

Consecutive Absence Report - Video

Last Modified on 10/21/2024 8:20 am CDT

Use the Consecutive Absence Report to find students who have been absent a specified number of consecutive days during a defined time frame.

This report uses the [Attendance Aggregation](#) views, which are updated nightly. This means that attendance entered or modified on the current date, even for days occurring in the past, is not included. Staff may choose to perform a manual [Attendance Aggregation Refresh](#) to include attendance entered on the current day. It is not recommended to do this during the school day.
