

Data Extract History

Last Modified on 10/21/2024 8:20 am CDT

Tool Search: Data Extract History

The Data Extract History tool lists the available extracts that were run and whether it successfully completed or if there was an issue with completion. This is a read-only view and can be used for troubleshooting.

Data Extract History ☆
System Settings > Data Utilities > Data Extract History

Data Extracts	
Extract Instance Name	Delivery Mode
Example extract	PULL
extract example 1	PULL
SMB Testing	SMB
test	SMB

Data Extract History Log				
Start Time	End Time	Result	Server	Error Description
2024-06-03 13:56:03.617	2024-06-03 13:56:06.49	Fail	b9909092-app001	Error transmitting extract: Invalid object name 'campusMaster.dbo.ConfigProfile'.
2024-06-03 13:55:20.44	2024-06-03 13:55:23.32	Fail	b9909092-app001	Error transmitting extract: Invalid object name 'certDB.dbo.KeyStore'.
