California - CALPADS SENR Upload Process (SIS-157256)

The CALPADS SENR Extract has been modified to allow the sending of new enrollments (add) and ended enrollments (update) in separate files.

A new Reporting Method option has been added. Choosing Traditional sends the add/update information in one file; choosing Transactional separates the Add and Update transactions into separate files. Replace transactions remain in one file.

An Update Based On field has also been added to the editor. This determines how enrollments are determined to be included - either by Modified Date or by Enrollment End Date.

Transactional Reporting Method works as follows:

- Add files are any enrollments that have a Start Date AFTER the Previous Submission Date and BEFORE OR EQUAL TO the Reporting Date.
- Update files are any enrollments with a Modified Date that is AFTER the Previous Submission Date and BEFORE OR EQUAL TO the Reporting Date, or any enrollments with an Enrollment End Date that is AFTER the Previous Submission Date and BEFORE OR EQUAL TO the Reporting Date.
