Progress by Course (Insights)

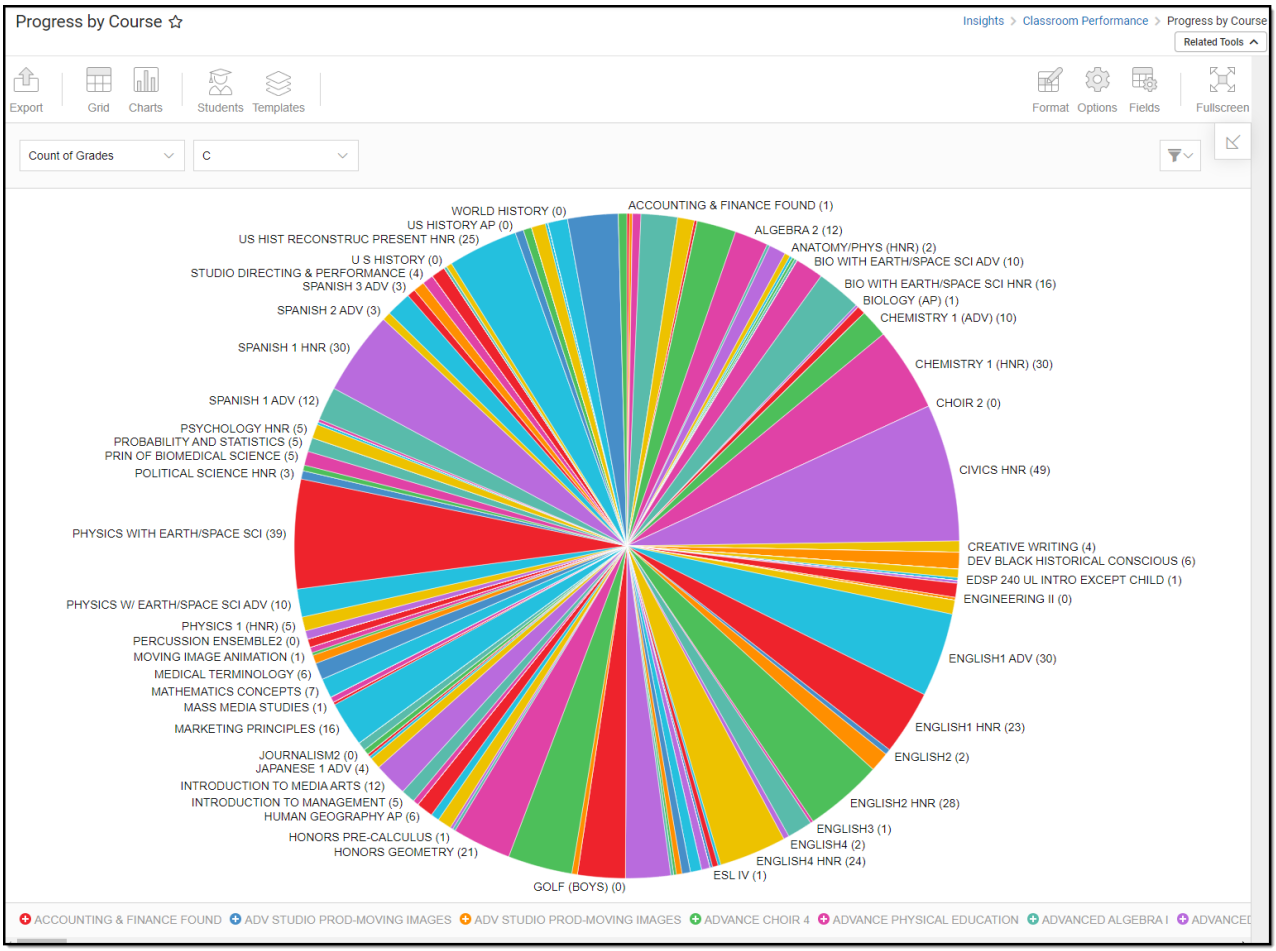

Last Modified on 10/28/2026 8:34 am CDT

This report is available with Campus Analytics Suite.

Tool Search: Progress by Course

Progress by Course counts the number of students receiving a specific grade score or the number of scores assigned, sorted by Course Name. This chart helps users identify specific classes students excel in or struggle with, allowing for potential in-classroom assistance opportunities or cross-training.

Only students with an Early Warning Curriculum score between 50 and 100 are included in the chart.

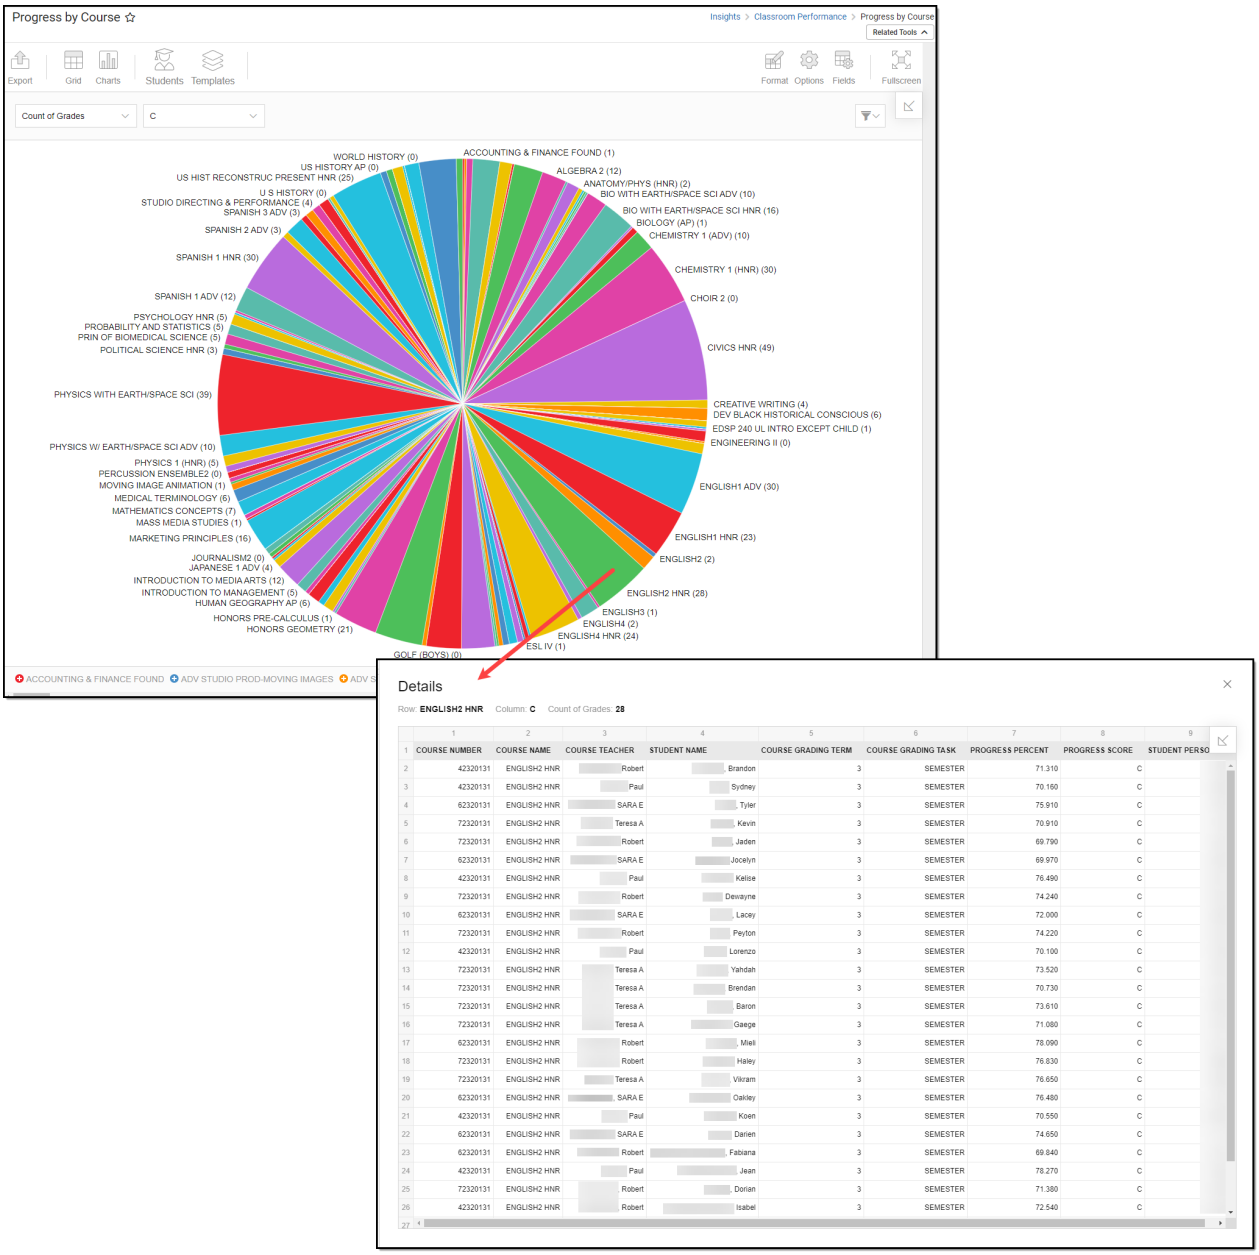

You must have at least **Read** tool rights for **Progress by Course** to view the report. You must also have calendar rights assigned for any calendar(s) reporting data.

NOTE: Insights visualizations may contain PII and include data for tools a user may not have rights to access.

Understanding the Chart

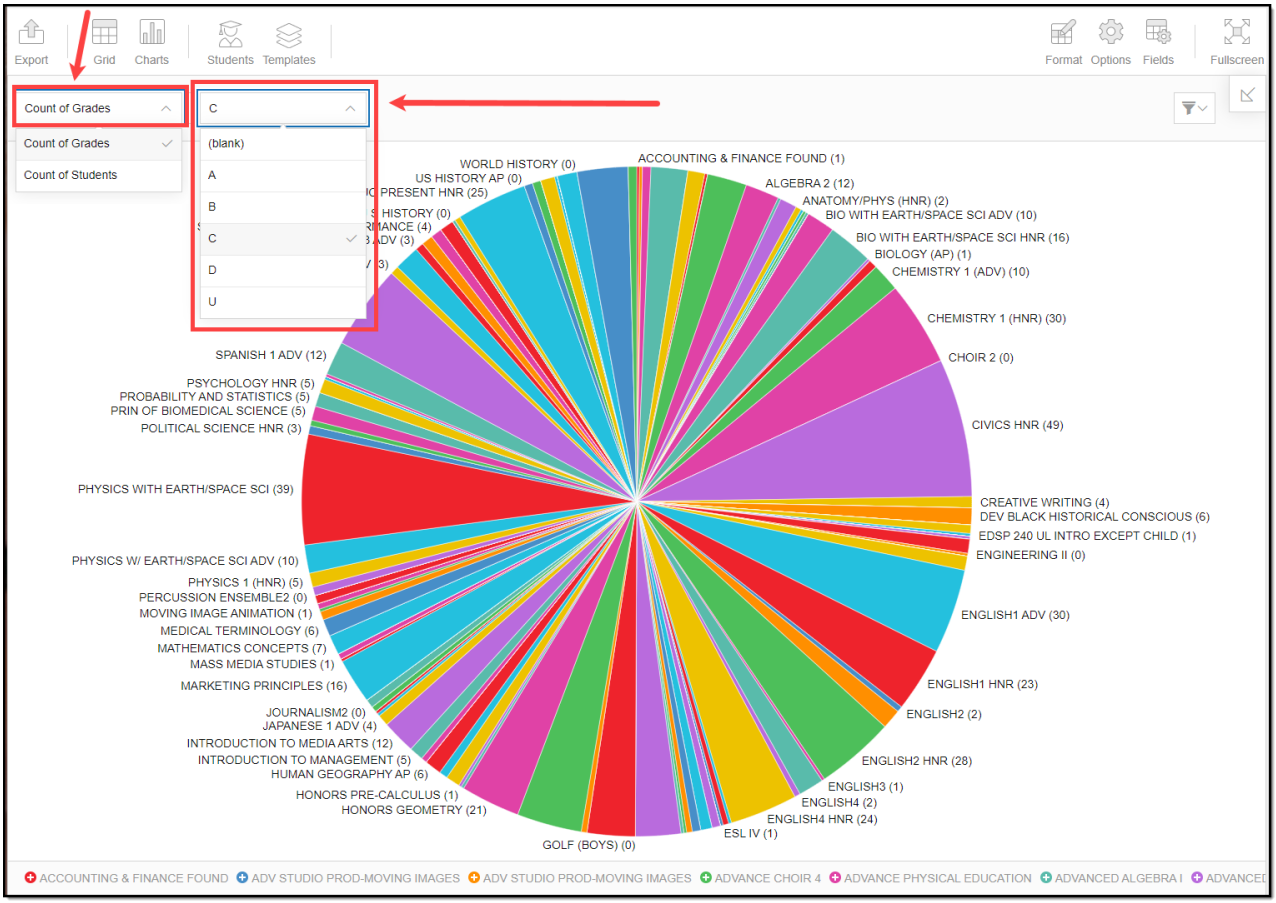

Each slice of the pie chart visualizes how many students received a specific score or the number of scores assigned in each course within the school. Double-clicking a slice of the pie chart will show you a table detailing all the data that makes up that slice.

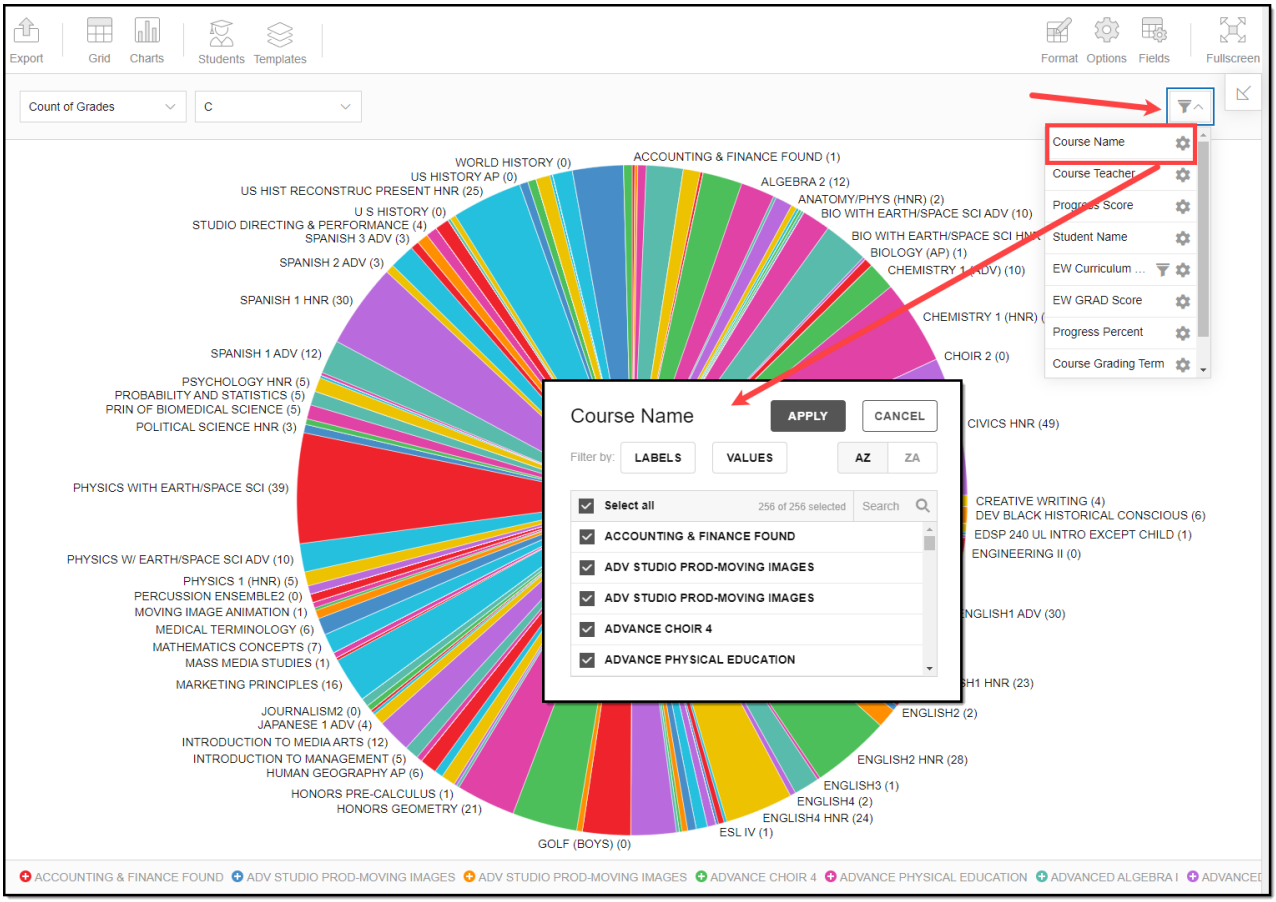

Use the table below for help in understanding each sub-report column:

Column	Description
Course Number	The course number of the selected bar.
Course Name	The course name of the selected bar
Course Teacher	The name of the teacher for the course selected.
Student Name	The name of the student who received the score associated with the section of the bar selected.
Course Grading Term	The reporting course grading term.
Course Grading Task	The reporting course grading task.
Progress Percent	Indicates the student's percent of progress in the course.
Progress Score	Indicates the student's progress score for the course.
Student Person ID	The student's person ID.

You can filter the pie chart by Count of Grades or Count of Students and/or a specific in-progress grade via the dropdown lists in the image below.

You can also remove and filter any data that makes up the pie chart by clicking the button, selecting the type of data you wish to filter, and unchecking data you wish to remove from the chart.

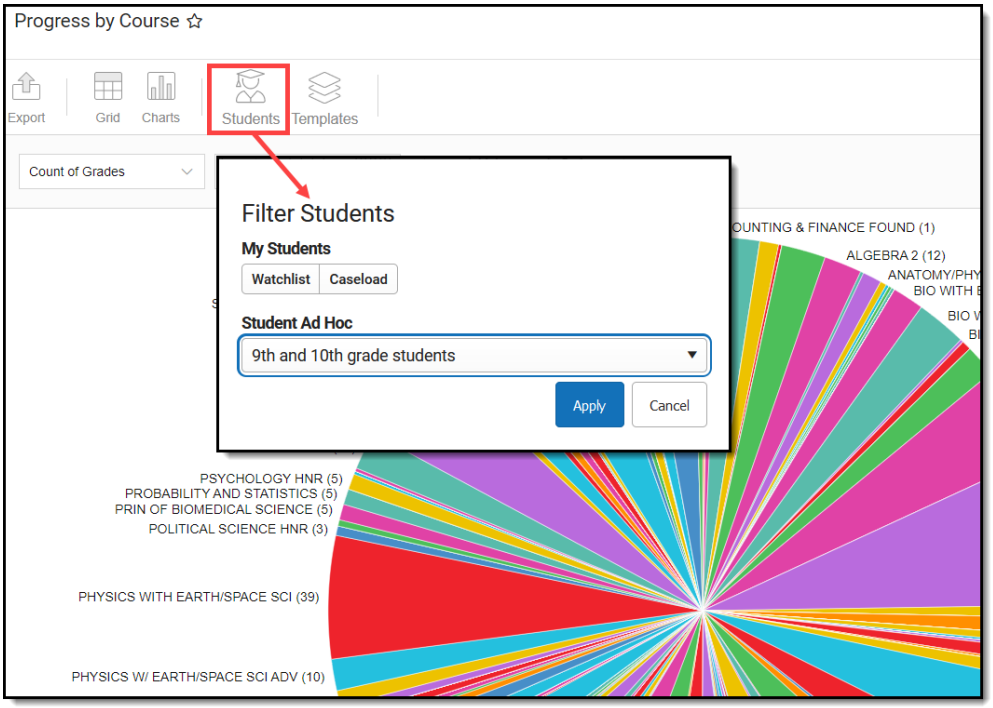

Filtering Chart Data

You can filter chart data to only students in your Early Warning Watchlist, Counseling Caseload, and/or a specific Student Ad Hoc filter by clicking the **Students** button and selecting any combination of these options.

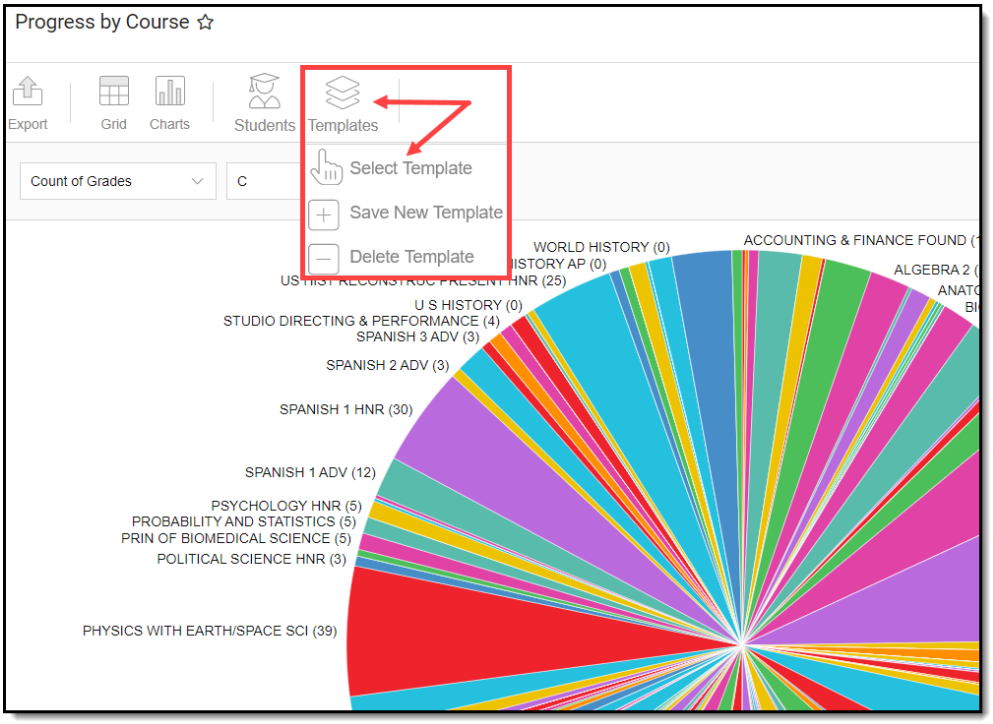

Ad Hoc Queries and Selection Editors are supported in Insights by filtering from the Student panel.

Pass-through SQL Queries are not supported in Insights.

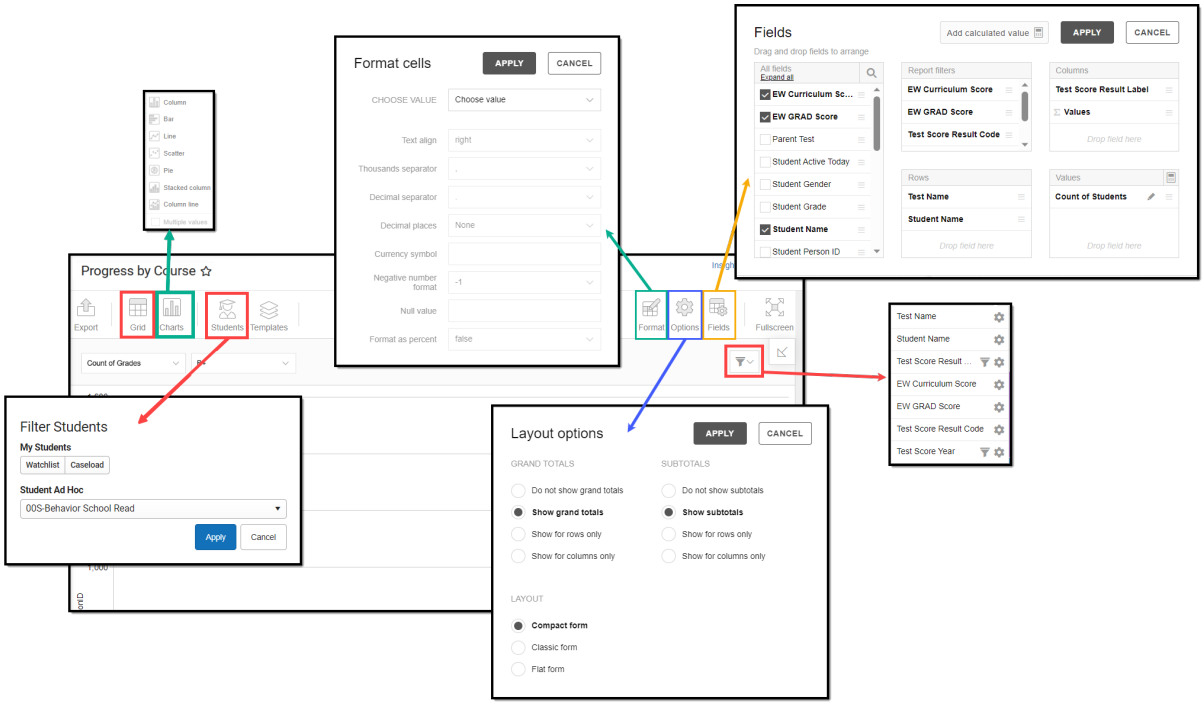

Creating Templates

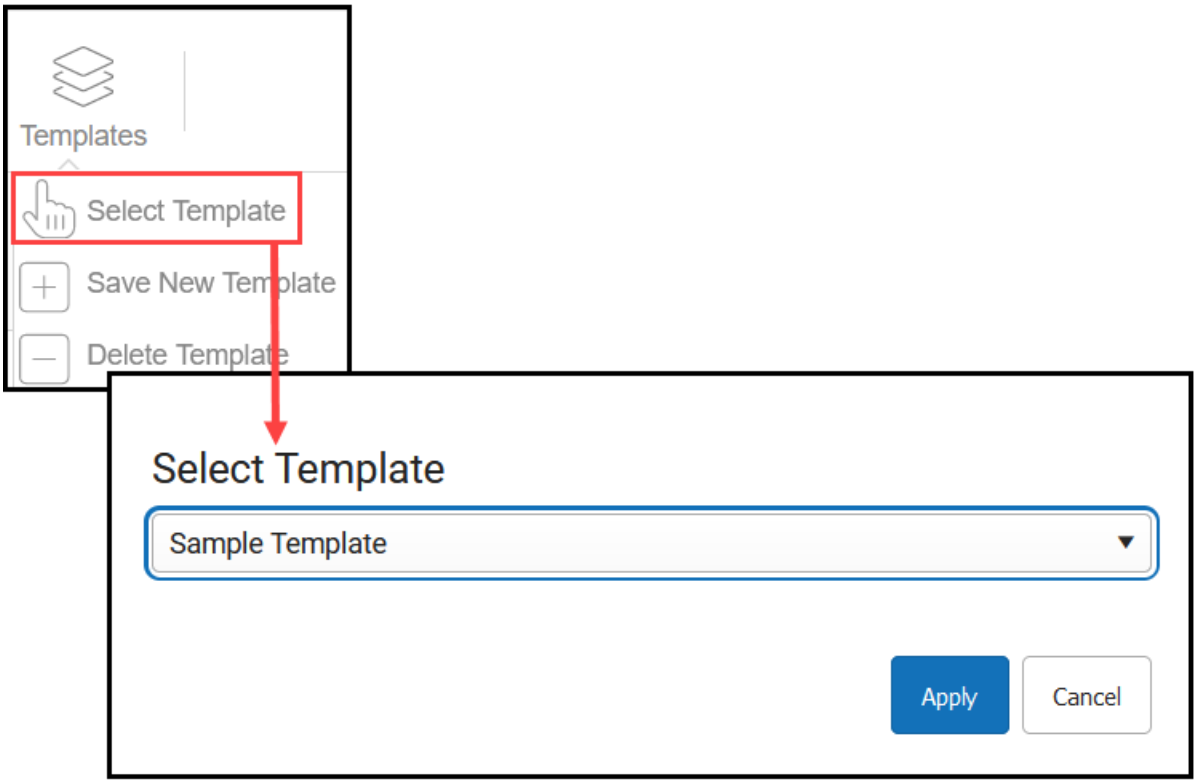

Templates allow you to save all filtering and formatting options you have set for a chart and have these options automatically applied each time you select a template. Templates are chart-specific, meaning they are only available and apply to the chart for which they were created.

For example, if you filter the chart data by Watchlist in the Student option (see section above) and modify any formatting and field options (any options shown below), all your selections can be saved as a template by clicking **Templates** and selecting **Save New Template**.

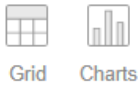

Once saved, each time you return to this chart you can automatically apply these options by clicking **Select Template**, choosing the template, and selecting **Apply**.

Additional Report Options

The table below provides additional information about the other on-screen options.

Option	Description
Grid and Chart 	Report data can be viewed in a grid or in other visualizations. See this article for more information.
Format 	Format options allow you to modify how cells represent data within the report. See this article for more information.
Options 	The Options menu gives you layout options for how you would like the table to be displayed (Layout), how grand totals are displayed in the table (Grade Totals), and how subtotals should be displayed (Subtotals). See this article for more information.
Export 	The report can be exported to a number of different formats by clicking the Export icon and selecting an option. See this article for more information.
Fields 	The Fields icon allows you to modify the order of the fields in the report, add or remove fields from the report table, and modify which fields are used in rows or columns. See this article for more information.
