to the Publish feature for State Edition users. State users can choose to publish programs to all or selected districts and generate an Excel file summarizing what was published. A Publish History button has been added so that individual programs can be selected and an Excel file generated that summarizes the dates and districts for which the selected program was published.

Add Functionality to State Edition Academic and Graduation Programs Management Records

The following capabilities have been added for State Edition Academic and Graduation Programs tools:

- Delete non-published Academic and Graduation Plan Management records
- Lock/unlock Academic and Graduation Plan fields in the UI
- Copy Academic and Graduation Plan records
- Select specific Academic and Graduation Plan records to push to Districts
- Push Academic and Graduation Plan records to specific Districts
- Send notifications to Districts when push occurs
- Ability to extract Academic and Graduation Program information by creating an Ad hoc filter
- Added a tool for defining State Credit Types

Activity Registration Disputes

Added new dispute status under the Payment Status column in the Activity Roster and implemented the ability to add inventory when removing a student from an activity.

Curriculum and Scoring Rubric Improvements

The following improvements have been made to curriculum tools:

- Grading setup can be included when curriculum is shared to the Curriculum Library.
- Curriculum can be shared directly from My Curriculum to the Library.
- Curriculum with Scoring Rubrics can be shared to the Library.
- Curriculum with Scoring rubrics can be created in My Curriculum.

Math Equations in Quizzes

The option to add math equations to text fields has been expanded to other fields in Quizzes, including quiz and page Instructions and Matching and Ordering question types.

Ed-Fi - New Ed-Fi Audit Report

The Ed-Fi Audit Report tool has been enabled for districts to use. This new report provides a record of all Ed-Fi resync and delete requests initiated within a Campus site.

Pronoun Filters Updated

The Ad Hoc Reporting Filter Designer tool has been updated to include filters for pronoun names and pronoun codes. This provides users with additional filtering options beyond the numerical value pronoun IDs.

Campus.2611

Add a Tool for Managing State Credit Types to State Edition Academic and Graduation Programs

An enhancement has been made that allows State Credit Types to be created at the state level and then mapped by districts to local Credit Types in Credit Group Setup. This allows the management of state credit types in state-managed Academic and Graduation Programs.

Scheduling Board - Load Alternate Course

Requests

Alternate Course Requests can now be loaded using the Scheduling Board. In the Load Settings Panel, a new **Maximum Number of Alternate Sections** exists. The numeric value entered here indicates the number of alternate courses a student can be scheduled into. Once this value is entered:

- Run Load Alternates to add alternate requests to all course sections.
- Right-click on a Department, Course, Section, or Term to add alternate requests by those options.

On the Walk-In Scheduler, alternate course requests are prioritized. On the Scheduling Board, those requests are attempted to be loaded in the order they are numbered (prioritized) on the Walk-In Scheduler, and will take into account the value that exists in the Maximum Number of Alternate Sections.

Core and Custom Attribute Dictionary UI Update and Search Addition

The UI of the Core Attribute Dictionary and Custom Attribute Dictionary tools was updated to current modern UI standards, improving usability and accessibility.

Also, a search field has been added to both tools, allowing users to quickly find a specific attribute.

Add Document Upload Capability to Title Funded Programs

An enhancement has been made to allow districts using Digital Repository to enable the uploading of documents for specific Title Funded Program Types:

- Title I, Part A
- Title I, Part D
- Title III
- Title VI

Once uploading documents for Title Funded programs is enabled, documents can be uploaded in the Person Documents tool and aligned to the appropriate program by selecting it from the Campus Tool droplist. This can be accessed through the Person Documents tool or by a new link in the Title Funded Programs tool.

Enrollment History End Action Enhancement

The End Action field is now available on the Enrollment History editor, and has been added to the Enrollment History Import Wizard for Records Transfer.

Source Field Added to Sales Report

Added the Source field to the Sales report.

Campus.2607

Assessment Import Updates

The Assessment Center score importer has been enhanced to support vertical file imports, in addition to the existing horizontal file format. Vertical files allow for one score per row with multiple rows per student, while horizontal files have one row per student containing all scores. The “Apply to All” feature is now only visible and functional for Horizontal orientation. Additionally, unique assessment names within an assessment "family" are now mandatory for saving new or modifying existing assessments. These improvements facilitate the direct import of vertical score files from national assessment vendors, eliminating the need for manual conversion.

My Curriculum - Copy Curriculum from Section

The My Curriculum tool has been improved to allow users to copy their existing curriculum that is aligned to a section into My Curriculum. Once curriculum is copied to My Curriculum, teachers can work on it outside of the context of a section, using their existing curriculum as a starting point for building their own curriculum collection.

This copy process is done using the Curriculum Copier, selecting the Section as the Source and My Curriculum as the Destination.

Scheduling Board Updates - Load by Ad hoc, Active Year Banner

The following updates have been made to the Scheduling Board:

- A new Load Setting has been added - Filter by Ad hoc. This option can be used to load specific groups of students into courses. Like other tools in the product, when an Ad hoc filter is selected, matching search results only include those students who are included in the filter. Filters of all types can be selected (query wizard, selection editor, pass-through query). When a filter is selected, the total number of students included in the filter is displayed below the filter field. The changes being made by the load only affect the students in that filter who have course requests.
- When opening the active trial in the active year after the start of the school year, a red banner displays in the Scheduling Board to alert the user that they opened the active trial and they need to proceed with caution when making changes.

Student Schedule and Section Student Detail Roster Update Link

A Section Student Detail (where available) button has been added to the Roster Update panel in the student's Walk-In Scheduler to easily access the Section Student Detail tool when updating roster-related fields.

From the Walk-In Scheduler view on the student's Schedule, select a course. The Roster Update panel displays; just below the Modified By information, the Section Student Detail button displays. Clicking this opens the Section Student Detail tool, where users can adjust the student's roster details

Re-add Removed Students to Activity Roster

The Activity Registration module now allows administrators to add students back to the roster after they have been removed.

Dependent Care Updates

The following updates have been made to Dependent Care:

- The Attendance Registry Report is available.
- Users are no longer required to assign a registration fee to a session.

Custom Forms Ability to Version Blank and Interactive Forms

Users can now create and manage multiple versions of Blank and Interactive form types, allowing for better tracking and organization of form revisions. See the Custom Form Setup article for additional information.

Data Extract Utilities – Users Now Able to Test Extract and Connection Prior to Save

The Data Extract Utilities tool has been updated to allow users to test extracts and connections before saving an extract or modifying an existing one.

Deposit Reporter Retain Failed Deposits

The Deposit Reporter will now retain all requested deposits and deposit details, even if a deposit fails. Failed deposits will be marked with a "Canceled," "Exception," or "Revoked" status instead of being deleted. This change allows for better tracking and auditing of deposit requests, including those that were unsuccessful.

Require Multi-Factor Authentication for SAML Logins Options Added to Login Security

Settings

A dropdown list called 'Require MFA for SAML Logins' has been added as an option for the 'Require Email-Based Multi-Factor Authentication Code' and 'Require Time-Based Multi-Factor Authentication from a Third Party App' authentication options in Login Security Settings. When set to Yes, users authenticating via SAML will be required to complete the email or third-party app authentication process (depending on which authentication is set in Login Security Settings).

Campus.2603

Scheduling Board - NEW Semester-Based Scheduling Functionality

The Scheduling Board has been enhanced to support semester-based scheduling, allowing for more flexible term and semester functionality. Schools can now:

- Use the Scheduling Board separately for each semester.
- Level courses and create student schedules for individual semesters.
- Adjust schedules between semesters based on student progress.

This improvement is particularly beneficial for schools with semester-long courses and significant student movement between semesters.

See the Scheduling Board article for more information.

New Interface for Course Sections, Section Roster

Course Sections and Section Roster have a new user interface to meet new technology standards and improve the overall look and feel of the Scheduling & Courses toolset.

Course Sections

- Scan the list of sections quickly to see assigned teachers, rooms, assigned term and period, total seats taken, and the assigned scheduling group.
- Edit details about an existing course section (with additional tool rights) and existing Responsive Scheduling sections.
- View the teacher's grade book and the teacher's seating charts (with additional tool rights).
- Add new sections for the selected course.

Section Rosters

- See active students, incoming students, and dropped students more easily. Flags, Health flags, IEP and PLP documents, and other documents are more visibly appealing and easier to

review.
- Additional student details - contact information, student identifiers, and the student's schedule for the day - can be viewed in the side panel that displays (with appropriate tool rights) when selecting the student.
- Staff can print the Section Roster, as well as edit the roster (with appropriate tool rights) through the Requests & Rosters tool.

Google Drive Integration - Support New Permission Enforcement

Google Drive is updating its permission enforcement - users will no longer be able to have less than full edit rights to a file that is in a folder that they own. This update ensures that file permissions are properly managed when transferring ownership between teachers and students, preventing potential access issues.

Note: Districts that use the Google Drive Integration must take this release to keep using the integration. See the Google Drive Permissions Change article for more information.

Moved Curriculum Metadata from Details Tab to Curriculum Editor

Curriculum metadata has been relocated from the Details tab to the main Curriculum editor in a collapsible "About" section. This change consolidates curriculum information, making the metadata easier to find and use. Curriculum metadata is primarily used when searching for curriculum in the Curriculum Library.

Pick-Up and Drop-Off Location Fields Added

The 'Pick-Up Location' and 'Drop-Off Location' data fields have been added to the 'Today's Busing' section of the Transportation tool. This change enables users to quickly view saved location information without needing to expand the 'Routes' section to access it.

Dependent Care Updates

The following updates have been made to Dependent Care:

- The Student Records tool has moved to the Administration tool. Users with access to Student Records and Site Attendance in the Site Staff tool will have the same level of access to data and functionality. The Site Staff tool has been removed.
- A collapsible view for student Sessions has been added to the Student Records tool.
- Student Records now include a collapsible Account Balance view. This shows the current invoice balance and itemized invoice details.

- The following tool rights have been added:
    - Sessions: Administrative Student Session management
    - Accounts: Current Student Financial Account information
    - Invoice: Ability to print off invoices for student accounts
    - Manual Payments (upcoming functionality): allows staff to take payments

SIF Unity – New State ID Report and Message History Update

A new State ID Report has been added to the Message History tool to identify new state ID records. The Message History report has been updated to include a Message History Summary and a Message History Detail.

Improved Messenger 2.0 Processing Display and Step 3 Workflow

The Messenger 2.0 processing and sending workflow has been updated to provide a more streamlined experience when sending messages. Users will now be redirected to the Messenger 2.0 home page after initiating a message send, rather than waiting on Step 3. The message status will be visible under the 'In Progress' tab of the Upcoming Messages card, displaying as 'Processing' and then 'Sending' as it progresses. If a message fails during processing, it will be marked as 'Failed' with error details available via the 'View Details' button.

Data Certification Updates

The following updates were made to Data Certification tooling:

- Data Validation Groups containing ad hoc filters are no longer available for use by Data Certification tools.
- A warning banner was added to inform certifiers when an event is not yet open for certification.
- A warning banner was added to inform certifiers when they have missed the certification date for an event, and inform them that they must request recertification to request an extension from the state.
- Once a user completes certification, the final Review Data workflow screen will no longer have a Submit Certification to State button as the user has already submitted their certification.
- Reviewers' Certified Status now shows as N/A instead of No for an event.
- Once a user has completed recertification of an event, their users status will now accurately show as ‘Certification Complete’
- For events with a Certification Level = School, the View Included Districts button will now show as View Included Schools and display each school name and associated district.
- Users were unable to add members to a category more than once, preventing a single person from being assigned to two or more schools. This issue was corrected.
- The Level filter on the Certification Category screen was not filtering properly. This issue was corrected.

Campus.2551

Student Grades Updates

Several updates were implemented for the Student Grades tool:

- Added print functionality to the main Grades screen and section detail screen.
- Enhanced user experience with a horizontal scroll bar at the bottom of the page for easier viewing of multiple terms and multiple standards/grading tasks.
- Added capability for a full view option.
- Grading Information pop-up loads without issue after previously using the ESC key.
- Refreshing the page when viewing a curriculum item no longer generates an error modal, and Curriculum can be closed as expected.

Dependent Care Updates

- The Student Financial Activity Report is now available.
- An issue marking scheduled students as drop-ins on their last scheduled day of attendance has been corrected. These students now correctly show as scheduled.
- When creating session charges, users must select the Charge Type before naming the Charge.
- Once a charge, discount, or credit appears on an invoice, no further edits can be made.
- Students can now be added to additional sections after initial enrollment.
- Charges are no longer required for Sessions. This also means users are no longer required to select a registration charge when approving Registration Requests.

Historical Attendance Table

An Attendance Year Aggregation historical attendance table has been added to the Filter Designer. The table hosts historical data migrated from legacy systems.

Campus.2547

New! Groups - A Staff, Parent, and Student Communication Tool

A new Groups tool has been added to Campus Learning. This tool enables users to create groups that include students, parents, and staff members, and communicate with them through Campus. These groups can be created around events, topics, organizations, and interests. Depending on group settings, members can create posts and reply to others in the group.

Group Owners can:

- Create groups and determine the posting permissions for that group.
- Make the group public, so that any users in the district can request to join the group, or set the group to private so that only users who are invited can join.
- Participate in the group, including creating posts and replies and flagging inappropriate content.
- Moderate groups and resolve flagged posts.
- Manage group membership.
- View communication history for the group, which maintains original content if editing content is enabled.
- Archive groups that are no longer needed.

Only staff members can be given the role of Group Owners.

Group Members can:

- Post and reply in the group, depending on group settings.
- Flag inappropriate content.
- Search for groups to join.

Staff, parents, and students can be members of groups.

Note: when a student wants to join a group, their guardians must first provide approval.

The Groups Administration tool allows administrators to oversee the use of groups, including resolving flags and other Group Owner tasks. Access to this tool is governed by the Groups Administrator tool right. Group Administrators can see any Groups tied to "All Schools" and to any Schools to which that user has calendar rights. This level of access should be given sparingly.

Access to the Groups tool is granted to staff members via tool rights. Additionally, a System Preference must be enabled to turn on Groups for a district. An additional setting is available to automatically add a student's guardians to any groups to which the student belongs. The Campus Digital Repository must also be enabled for groups to share images and attachments.

Add Math Equations to Rich Text Fields

This enhancement allows users to insert mathematical equations into rich text fields in curriculum. Click the equation button to build a math equation using common mathematical operators, characters, and formulas. The feature makes it easier for teachers in math and science courses to include complex equations in quizzes and other assignments, beyond what can be typed using a standard keyboard.

Responsive Course Sections Edit Link

The Edit link next to section offerings on Course Sections now redirects users to the Responsive

Schedule Section Builder tool for responsive courses.

Cross-Site Enhancements

Additional course data elements from the Serving School to the Home School are now transferred for Cross-Site Enrollment courses. This allows for more accurate posting of transcript data and state reporting information.

Primary District Account Label

A new primary district account label has been added for Stripe customers to Bank Accounts in Payment Setup for users to easily identify the primary district account without needing to open individual bank account records.

Filtering and Sorting Updates Made to Custom Tools Publisher and Task Scheduler

The Custom Tools Publisher now includes filtering and sorting options for the Custom Tools list and Publishing Status columns on the main page and the Publishing Queued Date and Status columns in the history view.

Task Scheduler was also updated to ensure any selected filtering or sorting options remain selected when navigating to different screens within the tool.

RefId Updates for SIF Unity Tools

The SIF Object Viewer and SIF Deleter tools have been updated to accept RefIds that contain dashes.

An issue with the RefId not populating for deletes in the Combine Person and the SIF Deleter tools has been fixed.

Campus.2543

Social Security Number Removal and Data Purge

A new tool designed to remove personally identifiable information (PII) from our Campus sites is available. This tool allows districts to easily remove Social Security Number (SSN) records from their SIS.

What the tool does:

- Permanently deletes SSN data from the database for 6 database fields at the district
- Hides SSN fields from the UI at the district, preventing new SSN data entry through the UI
- Removes all SSN tool rights for all users
- **Irreversible: Once executed, SSN fields will remain hidden and cannot be restored**

Database fields:

- RecordsTransfer.studentSSN
- PlanStudent.ssn
- IdentityHistory.ssn
- StaffMemberSync.ssn
- Identity.ssn
- EvalStudent.ssn

This tool will not remove SSN data stored outside of the identified fields. If districts have created and stored SSN data in other fields, the SSN Purge tool *will not* alter those records. Districts will remain responsible for managing any SSN data stored in any other fields.

The following states will be excluded from this tool for reporting reasons: VA, KY, GA, IN, MO and TX.

Instruction Tools - Go to Student Information

A link to "Go to Student Information" has been added to the student details side panel in various tools in Instruction that did not previously have this link. The link displays if the teacher has tool rights to any tools in Student Information > General. Clicking the link opens the Student Information menu in a new browser tab, where the teacher can select which tool they want to view based on their tool rights.

New - Quiz Timers

An option has been added to Quiz Settings to set a Time Limit for a quiz. Teachers can also set a Warning Time to let students know when their time limit is approaching. Once a timer is enabled in the Quiz Settings, a teacher can individualize the timer and warning via the Section Settings of the assignment.

When a timer is set, it displays for students when they're working on a quiz. When the timer expires, the quiz is automatically submitted with whatever work the student has completed at that point.

New Interface for Section Information, Add

Section

The Section Information and Add Section tools have a new interface. Like the Course Information, Course Master Information, and other course-related tools, the available fields are now organized into the following "cards," which can be collapsed and expanded as needed.

- **General Section Information** includes basic identifying information like the Section Number, Teacher Display Name, etc.
- **Section Setup** Scheduling includes fields related to standards display, credits, LMS, and virtual setting.
- **State Defined** lists all fields used for state reporting in your state.
- **District Defined** lists any field your district has chosen to collect data on.
- **Section Placement** displays when the section meets during the calendar terms and periods.

Attendance Tool Upgrade

The Attendance tool in Instruction has been updated to improve the visual design and accessibility of the tool. Tabs at the top of the tool allow you to switch between the Attendance List and the Seating Chart. In the Attendance List, a Summary section displays at the top if Virtual Attendance is set up.

With this change, an option has been added to easily switch between Periods using the buttons on the right when Classroom is enabled. Previously, this option was not available if a teacher had the Classroom view enabled.

Additionally, taking attendance via the Teaching Center has been updated to make the experiences more consistent. When taking attendance in the Teaching Center, you now have the option of sticking with the narrower, mobile-friendly view, or toggling on the Extended View, which matches the design of the Attendance tool.

Core Academic Program Assign and Status to include Inactive Students and End Dated Programs

In order to accommodate the need to identify students who have completed all requirements for any CTE program, including inactive students and students who are not currently assigned to a program they have completed requirements for, the following enhancements have been made:

Course Plan Administration - Update Student Status:

- Added ability to include All Calendars for the selected context year
- Added option to include end dated programs
- Added option to include inactive students

The Batch Program Assignment Wizard now has the option to include inactive students with completed requirements in the selected context year.

State Edition - Course Management Updates

The following updates have been made to the Course Management tool, available for State Edition.

- State Course Codes can now be added to the Course Management tool. Previously, new codes needed to be imported into the database.
- Copy and Delete functionality has been added.
- A Status column has been added to see whether a code is Active, Inactive, or Unpublished.
- State Course Codes are now organized by their Start Year, with the latest start year first.
- Batch Edit functionality is now available to modify multiple State Course Codes at once.
- The Course Number and Course Name Fields have been removed from the State Course Information cards.
- The Course Management tool is available for state-linked District Edition sites as read-only.

With this release, the Course Code Setup tool has been removed.

Activity History

Added the Activity History feature to allow staff with appropriate permissions to view a student's Activity History, eliminating the need to use Ad Hoc reports or navigate individual Activity Rosters.

Tuition Payment Reminders

Added Tuition payment reminder messages. If schools have Tuition enabled, their tuition payers will receive reminders when the General checkbox is checked and an email and/or cell phone number is populated in the Personal Contact Information section of Demographics.

Task Scheduler Enhancements

The following updates were made to the Task Scheduler to improve the user experience:

- Filtering and search options were added to the Task Name, Start Date, and Frequency columns. This allows users to easily find tasks by searching and/or filtering the table's columns.
- A dropdown list was added to the Active/Stopped column, allowing users to quickly filter the task list to just those that are active or stopped.
- The tool will now remember what page you were on when reviewing a task’s details and returning to the task list.

State Edition DIS Object Trigger Updates – School and Schedule Objects

The logic for syncing the following database objects between the district and state editions has been updated to send data via a database event change, in addition to the existing syncing methods of forcing a manual sync or saving on the UI:

- District

- CustomDistrict
- School
- CustomSchool
- Calendar
- SchoolMonth
- ScheduleStructure
- TermSchedule
- PeriodSchedule
- Day
- StructureGradeLevel

See the Syncing Data Between District and State Edition article for additional information.

SIF Unity Event Queue Statistics Report

The Event Queue Statistics Report has been made available to allow users to view the total number of records inserted and the number of records processed over the past five days for SIF Unity.

POS Version Update 3.1.0

The following updates have been made to the Point of Sale tool:

- When Infinite Campus releases a major update that requires database changes for the POS Terminal application, it now requires the application to be updated before use.
- A new field, POS Display Health Comments (text displays on Point of Sale Terminal), was added to the student Conditions tool for Food Service users.
- Student Flag Start Date and End Date have been added to the POS terminal to determine if the status of the flag warning is valid without completing a data reload on the terminal.
- Automatically close terminal applications daily at 2:00 am to allow all terminals to receive necessary updates.
- The POS Application will now automatically perform a data reload when needed to accommodate newly released functionality.
- New Time Out feature to ensure terminals are not left open and unattended.

POS Terminal Updater Rework

The update to the POS Terminal includes the following improvements:

- When Infinite Campus releases a major update that requires database changes for the POS Terminal application, it now requires the application to be updated before use.
- The POS Application will now automatically perform a data reload when needed to accommodate newly released functionality.
- New Time Out feature to ensure terminals are not left open and unattended.
- Automatically close terminal applications daily at 2:00 am to allow all terminals to receive necessary updates.

POS Flag Start and End Date

Student Flag Start Date and End Date have been added to the POS terminal to determine if the status of the flag warning is valid without completing a data reload on the terminal.

The new flag feature will not be fully functional until POS Terminals are updated to POS Version 3.1.0. It is important to update all terminals to the new version before adding any new flags.

Campus.2539

New! My Curriculum

A new tool called My Curriculum has been added to Instruction. This tool allows teachers to create folders, assignments, and resources outside of the context of a section. Teachers can build out curriculum, with content, quizzes, etc, and then add it to their sections later. From My Curriculum, teachers can add curriculum to individual or multiple sections at a time.

Benefits of My Curriculum:

- Teachers don't have to worry about dates when creating curriculum. They can create the curriculum and then schedule it into sections later.
- My Curriculum provides a workshop area where teachers don't have to switch between section contexts or worry about draft curriculum being visible to students.

The Enhanced Curriculum tool right grants access to My Curriculum. This tool does not currently allow teachers to add curriculum from their sections into My Curriculum, or from My Curriculum directly into the Curriculum Library, but these features will be available in the coming months.

The Curriculum Import, which is currently in a limited beta release, has been moved to the My Curriculum tool. Teachers with access to the Curriculum Import can import curriculum into My Curriculum and edit it prior to adding it to their sections and making it visible. To accommodate this new tool, the My Curriculum and Other Curriculum views in the Planner have been renamed to My Planner and Other Planners.

Cross-Site Enrollment - Interdistrict Functionality Available

Interdistrict functionality for Cross-Site Enrollment tools is now available for several states. Consult the Is Cross-Site Enrollment Available in My State? article to see if your state is on the list.

For states where the Interdistrict column is blank (e.g., not populated with Campus.2539), additional updates are needed before this functionality can be turned on and will be included in future releases.

With this update, additional tool rights were made available for the following:

- Grading & Standards > Cross- Site Mapping
- Cross-Site Enrollment
- School Connections
- Cross-Site Enrollment Interdistrict Data Sync Log

Review the Cross-Site Enrollment information available for detailed functionality.

Scoring Submissions - Submitted By

If a teacher clicks View Submissions in the submission scoring screen, a new Submitted By column in the table of submissions displays the name of the submitter if it was someone other than the student.

Campus Student - Pinning Quiz Instructions

An option has been added for students taking quizzes that allows them to pin page-level Instructions to the top of the screen, so they can scroll through questions while keeping the Instructions visible.

Categories Redesign

The Categories tool has been updated to improve the visual design and accessibility of the tool. Functionality of this tool has not changed.

Matching and Ordering Quiz Questions

Matching and ordering quiz question types have been updated to include rich text editors for answer options, allowing teachers to enter images and formatted text.

Dependent Care Updates

The following updates have been made to Dependent Care:

- The Outstanding Balance Report is now available.
- The Adjustment Comment for a charge adjustment displays in the right panel.
- A warning message now displays when users attempt to approve an application before approving all forms.
- Users with RW tool rights may not add a new emergency contact. They are, however, allowed to edit existing emergency contacts.
- All Dependent Care portal pages offer language translation.
- A Reset button is now available on the Dependent Care Dashboard to clear any filters.
- Users may now add Discounts through Student Records.
- The Add Schedule button has been removed from Site Staff options.
- The Per Five Minute Late Charge Amount column has been corrected to show the total amount equivalent to the number of minutes late in 5-minute increments.

Curriculum Term Dates

The Term filters in the Curriculum tool have been updated so that any curriculum that is in progress during the selected term is included in the list. For example, if an assignment has a Start Date in Term 1 and an End Date in Term 3, if the Curriculum List is filtered to Term 2, that assignment is included in the list.

Tuition Billing

New Tuition Billing tools are now available in Infinite Campus, enabling schools and districts to manage tuition and payments for private schools, preschools, non-resident students, and summer school programs.

Users can now:

- Create and assign tuition charges
- Set up payment plans
- Apply discounts
- Manage grants and scholarships

Field Trip Activity Updates

Field trips have been updated to better align with other activity types, and students are no longer automatically added to the roster when a field trip is created. Additional features have also been added:

- Removed Students List
- Transfers
- Waitlist

Food Service Account Restrictions

Added the ability for districts to configure preference settings that allow guardians to manage select Food Service account restrictions in Campus Parent. These preferences are set up within the Patron Preference Portal Display Controls. A view-only preference has also been added for students.

All Payments Export

Added the All Payments Export to consolidate cash, check, and credit card Payments reporting across Activity Registration, Dependent Care, Fees, Food Service, Mobile Payments, School Store, and Tuition.

State Edition Student Records Transfer Update

The most recent record from the State Reporting and Data Entry section of the Special Education

Summary tool now transfers as live, editable data using the Student Records Transfer tool for State-Edition users.

Summary View for Messenger 2.0

Added a View Details button to Scheduled and In-Progress messages in Messenger 2.0.

Data Extract Utilities Update

The Data Extract Utility, Data Extract Zip, and Data Extract History tools have been combined into one tool, and the user interface has been updated to address technology initiatives.
