The Attendance Code reports a list of attendance codes that exist at the school level for labeling a student's attendance record.

Best Practices

- For a normal suspension code which excludes a student from class for the day without excluding them from the BEDS/SAMS report, set up the local code with a Status/Excuse of Absent/Exempt. This affects the student's instructional time in Staff Student Course, while not counting as an absence on Student Daily Attendance or SAMS/BEDS.
- Separate codes ought to be set up with the appropriate Status/Excuse for students who are absent or tardy when serving a suspension in order to correctly capture the data across the

various reports that consider attendance.

Reporting Logic

This extract reports all Attendance Codes located in System Administration > Attendance > Attendance Codes.

If multiple calendars are selected within the extract editor, the respective output files report sequentially so that identical codes like *Snow Day* report separately for each institution.

If any attendance code in the Attendance Codes table is mapped to a State Code of OSS or ISS, a separate State Code record reports in addition to the Attendance Code record.

State Code records report only once per distinct code per district, no matter how many Attendance Codes are set up with the same State Code mapping.

Extract Editor Field Descriptions

Field	d Description			
Extract Type	The SIRS Extract to be run.			
Format	The Format in which the report should generate. Options are State Format (CSV) and HTML. Use State Format for reporting information to the state and the other types for data review and verification.			
Column Headers	Indicates whether Column Headers should be included in the report. This dropdown list applies to State Format (CSV).			
Generate Extract/ Submit to Batch	Users have the option of submitting a report request to the batch queue by clicking Submit to Batch instead of immediately generating the report by clicking Generate Extract . The batch process allows larger reports to generate in the background without disrupting the use of Campus. For more information about submitting a report to the batch queue, see the <u>Batch Queue</u> article.			
Select Calendars	Identifies which Calendar(s) should be included in the report. Calendars can be sorted by active year, by school or by year.
