Search Terms: Digital Upload PreK Report

The Preschool Immunization Digital Upload is used to report student immunization compliance for each vaccine dose.

CO Digital Upload Pre-K Report

Report Logic

- The report aggregates a count of days between the student's birth date and immunization dose dates per vaccine.
- The report can be run against a district's active year as well as any prior year.
- Prior to running report: T

Page 2

- The City ID field located at System Administration > Resources > School must be populated.
- Users need to validate County and County number is accurate according to the State. This is located at System Admin > Resources > Counties. The counties in which the School(s) reside at System Administration > Resources > District Counties must also be populated.

Report Editor

Field	Description
County	The county in which the school resides.
Effective Date	The date the report will run. The field is auto-populated with the current date, but can be changed by using the calendar icon to select a date or entering a new date in *mmddyy* format.
Format	Selection determines whether the extract generates in the State Upload, CSV, or HTML format.
Calendar Selection	At least one calendar needs to be selected in order to generate the report. Calendars can be selected by the active year, by school name or by year.
Report Generation	The report can be generated immediately using the **Generate Report** button. Or, use the **Submit to Batch** button to select when the report is generated. See the Batch Queue article for more information on this functionality.

Generate the PreK Digital Upload Report

1. Select the **County** from the dropdown.
2. Enter the desired **Effective Date**.
3. Select the **Format** of the report.
4. Select the **Calendar(s)** from which to report information.
5. Click the **Generate Extract** button or use the **Submit to Batch** button. The report displays in the desired format.

Report Layout

Data Element	Description	Location
County Name	The name of the county selected in the report editor. *Alphanumeric*	System Administration > Resources > District Counties > Name dis.county

Data Element	Description	Location
School Code	The CDHS number. *Numeric*	System Administration > Resources > School > CDHS Code CDHScode
School Name	The school name. *Alphanumeric*	System Administration > Resources > School > Name sch.name
School Address	The address of the school. *Alphanumeric*	System Administration > Resources > School > Address sch.address
School City ID	The city ID of the school. *Alphanumeric*	System Administration > Resources > School > City ID sch.cityid
School County ID	The school county ID of the school. *Alphanumeric*	System Administration > Resources > District Counties > Number county.number
School Zip Code	The zip code of the school. *Numeric*	System Administration > Resources > School > Zip sch.zip
Date Created	The effective date selected in the report editor. *YYYY-MM-DD (space) HH:MM:SS*	Selected in report editor
Student ID	The student's State identification number. *Numeric*	Census > People > Demographics > Student State ID student.stateID
Grade	The student's grade level. *Alphanumeric*	Student > General > Enrollments > Grade student.grade

Data Element	Description	Location
DTaP 1 *immunization.code = DTap-DTP*	The number of days between the student's birthdate and the date of the first DTaP dose administered. *Numeric*	Student > Health > Immunizations; Census > People > Demographics > Birth Date Calculated value = immunization.doseDate1date minus student.birthdate
DTaP 2 *immunization.code = DTap-DTP*	The number of days between the student's birthdate and the date of the second DTaP dose administered. *Numeric*	Student > Health > Immunizations; Census > People > Demographics > Birth Date Calculated value = immunization.doseDate2date minus student.birthdate
DTaP 3 *immunization.code = DTap-DTP*	The number of days between the student's birthdate and the date of the third DTaP dose administered. *Numeric*	Student > Health > Immunizations; Census > People > Demographics > Birth Date Calculated value = immunization.doseDate3date minus student.birthdate
DTaP 4 *immunization.code = DTap-DTP*	The number of days between the student's birthdate and the date of the fourth DTaP dose administered. *Numeric*	Student > Health > Immunizations; Census > People > Demographics > Birth Date Calculated value = immunization.doseDate4date minus student.birthdate
DTaP 5 *immunization.code = DTap-DTP*	The number of days between the student's birthdate and the date of the fifth DTaP dose administered. *Numeric*	Student > Health > Immunizations; Census > People > Demographics > Birth Date Calculated value = immunization.doseDate5date minus student.birthdate

Data Element	Description	Location
DTaP 6 *immunization.code = DTap-DTP*	The number of days between the student's birthdate and the date of the sixth DTaP dose administered. *Numeric*	Student > Health > Immunizations; Census > People > Demographics > Birth Date Calculated value = immunization.doseDate6date minus student.birthdate
DTaP 7 *immunization.code = DTap-DTP*	The number of days between the student's birthdate and the date of the seventh DTaP dose administered. *Numeric*	Student > Health > Immunizations; Census > People > Demographics > Birth Date Calculated value = immunization.doseDate7date minus student.birthdate
DTaP 8 *immunization.code = DTap-DTP*	The number of days between the student's birthdate and the date of the eight DTaP dose administered. *Numeric*	Student > Health > Immunizations; Census > People > Demographics > Birth Date Calculated value = immunization.doseDate8date minus student.birthdate
DTaP 9 *immunization.code = DTap-DTP*	The number of days between the student's birthdate and the date of the ninth DTaP dose administered. *Numeric*	Student > Health > Immunizations; Census > People > Demographics > Birth Date Calculated value = immunization.doseDate9date minus student.birthdate
DTaP 10 *immunization.code = DTap-DTP*	The number of days between the student's birthdate and the date of the ninth DTaP dose administered. *Numeric*	Student > Health > Immunizations; Census > People > Demographics > Birth Date Calculated value = immunization.doseDate10date minus student.birthdate

Data Element	Description	Location
DTaP Exempt	The name of the exemption claimed for the DTaP vaccine. *Alphanumeric*	Student > Health > Immunizations If immCpl.exemption is not null and expired date <= effective date, the immCpl.stateexemption description reports (i.e. Personal, Religious, Medical, or Lab Verified). If immCpl.exemption is null, 'None' reports.
DTaP In Process	Reports 0 (zero). *Numeric*	N/A
Polio 1 *immunization.code = IPV, OPV, or IPV/OPV*	The number of days between the student's birthdate and the date of the first Polio dose administered. *Numeric*	Student > Health > Immunizations; Census > People > Demographics > Birth Date Calculated value = immunization.doseDate1date minus student.birthdate
Polio 2 *immunization.code = IPV, OPV, or IPV/OPV*	The number of days between the student's birthdate and the date of the second Polio dose administered. *Numeric*	Student > Health > Immunizations; Census > People > Demographics > Birth Date Calculated value = immunization.doseDate2date minus student.birthdate
Polio 3 *immunization.code = IPV, OPV, or IPV/OPV*	The number of days between the student's birthdate and the date of the third Polio dose administered. *Numeric*	Student > Health > Immunizations; Census > People > Demographics > Birth Date Calculated value = immunization.doseDate3date minus student.birthdate

Data Element	Description	Location
Polio 4 *immunization.code = IPV, OPV, or IPV/OPV*	The number of days between the student's birthdate and the date of the fourth Polio dose administered. *Numeric*	Student > Health > Immunizations; Census > People > Demographics > Birth Date Calculated value = immunization.doseDate4date minus student.birthdate
Polio 5 *immunization.code = IPV, OPV, or IPV/OPV*	The number of days between the student's birthdate and the date of the fifth Polio dose administered. *Numeric*	Student > Health > Immunizations; Census > People > Demographics > Birth Date Calculated value = immunization.doseDate5date minus student.birthdate
Polio 6 *immunization.code = IPV, OPV, or IPV/OPV*	The number of days between the student's birthdate and the date of the sixth Polio dose administered. *Numeric*	Student > Health > Immunizations; Census > People > Demographics > Birth Date Calculated value = immunization.doseDate6date minus student.birthdate
Polio 7 *immunization.code = IPV, OPV, or IPV/OPV*	The number of days between the student's birthdate and the date of the seventh Polio dose administered. *Numeric*	Student > Health > Immunizations; Census > People > Demographics > Birth Date Calculated value = immunization.doseDate7date minus student.birthdate
Polio 8 *immunization.code = IPV, OPV, or IPV/OPV*	The number of days between the student's birthdate and the date of the eighth Polio dose administered. *Numeric*	Student > Health > Immunizations; Census > People > Demographics > Birth Date Calculated value = immunization.doseDate8date minus student.birthdate

Data Element	Description	Location
Polio 9 *immunization.code = IPV, OPV, or IPV/OPV*	The number of days between the student's birthdate and the date of the ninth Polio dose administered. *Numeric*	Student > Health > Immunizations; Census > People > Demographics > Birth Date Calculated value = immunization.doseDate9date minus student.birthdate
Polio 10 *immunization.code = IPV, OPV, or IPV/OPV*	The number of days between the student's birthdate and the date of the tenth Polio dose administered. *Numeric*	Student > Health > Immunizations; Census > People > Demographics > Birth Date Calculated value = immunization.doseDate10date minus student.birthdate
Polio Exempt	The name of the exemption claimed for the Polio vaccine. *Alphanumeric*	Student > Health > Immunizations If immCpl.exemption is not null and expired date <= effective date, the immCpl.stateexemption description reports (i.e. Personal, Religious, Medical, or Lab Verified). If immCpl.exemption is null, 'None' reports. If the student is over 18 years old, "Aged Out" reports.
Polio In Process	Reports 0 (zero). *Numeric*	N/A
MMR 1 *immunization.code = MMR or MMRV*	The number of days between the student's birthdate and the date of the first MMR dose administered. *Numeric*	Student > Health > Immunizations; Census > People > Demographics > Birth Date Calculated value = immunization.doseDate1date minus student.birthdate

Data Element	Description	Location
MMR 2 *immunization.code = MMR or MMRV*	The number of days between the student's birthdate and the date of the second MMR dose administered. *Numeric*	Student > Health > Immunizations; Census > People > Demographics > Birth Date Calculated value = immunization.doseDate2date minus student.birthdate
MMR 3 *immunization.code = MMR or MMRV*	The number of days between the student's birthdate and the date of the third MMR dose administered. *Numeric*	Student > Health > Immunizations; Census > People > Demographics > Birth Date Calculated value = immunization.doseDate3date minus student.birthdate
MMR 4 *immunization.code = MMR or MMRV*	The number of days between the student's birthdate and the date of the fourthMMR dose administered. *Numeric*	Student > Health > Immunizations; Census > People > Demographics > Birth Date Calculated value = immunization.doseDate4date minus student.birthdate
MMR 5 *immunization.code = MMR or MMRV*	The number of days between the student's birthdate and the date of the fifth MMR dose administered. *Numeric*	Student > Health > Immunizations; Census > People > Demographics > Birth Date Calculated value = immunization.doseDate5date minus student.birthdate
MMR 6 *immunization.code = MMR or MMRV*	The number of days between the student's birthdate and the date of the sixth MMR dose administered. *Numeric*	Student > Health > Immunizations; Census > People > Demographics > Birth Date Calculated value = immunization.doseDate6date minus student.birthdate

Data Element	Description	Location
MMR 7 *immunization.code = MMR or MMRV*	The number of days between the student's birthdate and the date of the seventh MMR dose administered. *Numeric*	Student > Health > Immunizations; Census > People > Demographics > Birth Date Calculated value = immunization.doseDate7date minus student.birthdate
MMR 8 *immunization.code = MMR or MMRV*	The number of days between the student's birthdate and the date of the eighth MMR dose administered. *Numeric*	Student > Health > Immunizations; Census > People > Demographics > Birth Date Calculated value = immunization.doseDate8date minus student.birthdate
MMR 9 *immunization.code = MMR or MMRV*	The number of days between the student's birthdate and the date of the ninth MMR dose administered. *Numeric*	Student > Health > Immunizations; Census > People > Demographics > Birth Date Calculated value = immunization.doseDate9date minus student.birthdate
MMR 10 *immunization.code = MMR or MMRV*	The number of days between the student's birthdate and the date of the tenth MMR dose administered. *Numeric*	Student > Health > Immunizations; Census > People > Demographics > Birth Date Calculated value = immunization.doseDate10date minus student.birthdate

Data Element	Description	Location
