Tool Search: Section Student Detail

The Section Student Detail tool provides a location where districts can collect course-related state reporting data for individual students in a course section. This data is not scheduling-related and can include both localized state reporting data elements provided by Campus (for example, Work Based Learning) and custom [District Defined](#) data elements created by a district administrator.

Section Student Detail is only available for districts in states with at least one Campus Attribute (i.e. a State Reporting field) for which they wish to collect data via this tool.

Fields vary by state. See the [State-Specific Information](#) section for more information on Section Student Detail procedures in your state.
