Tool Search: Ed-Fi Configuration

The Ed-Fi Configuration tool is used to establish Ed-Fi data resources.

The Student Discipline Incident Behavior Associations resource is only available in Ed-Fi version 3.5.2 and beyond.

The following describes how to set the resource preferences for the Student Discipline Incident Behavior Associations resource. If the Configure or Edit buttons do not display, then the resource does not need to be mapped and the toggle button can be used to turn the resource on or off.

If a mapping is changed, a resync must be performed on the resource in order for the new mappings to send correctly.

1. Select the appropriate **Ed-Fi Code** for the Discipline Incident Participation Code Descriptors.

Any item not mapped will not report to Ed-Fi.
