Tool Search: Section Student Detail

The Section Student Detail tool provides a location where districts can collect course-related state reporting data for individual students in a course section. This data is not scheduling-related and can include both localized state reporting data elements provided by Campus (for example, Work Based Learning) and custom [District Defined](#) data elements created by a district administrator. Section Student Detail is only available for districts in states with at least one Campus Attribute (i.e. a State Reporting field) for which they wish to collect data via this tool.

Fields vary by state. Please see your state's [State Tools](#) articles for more information on Foster Care procedures in your state.

Section Student Detail Information in Ad hoc Query Wizard

Section Student Detail Information is available in the Query Wizard for Course/Section Data Type filters in the **Course > Section Information > Section Student Detail** folder.

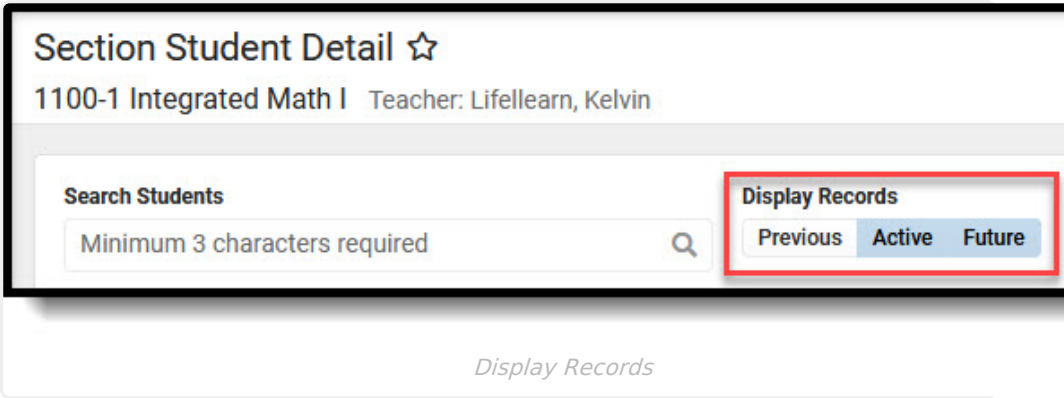

What you see in Ad hoc will depend on what has been created for your state. CalendarID, sectionID and personID can be used to filter section student detail based on one or more calendars, course sections, or students. Start and End Date are available in the Section Student Detail editor for staff to use when entering data. This example includes WBL fields that were localized for Rhode Island.
