Activity Registration

Manual Entry Inventory Limit Enhancement (SIS-151334) **[Enhancement]**

When a student was manually registered for an activity, there was no option to select which item the student is selecting to purchase. This would not reflect in the inventory limits of any purchase options created for the activity. To resolve this, a new drop-list will be displayed on the roster screen during the manual registration process to allow a customer to select an item for the student and lowering the inventory limit.

Identities Record - Tie Break Logic for Same Effective Date (SIS-165748)

When there is more than one identity record with the same effective date (either the same date as the current date/today or after the current date), tie break logic using the highest identityID determines which identity record is the current identity record.

This change applies to District Edition sites only to match the logic currently in place in State Edition.

Combine Person

ID History Displaying Incorrect End Date When Record was Modified via Combined Person Tool (SIS-66618)

When two students were combined via the Combine Person tool, the kept student's ID History was incorrectly displaying an End Date of the current date and time of the server instead of the time in which the two records were combined. To address this issue, a new End Date field has been added to the following ID History tables:

- dbo.studentNumberHistory
- dbo.StateIDHistory
- dbo.StaffNumberHistory
- dbo.StaffStateIDHistory
- dbo.edfiIDHistory
- dbo.otherIDHistory

This change ensures anytime the following fields are modified or records are inserted via Combine Person, the proper End Date value is applied:

- Local Student Number
- Student State ID
- Local Staff Number
- Staff State ID
- EdFi ID
- NASIS ID

To address existing records in each of these ID History tables, the following data conversion was done:

- dbo.studentNumberHistory
  - Use the existing logic that determines what the End Date value for the UI and write this same value -1 to dbo.studentNumberHistory.endDate
- dbo.StateIDHistory
  - Use the existing logic that determines what the End Date value for the UI and write this same value -1 to dbo.stateIDHistory.endDate
- dbo.StaffNumberHistory
  - Use the existing logic that determines what the End Date value for the UI and write this same value -1 to dbo.staffNumberHistory.endDate
- dbo.StaffStateIDHistory
  - Use the existing logic that determines what the End Date value for the UI and write this same value -1 to dbo.staffStateIDHistory.endDate
- dbo.edfiIDHistory
  - Use the existing logic that determines what the End Date value for the UI and write this same value -1 to dbo.edfiIDHistory.endDate
- dbo.otherIDHistory
  - Use the existing logic that determines what the End Date value for the UI and write this same value -1 to dbo.otherIDHistory.endDate

Digital Repository

Ability to Upload Health Documents to the Digital Repository Now Available (SIS-155720)
[Enhancement]

The ability to upload Health documents to the Campus Digital Repository has been added. Administrators can now enable the Documents button (which allows for upload of documents to CDR) for the following health-related tools:

- Conditions
- Daily Health Log
- Health Office Visits
- Immunizations
- Medications
- Screenings

The Digital Repository Data Usage Report has been updated to include Health and its related tools and the Repository Cleanup tool now includes Health objects when cleaning up Person documents.

In the Person Documents tool, when adding a new file, the dropdown list now includes the option to select the health tools mentioned in the bullets above.

Campus Digital Repository Usage Over 100% Warning Leading to Broken Link (SIS-166257)

Users exceeding the 1mb per student free allotment for Campus Digital Repository were receiving a warning message in their Process Inbox which when selected, lead to a broken link. This warning message was being generated off a deprecated preference value and is no longer relevant to how CDR usage is monitored and reported. To correct this issue, all backend logic tied to generating this outdated warning has been removed and users should no longer receive it, regardless of their CDR per student usage.

Early Warning

Early Warning – Updates to Insights Visualizations (SIS-166770) **[Enhancement]**

Updates were made to simplify and streamline sub-report data within many Insights visualizations. Each visualization now provides users with the ability to easily change visualized data by a Count of Grades or Count of Students. Sub-report data has been standardized across visualizations to report the same fields, making it easier to interpret this data. These updates apply to the following visualizations and their names have been updated as follows:

- Grade Analysis Report has been renamed to Percent Tier
- In-Progress Grades Summary by Course has been renamed to Progress by Course
- In-Progress Grades Summary by Student has been renamed to Progress by Student
- In-Progress Grades Summary by Teacher has been renamed to Progress by Teacher
- Posted Grades Summary by Course has been renamed to Posted by Course
- Posted Grades Summary by Student has been renamed to Posted by Student
- Posted Grades Summary by Teacher has been renamed to Posted by Teacher

eTranscript

eTranscript - Report Preferences, PESC XML Layout (SIS-153683) **[Enhancement]**

A State Seal Preference has been added to the eTranscript Report Preferences. When marked AND when the student has a State Seal record listed on their Graduation record, the State Seal information reports on the eTranscripts in the AcademicHonors node.

The PESC XML Layout has been modified to include Academic Completion Date (State Seal Date),

as well as an updated description of Honors Title to include State Seal information in the Academic Awards Sections.

Other items addressed:

- An issue with special characters in student names causing the eTranscript to be rejected when submitted to Parchment has been corrected.
- When the eTranscript option includes Report Comments, and the comment is longer than 80 characters, that comment reports in multiple 80-character Note Messages.

Infrastructure

Single Sign On (SSO) Using Wrong Binding Method for IDPs Providing Multiple Binding Types (SIS-165612)

Campus SSO logic was coded to first use an IDPs HTTP-POST binding if one is present and then only look for an HTTP-Redirect binding if the HTTP-POST binding is not found. This logic was causing Infinite Campus to use the wrong binding (when the IDP metadata provided both binding methods). To correct this issue, Campus SSO logic now defaults to use the HTTP-Redirect binding and only use HTTP-POST if HTTP-Redirect is not found.

New Look of Infinite Campus – Household Search Results Producing Error for Phone Numbers in Incorrect Format within Database (SIS-166643)

Within the New Look of Infinite Campus, users were receiving an error when performing a household search and search results contained a household with a phone number in an

unexpected format (such as including an extension or a blank area code). This issue was corrected and now phone numbers in the following formats will return results without error:

- 952-555-0062
- 952-555-0062x12341234
- (952)555-0062
- (952)555-0062x12341234

Arizona - CTE Reporting (SIS-156490)

A new process for reporting CTE information has been implemented. CTE data is now calculated through reported Ed-Fi resources. The following updates have been made:

- A new Section Student Detail tool is available on the Course Sections where a student's Career Readiness is tracked.
- A new CTE Batch Job for students in grades 9-12 has been added. Hours are only calculated for students who were scheduled into a courses where the Section Student Detail record has the Career Readiness field set to Yes.
- The Total CC CTE Credits field on the Enrollment record now allows for two digits before the decimal place and three digits after the decimal place (XX.XXX).

Arizona - 21st CCLC Extract - Start/End Dates, Attendance Issue (SIS-166653)

Logic for the following fields has been modified for the 21st CCLC Extract:

Dates of Class and Total Weeks to Date

- The start date and end date of the section now uses the roster dates of the students in the section, instead of the term start/end dates.
  - The start date is the oldest roster start date and the end date is the newest roster end date.
  - The number of weeks the course has been offered up to either the end date entered in the extract editor or the actual end date of the course also reports when the course end date is prior to the extract editor end date. When either date is not populated, the term date is used instead.
- For weeks, the number of weeks (Mon-Sun) is counted starting from the start date of the course through the end date that is entered in the extract editor or the course end date (when the course end date is prior to the extract editor end date).

Average Daily Attendance

This value counts the number of students who were present each day the section was offered from the start date of the section through the end date entered on the extract editor (or the end date of the section when it is before the extract editor date).

- A student is considered present when they have positive minutes recorded for the course on the given day.
- The start/end date of the section is determined by using the oldest roster start date and newest roster end date. When either date is not populated, the term dates are used instead.
- The counts for each day are summed, then divided by the number of days the section was offered from the start date of the section through the end date entered on the extract editor (or the end date of the section when it's earlier than the extract editor date). This value is then rounded down to the nearest whole number.

Wisconsin Special Ed Updates (SIS-160378)

Validation on two fields has been updated on the Eligibility Report, including:

- "If yes, list exclusionary factors present" from the Speech or Language Impairment Checklist on the Eligibility Determination editor is now required when the corresponding checkbox is marked as Yes.
- Section III Educational Performance on the Intellectual Disability Checklist on the Eligibility Determination editor. At least one of the Yes/No questions must be answered.

A pagination update has also been applied to several editors on all three evaluation types and two plan types. Now only 8 entries display per page so users don't have to scroll to see further entries.
