Technical Information

See the Technical Information - Release Pack Campus.2219 (https://kb.infinitecampus.com/help/technical-information-release-pack-campus2219) article for a list of schema changes in this release.

Activity Registration

Activity Registration Maintenance (SIS-154627)

Fix

Users with read-only rights to Activity Dashboard were allowed to modify data on the Roster screen and export those modifications to Excel even though the changes weren't saved and couldn't be saved by the user. The issue was corrected.

Improvement

The roster screen now has a "Save and Stay" option which allows users who are making multiple changes to save their changes without having to re-open the roster screen.

Attendance

Attendance Reason Report Enhancements (SIS-153698) **[Enhancement]**

The Attendance Reason Report has been updated to be generated in CSV format, in addition to the existing PDF and DOCX formats.

Other enhancements have been made to the report, as follows:

- Text announcing what the report does and how to use it has been updated.
- Student Day Minutes are now included in the Report Header when generating in PDF or DOCX format. This value is determined by the Student Day Minutes entered on the Calendar Information tool.
- The Absence Code column has been renamed to ATT Code.
- The Absence Mark column has been renamed to Count.
- The Minutes column now displays before the Days column in all formats.

Campus Student/Parent

Campus Student/Parent Updates (SIS-155365)

The following updates have been made to Campus Student and/or Campus Parent:

- Previously, students were unable to see if parents had approved an Academic Plan. This has been corrected.
- Previously, the 'Current Term" filter in the assignment list, the list did not include assignments due in the current term if they were assigned in the previous term. This has been corrected. Assignments now display in the Current Term if any date in the current term falls within the Start and End Dates of the assignment.

The following updates have been made to the Batch Edit Calendar and Term Settings tool:

- Updated "Check All" checkbox to accurately reflect whether all rows are marked or not.
- Added counts to the header row indicating the number of items selected or enabled.
- The Modify Terms step has been updated to improve clarity for calendars that do not have terms defined.

Login Security Setting/Account Security Preferences Default Values Enforced to Increase Customer Security (SIS-152880) **[Enhancement]**

In an effort to strengthen customer security, the following updates were made to Login Security Settings:

- The 'Send an alert when logging into a new device' setting is now the default value. All customers who currently have this setting set to 'Do not send login alerts' have been set to 'Send an alert when logging into a new device' and must manually change the setting back to 'Do not send login alerts' if they wish to not enable this setting.
- The 'Enable Suspicious Login Attempts Mitigation' field is now set to a default value of Yes. All customers now have this field set to Yes and must manually set it back to No if they wish to not utilize this setting.

The 'Prohibit passwords that have been previously disclosed in a data breach' Account Security Preference is now set to a default value of Yes and all customers now have this field set to Yes. If you wish to not use this preference, you must manually go and set it to No.

Infinite Campus HIGHLY recommends customers keep these settings turned on as they provide a valuable defense against security-related attacks and breaches.

Login Security Settings – Time-Based Two Factor Authentication with Enhanced Security Updated to Globally Apply Authentication Frequency (SIS-154342) **[Enhancement]**

The 'Send an alert and require verification token from an authentication application when logging

into a new device' Login Security Setting has been renamed to 'Send an alert and require a Time-Based Two Factor authentication w/enhanced security (Third party authentication application required)'. Originally if enabled, the frequency in which the user had to reauthenticate using the third-party authentication app was defined per user on their User Account via a 'Require authentication every' dropdown list. This process was tedious for environments where this preference was enabled for many users and thus the administrator had to set this frequency value for each individual user account. To improve this experience, the 'Require authentication every' value is now set within Login Security Settings and the value selected is applied to all impacted user accounts.

Also, the 'Send an alert and require a verification code when logging into a new device' setting has been renamed to 'Send an alert and require a Two Factor Authentication (Email-Based)' to better clarify how this setting functions and how it differs from the authentication app-based setting.

For more information about these settings and how they work within Infinite Campus, see the Login Security Settings (https://kb.infinitecampus.com/help/login-security-settings) article in the Knowledge Base.
