

Absence Request Translation Setup

Last Modified on 12/14/2025 8:45 pm CST

Classic View: System Administration > Data Utilities > Languages/Translations > Translations

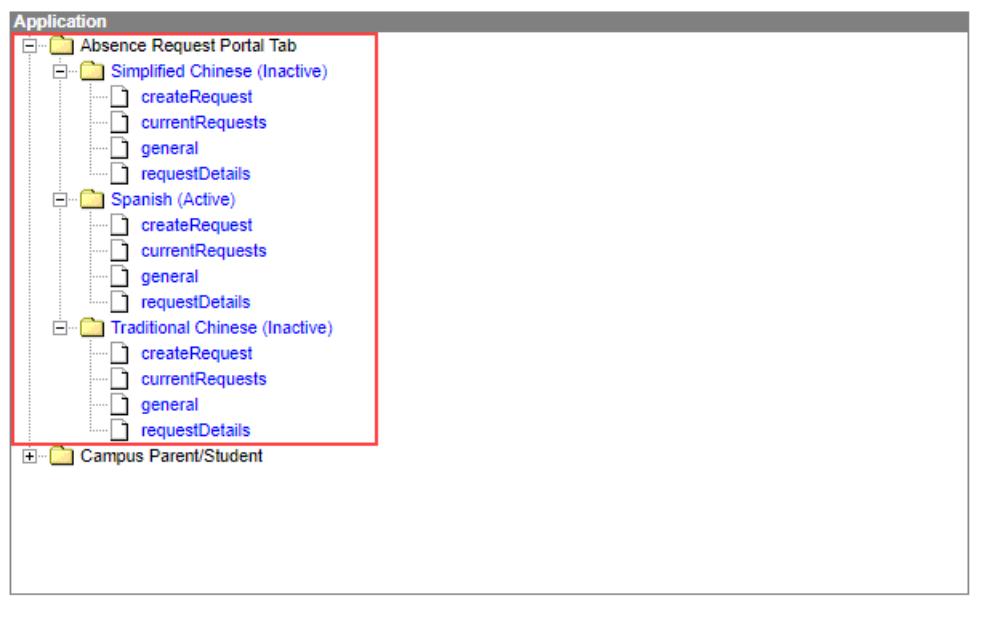

Search Terms: Translation Setup

You can use the [Translation Setup](#) tool to translate field names that display in the [Absence Request](#) tool in Campus Parent.

After you create a language in the [Translation Language Setup](#) tool, enter translations for field names here in the Translation Setup tool, and activate the language, users can select this language from a dropdown list at the bottom of the Campus login page. After they select the language, fields are translated from English to the selected language.

For complete information about using the Translation Setup tool, see the [Translation Setup](#) article.

Translation Setup ★ System Settings > Portal Preferences > Translation Setup

```
graph TD; Root[Application] --> Absence[Absence Request Portal Tab]; Absence --> Simplified[Simplified Chinese (Inactive)]; Absence --> Spanish[Spanish (Active)]; Absence --> Traditional[Traditional Chinese (Inactive)]; Simplified --> createRequest1[createRequest]; Simplified --> currentRequests1[currentRequests]; Simplified --> general1[general]; Simplified --> requestDetails1[requestDetails]; Spanish --> createRequest2[createRequest]; Spanish --> currentRequests2[currentRequests]; Spanish --> general2[general]; Spanish --> requestDetails2[requestDetails]; Traditional --> createRequest3[createRequest]; Traditional --> currentRequests3[currentRequests]; Traditional --> general3[general]; Traditional --> requestDetails3[requestDetails];
```

Example

In the image below, Spanish translations are entered for each field within the Absence Request tool. The Campus Portal user selected to translate the app into Spanish and the screen was updated to display these fields in that language.

Translations		
Key	Translation	English Text
createRequest.absenceType	Tipo de ausencia	Absence Type
createRequest.arriveLate	Llegar tarde	Arrive Late
createRequest.arriveTime	Hora de llegada	Arrival time
createRequest.firstDay	Primer día	First Day
