Building Delivery Model

The Building Delivery Model is used to determine the way in which instruction is delivered in the selected building. A Building Delivery Model should only be selected if it is different than the District Delivery Model. A record is saved for each delivery model created. If the Delivery Model differs from the District Delivery Model, be sure that an additional record for the building is reported.

Ohio Building Delivery Model Detail Editor

School

Use the drop-list to select the school for which the Delivery Model is being set.

Delivery Model

Use this drop-list to select the way in which instruction is delivered to students.

▶ [Click here to expand...](#)

| Code | Definition |
|--------|---|
| 5DAYIN | All students have the option of in-person instruction each school day, even if schedules are somewhat adjusted |
| REMOTE | All students receive only remote education, which may include teacher-led instruction or student-paced learning |

| Code | Definition |
|--------|--|
| HYBRID | A mix of in-person and remote education, which may involve different groups of students in the building each day (i.e., students are in the building everyday, but not all students, and students complete remote work on days they are not in the building) |

Start Date

Enter the date on which the Delivery Model begins for the building.
