Tool Search: Enrollments

The Enrollment tool displays all occurrences of a student's enrollment in the district. Because this is an historical view, this list could be long.

By default, enrollments are first sorted by grade level and sorted by enrollment start date second. To reorder the list of enrollments, click the blue headers in the Enrollments Editor list. The list of enrollments can be sorted by Grade, Calendar, Start Date or End Date.

See the core [Enrollments](#) article for information on necessary tool rights, available Ad hoc fields, and guidance on adding and printing Enrollment records.

For more information, see this [Tool Rights](#) article.

## General Enrollment Information

Under General Enrollment Information, both the Start and End Status fields are unique to the state of Missouri. These fields are further described below. All other fields in General Enrollment Information do not require unique, state-specific data. However, many of these fields are required and data entry in these fields is necessary. For more information on these fields, see the [Enrollments](#) page.

## School Choice

Identifies a student is eligible, has been offered, applied for but was denied, or received School Choice. Children enrolled in a Title I school are eligible for school choice when their school is in the first and subsequent years of school improvement, corrective action, or restructuring. Any child attending such a school must be offered the option of transferring to a public school in the district not identified for school improvement, unless such an option is prohibited by state law. ESEA requires that in some circumstances priority in providing school choice be given to the lowest achieving children from low-income families.

This checkbox is used only for district-tracking purposes and is NOT used in state reporting. See School Choice in the [State Reporting Fields Section](#) for information on the collection of state-reported School Choice data.

Data entries made in the State Reporting Fields section of the Enrollments tab are unique to the state of Missouri and may directly affect the way students are reported to the state department of education.

Updates to State Reporting fields overwrite previously entered data. To preserve this historical information, create a new Enrollment record when changes are needed. Deleting an Enrollment record is NOT recommended.
