The Special Education State Reporting tool allows users to store and manage student Special Education state reporting data. The information recorded on this tool removes the legal burden of having a Special Ed team meeting to amend the setting for age-based changes, such as an early childhood student aging out.

A State Reporting record must be created whenever a student enters a new Special Education Setting. State Reporting records cannot overlap.

This tool consists of two sections: State Reporting and SPED Flags.

See the core [SPED State Reporting](#) article for information on necessary tool rights, SPED Flags functionality, and guidance on adding SPED State Reporting or Setting records.
