Tool Search: SWARM

SWARM (**S**ocial **W**orker **A**ctivity and **R**eferral **M**odule) is a fully integrated social worker activity and referral module within Campus. Districts can use SWARM to track teacher concerns, social worker referrals, case notes, activities, group work, and more. Concerns can be sent electronically to social workers who can then decide if a referral is needed. Activities for individual students, groups, and/or staff members can also be recorded. Social Workers can easily monitor a student's social worker data using the Student Overview. Plus, all this data rolls up for Georgia state reporting.

SWARM is a tool developed by a Campus partner.
