

Vaccine Exemptions [.2303 and previous]

Last Modified on 01/19/2023 1:27 pm CST

You are viewing a previous version of this article. See [Vaccine Exemptions](#) for the most current information.

Classic Path: [System Administration](#) > [Health](#) > [Vaccine](#)

Search Terms: [Vaccine Exemptions](#)

The Vaccine Exemption tool is used to enter vaccine exemptions - *i.e.*, the acceptable reasons for waiving an immunization requirement for a non-compliant student. The most common forms of vaccine exemptions include medical and religious waivers, though other exemptions may be created.

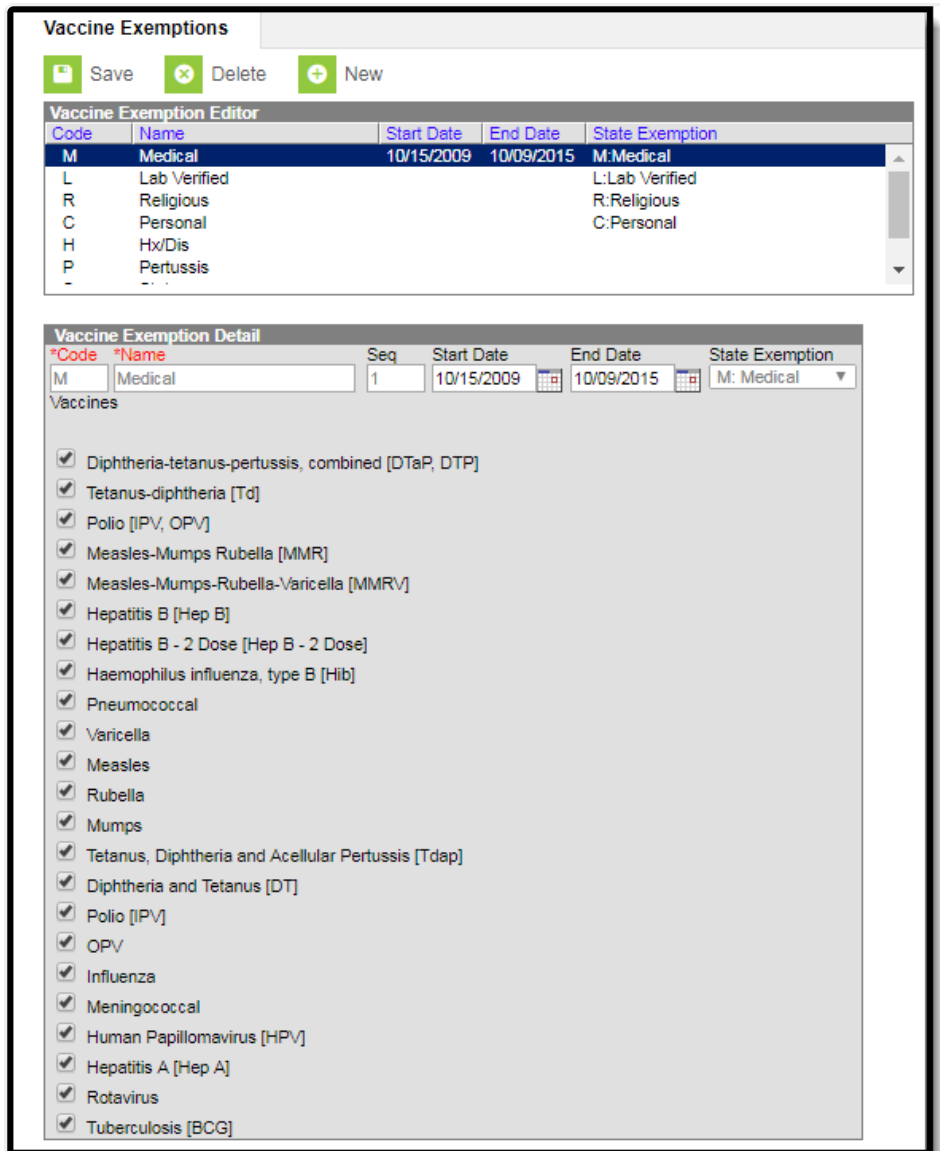

Image 1: Vaccine Exemption

A district may define its own exemptions; however, doing so may affect state reporting.

Exemptions will appear in health reports and on a student's [Immunizations](#) tool. Exemptions may be added to any existing vaccine. If the vaccine is not required, it does not need an exemption assigned to it.

Add New Exemptions

1. Select the **New** button from the action bar. The Vaccine Exemption Detail editor will display.

2. Enter a **Code** for the exemption.
3. Enter a **Name** for the exemption.
4. Enter a **Seq(ue)nce** to specify the order in which this exemption will appear in the list of exemptions. This is the order on the Vaccine Exemption editor and in the Waiver dropdown field of the student's Immunization tab.
5. Optional: Enter a **Start and End Date** for the exemption.
6. Flag the checkboxes of the vaccines for which the exemption may apply.
7. Click the **Save** button when finished.

If an end date has been entered for a vaccine exemption, that option will appear in **red** text if the exemption end date is past when [Entering a Vaccine Waiver](#) for a student. If a student already has a waiver assigned to them and an exemption end date is added and past, the name of the waiver and the date of the waiver display in **red** on the student's [Immunizations](#) tool.
