[Understanding the Chart](#) | [Filtering Chart Data](#) | [Creating Templates](#) | [Additional Report Options](#)

Tool Search: Posted by Student

The **Posted by Student** counts the number of courses in a particular marking period the student is receiving a particular grade score in or the number of scores assigned. This provides a student-level analytical view of Report Card data that is posted for students with an Early Warning Curriculum GRAD score between 50 and 100.

Only students with an [Early Warning Curriculum GRAD score](#) between 50 and 100 are included in the chart.

This report is only available for districts that have purchased the Campus Analytics Suite.

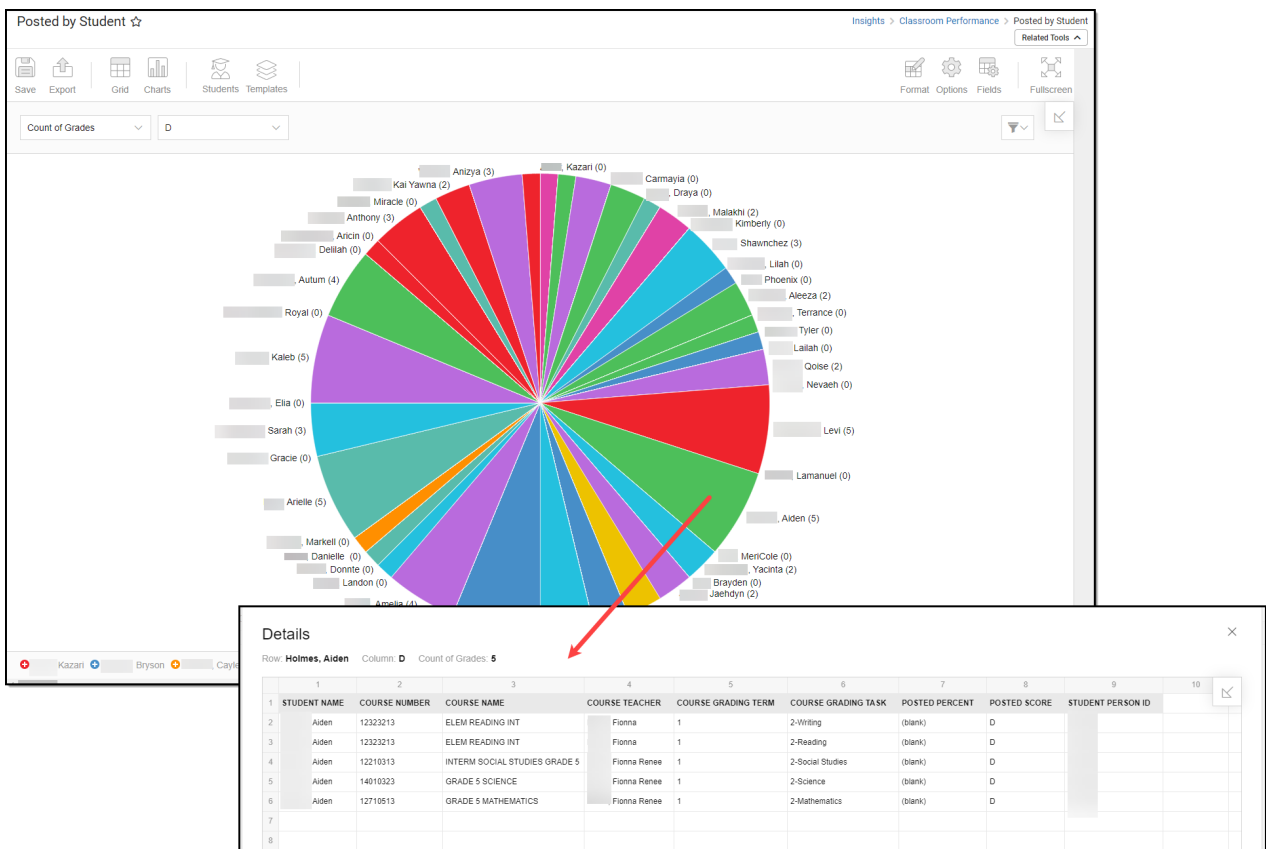

You must have at least **Read** tool rights for **Posted by Student** to view the report. You must also have calendar rights assigned for any calendar(s) reporting data.

NOTE: Insights visualizations may contain PII and include data for tools a user may not have rights to access.

Understanding the Chart

Each slice in the graph indicates the number of courses for which the specific student has received a specific posted grade or the number of scores assigned. This provides a quick and easy way to look for students with many low-scoring courses (the bigger the slice, the more courses the student has scored the selected value).

Double-clicking a slice will show you all of the data that makes up that slice.

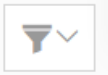

Use the table below for help in understanding each sub-report column:

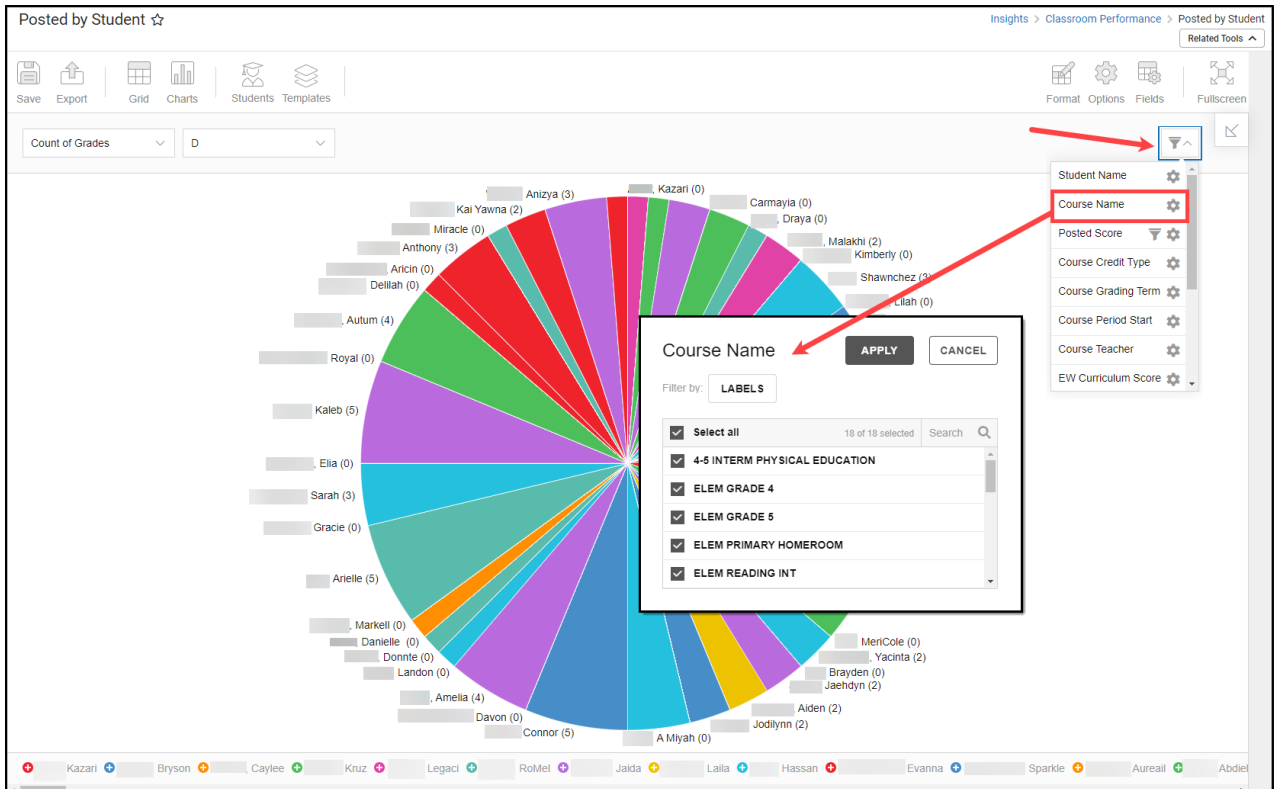

Column	Description
Student Name	The name of the student reporting data.
Course Number	The course number of the selected bar.
Course Name	The course name of the selected bar
Course Teacher	The name of the teacher for the course selected.
Student Name	The name of the student who received the score associated with the section of the bar selected.

Column	Description
Course Grading Term	The reporting course grading term.
Course Grading Task	The reporting course grading task.
Posted Percent	The student's posted grade percentage for the course.
Posted Score	The student's posted grade score for the course.
Student Person ID	The student's person ID.

You can filter the pie chart by Count of Grades or Count of Students and/or a specific posted grade via the dropdown lists in the image below.

You can remove and filter any data from the pie chart by clicking the  button, selecting the type of data you wish to filter, and unchecking data you wish to remove from the chart.

Filtering Chart Data

You can filter chart data to only students in your [Early Warning Watchlist](#), [Counseling Caseload](#), and/or a specific [Student Ad Hoc](#) filter by clicking the **Students** button and selecting any combination of these options.

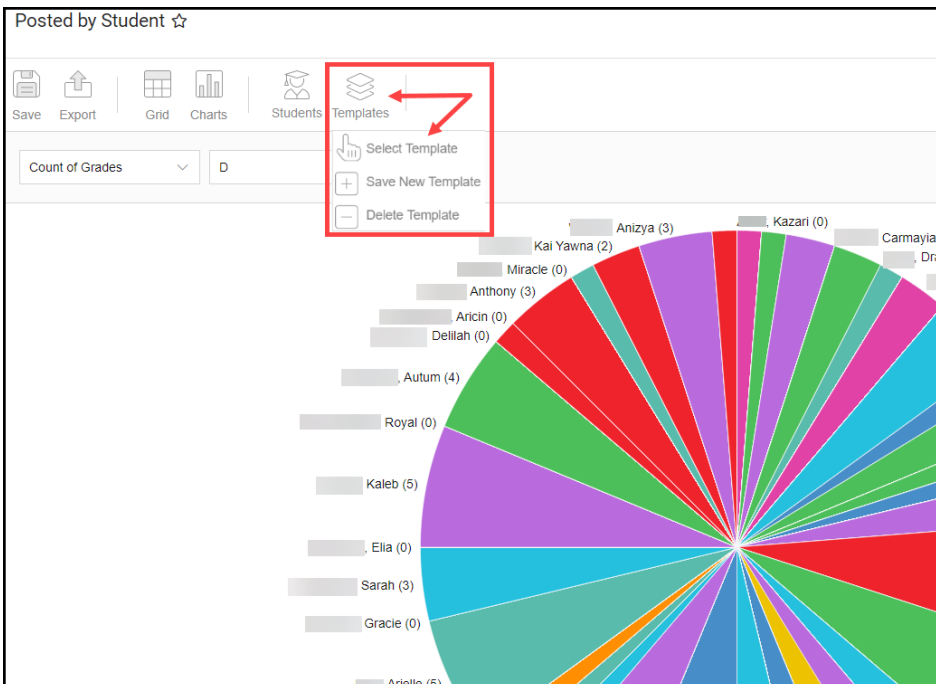

Ad Hoc Queries and Selection Editors are supported in Insights by filtering from the Student panel.

Pass-through SQL Queries are not supported in Insights.

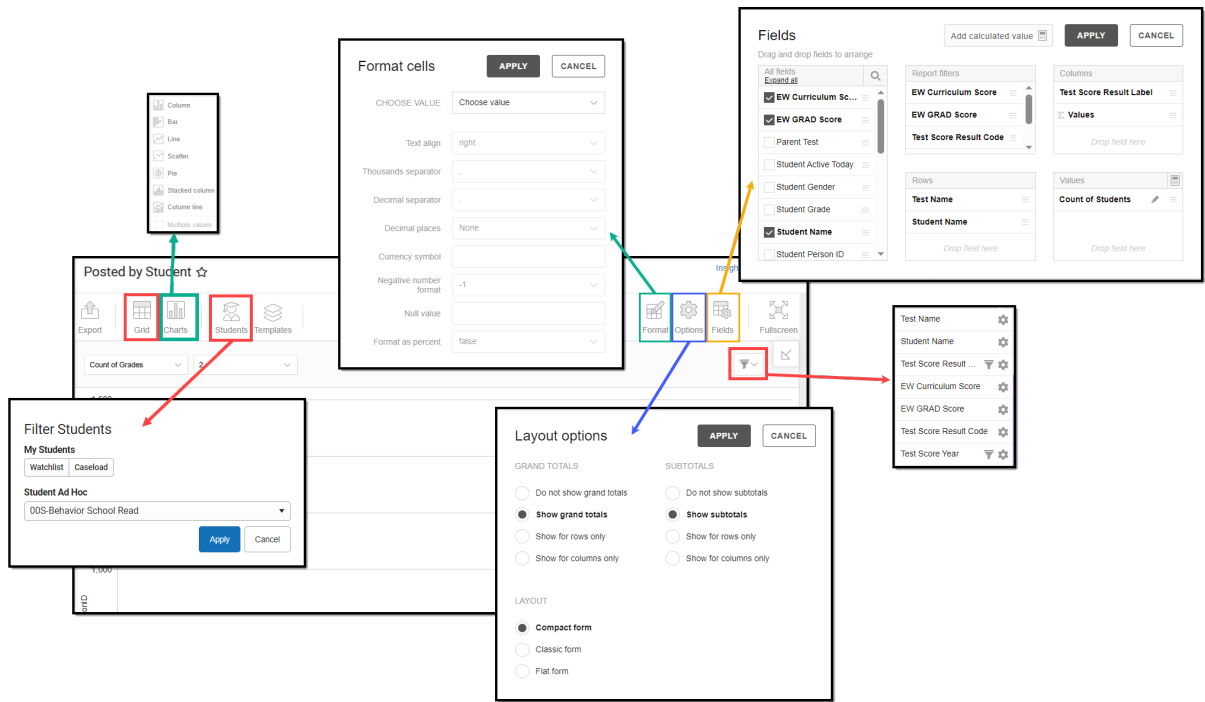

Creating Templates

Templates allow you to save all filtering and formatting options you have set for a chart and have these options automatically applied each time you select a template. Templates are chart-specific, meaning they are only available and apply to the chart for which they were created.

For example, if you filter the chart data by Watchlist in the Student option (see section above) and modify any formatting and field options (any options shown below), all your selections can be saved as a template by clicking **Templates** and selecting **Save New Template**.

Once saved, each time you return to this chart you can automatically apply these options by clicking **Select Template**, choosing the template, and selecting **Apply**.

Additional Report Options

The table below directs you to additional information about the other on-screen options.

Option	Description
<p data-bbox="209 257 336 324">Grid and Chart</p> <div data-bbox="197 349 336 439">   <p data-bbox="197 409 245 432">Grid</p> <p data-bbox="280 409 328 432">Charts</p> </div>	<p data-bbox="392 257 1230 286">Report data can be viewed in a grid or other visualization charts.</p> <p data-bbox="392 333 868 362">See this article for more information.</p>
