Search in New Look of Infinite Campus Updated to Reinforce Reliability (SIS-159598)
[Enhancement]

The underlying technology used for performing searches within the New Look of Infinite Campus has been changed. This change was needed to ensure users are given a consistent and reliable experience. This change also impacts the student and staff locator search tools for customers who are not self-hosted.

The overall user experience has remained largely the same with the following differences:

- Search results are now sorted alphanumerically instead of best match.
- Instead of synonyms, person-related searches use strict name matching with the exception of advanced fuzzy searches which use nysiis phonetics. This applies to the new look as well as the student and staff locators in both the classic view and new look.
- Users must now hit the search button in order for results to appear.
- Users can no longer do opened ended/no criteria searching. You must enter search criteria when search Person, Household, Address, and Course Master.
- Instead of unlimited search results, the number of results is based on the district-defined system preference.
