

Vaccine Mappings [.2243 and previous]

Last Modified on 10/31/2022 10:29 am CDT

You are viewing a previous version of this article. See [Vaccine Mappings](#) for the most current information.

Classic View: System Administration > Health > Vaccines

Search Terms: Vaccine Setup

Current Procedural Terminology (CPT) codes are used for billing of medical services while CVX codes are a numeric string used to identify the type of vaccine product. Vaccines in Campus are mapped to CPT and CVX codes for immunization importing and identification purposes. Below is a table listing the CPT/CVX code and the corresponding code used to identify the vaccine in Campus.

See the Centers for Disease Control and Prevention (CDC) website for the most up-to-date guidelines for [CPT Code Mapping to CVX Codes](#).

CPT/CVX Code	Campus Code
1	DTaP-DTP
2	OPV
