

# Course Grade Calc Options - Video

Last Modified on 12/14/2025 8:45 pm CST

The Course Grade Calc Options tool is used to configure how each standard and grading task on a course is calculated. This course uses a course with both grading tasks and standards aligned to it as an example of how grade calc options might be used.

The **Campus.2251** release added icons and an icon legend to indicate which items are locked at the Course Master level, unlocked at the Course Catalog level, no longer linked to a Course Master, or managed at the Course level.
