In the Campus.2231 Release, the option to update enrollments was added. With that option, enrollment start dates could be updated to the first instructional day of the calendar or to a date before the first instructional day.

Now, a new method has been added when updating enrollments that updates the Copies Forward enrollment attributes to match a previous year's values. An attribute is a particular data column in a database table that displays on an editor as a field, a checkbox, a date field, etc. This new method updates the attributes most often found in the State Reporting Enrollment editor, like Homeless, Immigrant, Resident District, etc.
