

# Terminal Installation and Configuration

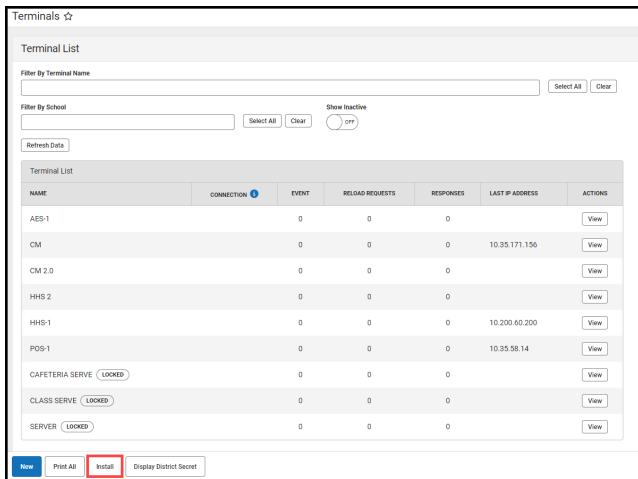

Last Modified on 01/12/2026 4:07 pm CST

**Note:** Terminal applications will close daily at 2:00 am to allow all terminals to receive necessary updates.

What can I do?	What do I need to know?
<ul style="list-style-type: none"> <li><a href="#">Install a POS Terminal</a></li> <li><a href="#">Set Terminal Options</a></li> </ul>	<ul style="list-style-type: none"> <li><a href="#">POS Terminal Admin Field Descriptions</a></li> <li><a href="#">Find the POS Version on Your Terminal</a></li> <li><a href="#">Laptop and Tablet Display Settings</a></li> </ul>

## Install a POS Terminal

1. Navigate to your Infinite Campus logon page and copy the URL for use in the **Campus Login URL** field on the POS Terminal Admin. The POS Terminal Admin will be available after you complete the terminal installation steps.
2. Log onto Campus and navigate to [Food Service > Administration > Terminals](#).
3. Click the **Install** button.

**Result:** Campus downloads the *Campus Point of Sale Setup 2.x.x* file to your terminal.

4. Open the *Campus Point of Sale Setup 2.x.x.exe* file.

**Result:** The POS Terminal Admin screen displays.

If a "Windows protected your PC" message displays, click *More Info > Run Anyway*.  
If a Windows Defender Firewall message displays, click the *Allow Access* button.  
You may need to allow POS to run with other firewall or anti-virus software.

## Silent Install

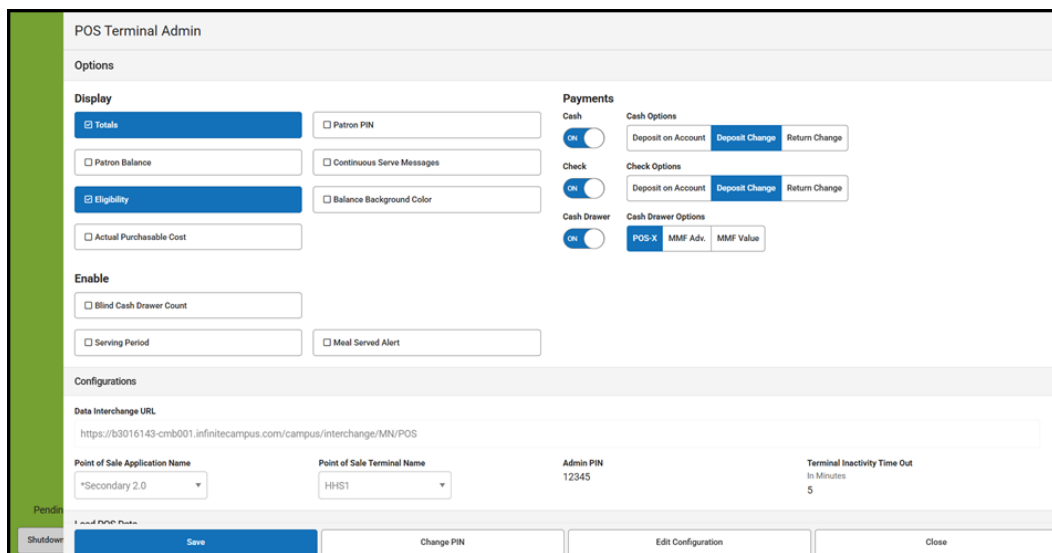

1. Districts wanting to perform a silent install may add ""/S" to the .exe. file in Command Prompt. This will bypass all prompts, pop-ups and error messaging so they can mass install terminals.

2. Terminal options need to be set for each terminal by opening the Point of Sale software.

## Terminal Options

If a drawer <i>is</i> attached, the drawer will not automatically open when processing cash transactions.</p>

## Configurations

Field	Description
<b>Campus Login URL</b>	In this field, paste the Campus application URL that you copied in step 1 of the Install a POS 2.0 Terminal instructions then click the <b>Verify</b> button.

Field	Description
<b>District Secret</b>	<p>The District Secret authorizes the terminal to pull data from Campus. You can find and copy the District Secret from <b>Display District Secret</b> button in Food Service &gt; Administration &gt; Terminals.</p>  <p><i>District Secret</i></p>
<b>Data Interchange URL</b>	<p>This is the URL used to communicate DIS messages between the POS terminal and the Campus application server. This field is read-only.</p>
<b>Point of Sale Application Name</b>	<p>The POS application is the set of purchasable items and service layouts set up for use on the terminal. In Campus, this is located in the Application Manager tool.</p> <div> <p>Application names with some special characters will cause a warning message. These include:</p> <ul style="list-style-type: none"> <li>• %</li> <li>• / (Forward slash)</li> <li>• I am running a few minutes late; my previous meeting is running over. (Back slash)</li> <li>• #</li> <li>• ?</li> </ul> <p>Rename the application in <i>Point of Sale &gt; Administration &gt; Application Manager</i> and re-select it on the terminal configurations.</p> </div>
<b>Point of Sale Terminal Name</b>	<p>The terminal name the district has assigned to the POS. In Campus, this is located in the Terminals tool.</p>

Field	Description
<b>Admin PIN</b>	<p>This is the PIN necessary for the POS Admin to (re)load POS data, make changes to POS options and review read-only POS configuration data in the POS Terminal Admin. The Admin PIN is different from the Windows application user password.</p> <p>Before you set up the Admin PIN for the first time, fill in the Configurations fields and click <b>Save</b>. If you try to set up the Admin PIN before saving your configuration, an error message will display on the Set Admin PIN screen.</p> <p>Click the <b>Change PIN</b> button at the bottom of the POS Terminal Admin screen to create or change the Admin PIN.</p>  <p><i>Change PIN.</i></p>
<b>Terminal Inactivity Time Out</b>	<p>Determines when the POS terminal will automatically log out after remaining inactive for the set time. Time can be set to a minimum of three minutes and a maximum of 90 minutes.</p>

## Load POS Data

Field	Description
<b>Data and Pictures</b>	Loads patron/menu data and patron pictures.
<b>Data Only</b>	Only loads patron/menu data.
<b>Pictures Only</b>	Only loads patron pictures.

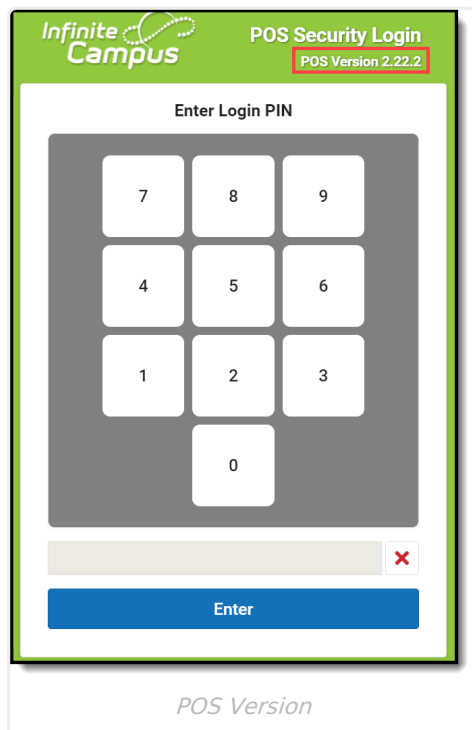

## Miscellaneous

Field	Description
<b>View Licensing Info.</b>	Displays information related to the software incorporated by the POS system.
<b>Export Support File</b>	Exports a POS error message log file for Campus Support to troubleshoot terminal database, messaging, or log failures that occur.  The Export Support File tool should only be used in coordination with an Infinite Campus Support Representative.

## Find the POS Version on Your Terminal

To find out which version of Point of Sale your terminal is running, open the Campus Point of Sale tool. The version of Point of Sale that your terminal is running displays in the upper right-hand corner of the login screen.

If you recently re-installed the terminal, the version number will update after you close and re-open the Campus Point of Sale tool.

## Laptop and Tablet Display Settings

POS 2.0 was developed with a responsive design. Because of that, POS 2.0 can be used on a standard touch screen terminal, a laptop, a Windows 10 tablet such as a Surface Pro and a Windows 10 8" tablet such as the POS-X Ion tablet.

We recommend using the following display settings on these types of terminals. Be sure to validate the application is the correct size on your terminal.

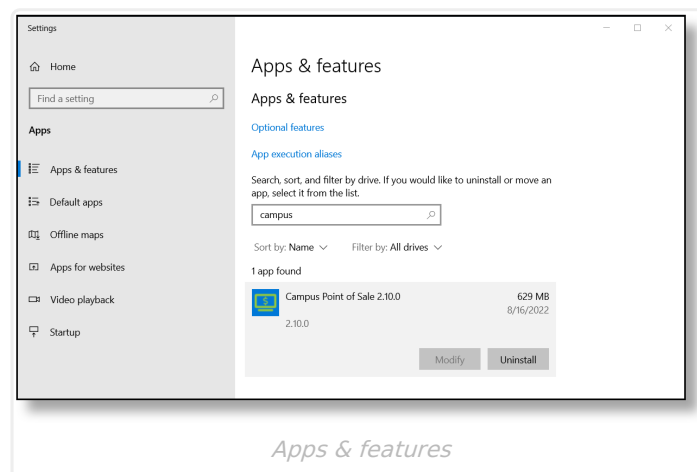

Terminal	Recommended Display Settings
Surface Pro	<ul style="list-style-type: none"> <li>Change the size of text, apps, and other items = 100%</li> <li>Resolution = 1024 X 768</li> </ul>
POS-X Ion Tablet	<ul style="list-style-type: none"> <li>Change the size of text, apps, and their items = 100%</li> <li>Resolution = 1280 X 800</li> </ul> <p>If POS 2.0 does not display correctly on your terminal, you can shrink the size of this page using the Ctrl - feature from the Windows virtual keyboard.</p>

## Uninstalling the Terminal

Point of Sale terminal requires the application and the related terminal data. Terminal data is stored in a separate directory and is managed separately.

The terminal software may be uninstalled and then re-installed on the terminal if needed.

### Option 1: Uninstall using the Apps & features option in Windows Settings.

### Option 2: Uninstaller Application

The uninstaller can be found in the installed folder. The default location is C:\Users\\AppData\Local\Programs\POS

*Uninstaller Application*

## Removing Point of Sale Data

Point of Sale/Terminal data should only be removed if the terminal is being decommissioned and will not be used for Campus Food Service or if recommended by Campus Support.

Terminal data includes the database of transactions processed on the terminal, student photos, and messaging queues. This data is stored in a top level directory on the hard drive. Uninstalling the software does not affect these files. If a terminal is being decommissioned, this folder should be deleted.

*Remove Point of Sale Data*
