Tool Search: Progress by Course

Progress by Course counts the number of students receiving a specific grade score or the number of scores assigned, sorted by Course Name. This chart helps users identify specific classes students excel in or struggle with, allowing for potential in-classroom assistance opportunities or cross-training.

Only students with an [Early Warning Curriculum score](#) between 50 and 100 are included in the chart.

This report is only available for districts that have purchased the Campus Analytics Suite.

You must have at least **Read** tool rights for **Progress by Course** to view the report. You must also have calendar rights assigned for any calendar(s) reporting data.

NOTE: Insights visualizations may contain PII and include data for tools a user may not have rights to access.

Understanding the Chart

Each slice of the pie chart visualizes how many students received a specific score or the number of scores assigned in each course within the school. Double-clicking a slice of the pie chart will show you a table detailing all the data that makes up that slice.

Use the table below for help in understanding each sub-report column:

Column	Description
Course Number	The course number of the selected bar.
Course Name	The course name of the selected bar
Course Teacher	The name of the teacher for the course selected.
Student Name	The name of the student who received the score associated with the section of the bar selected.
Course Grading Term	The reporting course grading term.
Course Grading Task	The reporting course grading task.
Progress Percent	Indicates the student's percent of progress in the course.
Progress Score	Indicates the student's progress score for the course.
Student Person ID	The student's person ID.

You can filter the pie chart by Count of Grades or Count of Students and/or a specific in-progress grade via the dropdown lists in the image below.

You can also remove and filter any data that makes up the pie chart by clicking the button, selecting the type of data you wish to filter, and unchecking data you wish to remove from the chart.

Filtering Chart Data

You can filter chart data to only students in your [Early Warning Watchlist](#), Counseling Caseload, and/or a specific [Student Ad Hoc](#) filter by clicking the **Students** button and selecting any combination of these options.

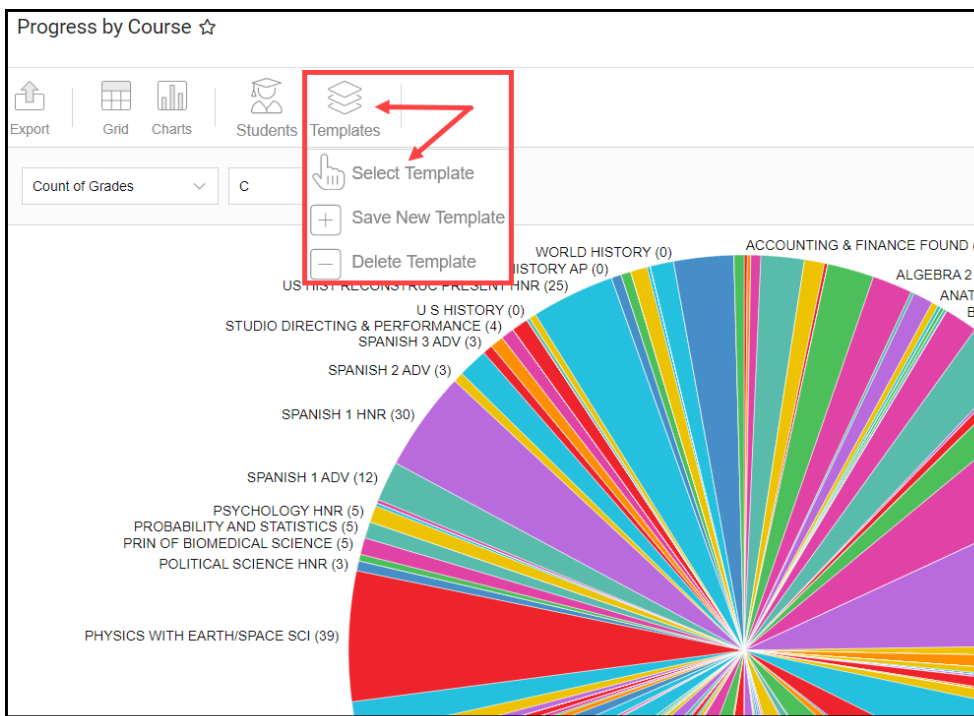

Ad Hoc Queries and Selection Editors are supported in Insights by filtering from the Student panel.

Pass-through SQL Queries are not supported in Insights.

Creating Templates

Templates allow you to save all filtering and formatting options you have set for a chart and have these options automatically applied each time you select a template. Templates are chart-specific, meaning they are only available and apply to the chart for which they were created.

For example, if you filter the chart data by Watchlist in the Student option (see section above) and modify any formatting and field options (any options shown below), all your selections can be saved as a template by clicking **Templates** and selecting **Save New Template**.

Once saved, each time you return to this chart you can automatically apply these options by clicking **Select Template**, choosing the template, and selecting **Apply**.

Additional Report Options

The table below directs you to additional information about the other on-screen options.

Option	Description
<p data-bbox="199 257 325 324">Grid and Chart</p> <div data-bbox="193 349 325 434">   </div> <p data-bbox="193 409 325 434">Grid Charts</p>	<p data-bbox="371 257 1209 286">Report data can be viewed in a grid or other visualization charts.</p> <p data-bbox="371 333 847 362">See this article for more information.</p>
