

Ad hoc Reporting (Activity Registration)

Last Modified on 12/14/2025 8:45 pm CST

[Activity Roster Filter Fields](#) | [Staff Role Filter Fields](#)

Tool Search: Filter Designer

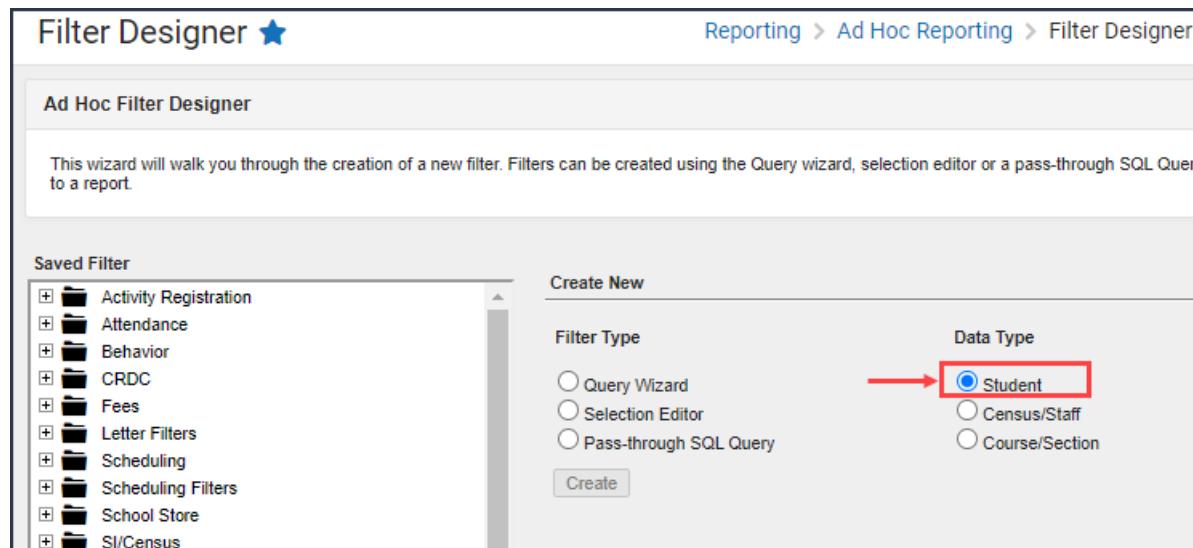

The Ad hoc Reporting tools allow users to create custom queries and reports on various types of information stored within the Campus database. Reports may be used for data analysis and state reporting and queries may be exported out of Campus or used to create filters for standard reports. Custom filters and reports are built by adding elements from Ad hoc Reporting tools like the [Filter Designer](#). The following is a list of available fields that can be included in Ad hoc reports that draw from Activity Registration data.

The name of an Ad hoc element is not necessarily the name listed in the user interface; therefore, the following tables briefly define and map Ad hoc elements to the appropriate interface locations/fields.

This article details the fields available for building Activity Registration filters. For other available fields, see the [Query Wizard](#) article.

Activity Roster Filter Fields

The following [Activity Roster](#) fields are available for creating queries with the filter **Data Type** of *Student*.

The screenshot shows the 'Filter Designer' interface. At the top, the title 'Filter Designer' is followed by a star icon. To the right, a breadcrumb navigation shows 'Reporting > Ad Hoc Reporting > Filter Designer'. The main area is titled 'Ad Hoc Filter Designer' and contains a brief description: 'This wizard will walk you through the creation of a new filter. Filters can be created using the Query wizard, selection editor or a pass-through SQL Query to a report.' On the left, a sidebar titled 'Saved Filter' lists various filter categories: Activity Registration, Attendance, Behavior, CRDC, Fees, Letter Filters, Scheduling, Scheduling Filters, School Store, and SI/Census. On the right, the 'Create New' section is visible. It includes 'Filter Type' radio buttons for 'Query Wizard' (selected), 'Selection Editor', and 'Pass-through SQL Query'. It also includes 'Data Type' radio buttons for 'Student' (selected), 'Census/Staff', and 'Course/Section'. A red arrow points to the 'Student' radio button in the 'Data Type' section.

Student > Activity Registration > Roster

Roster Data	Ad hoc Field Name
Person ID	actRegRoster.personID
