[Behavior Setup](#) | [Behavior Management](#)

The Behavior module provides tools for monitoring and recording behavior incidents, for creating letters for parents/guardians regarding student's behavior and for generating reports related to behavior.

Behavior Setup

[Event Types](#) | [Resolution Types](#) | [Response Types](#)

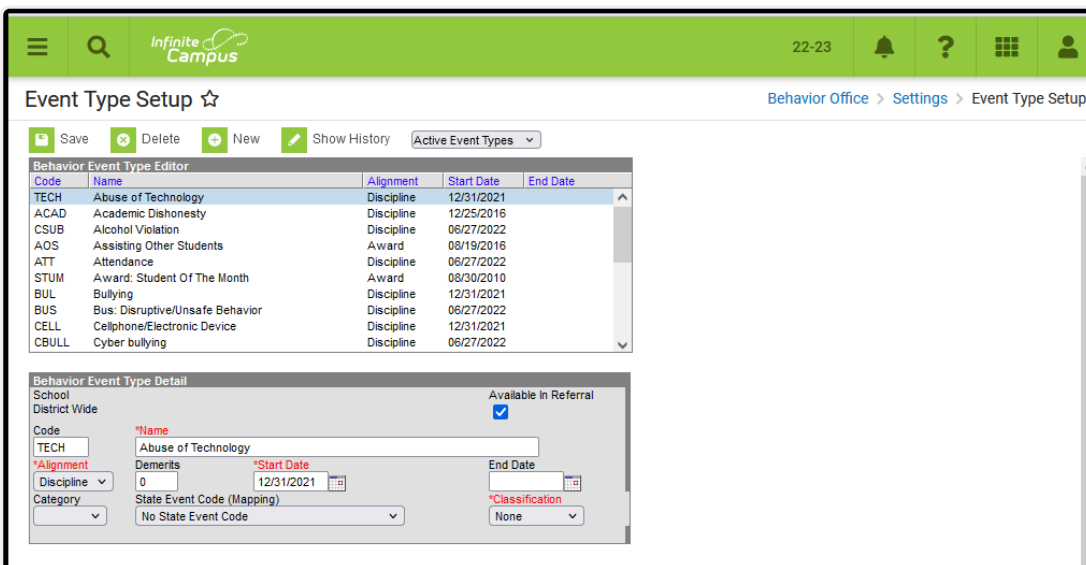

The Behavior Settings tools are used to set up behavior events/incidents, resolutions, and responses. For the most part, these settings apply to the entire district, but there are instances where an event, resolution or response may only apply to a particular school.

See the core [Event Types](#) and [Resolution Types](#) articles for information on creating this information.

State Event Code (Mapping)

State Event Codes indicate the reason a student was subject to a disciplinary action. These are the official state codes to which all district-defined behavior events/incidents should be mapped. Behavior events/incidents that are not mapped to a state event code do NOT report.

Classification of Event Types

When Event Types and Resolution Types have the **Classification** field to a value that is NOT None, additional fields display on the Event and Resolution Detail editors. For example, an Event Type that has a Classification of Weapon displays the Weapon Type and Weapon Description fields.

Event Types can have a Classification of Harassment, Drugs or Weapons. Event types with a State Event Code related to one of these should be marked accordingly.

The screenshot displays two overlapping windows from the Infinite Campus system. The left window, titled 'Event Type Setup', contains a table of event types. The table has columns for Code, Name, Alignment, Start Date, and End Date. The row with Code '1600' and Name 'Drugs' is highlighted. Below the table is a 'Behavior Event Type Detail' form with fields for Code (1600), Name (Drugs), Alignment (Discipline), Start Date (09/01/2022), End Date, Discipline (0), State Event Code (Mapping), and Classification (Drug). The right window, titled 'Participant(s) Details', shows a participant named 'Asher J Student'. It includes fields for Role (Offender), Demerits (0), Relationship to School (Current Student), Injury (No injury), and Injury Description. A 'Details' section is present, and a red box highlights the 'Drug Type' (09: Marijuana) and 'Drug Description' fields, which are only visible because the 'Drug' classification was selected in the event type setup.

Details: Student came to class today (he's missed many days). When he walked in, he was wearing a hat. I asked him to please remove it. He ignored me. I then walked over to him and asked him to please remove it. He replied that he would "rather not". I told him I was asking him politely a third time, and if he refused I'd need to send an email. He is still wearing his hat.
