Tool Search: Events by Resolution

Events by Resolution displays a count of behavior events by resolution type for students with an [Early Warning Behavior GRAD score](#) between 50 and 100.

This report is only available for districts that have purchased the Campus Analytics Suite.

You must have at least **Read** tool rights for **Events by Resolution** in order to view the chart. You must also have calendar rights assigned for any calendar(s) reporting data.

NOTE: Insights visualizations may contain PII and include data for tools a user may not have rights to access.

Understanding the Chart

The Events by Resolution chart displays the number of behavior events resulting in a specific resolution type for the calendar selected in the Campus toolbar. Double-clicking a section of a bar will show you a table detailing all the data that makes up that colored section of the bar.

Use the table below for help in understanding each sub-report column:

Column	Description
Event Name	The behavior event type for a behavior event resulting in the specific behavior resolution.
Student Name	The name of the student tied to the behavior event.
Student Grade	The grade level of the student tied to the behavior event.
Event Role	The student's role in the behavior event.
Resolution Name	The behavior resolution assigned to the student for the specific behavior event.
Incident ID	A unique identifier assigned to each behavior event.
Student Person ID	The personID of the student assigned the behavior event.

Using the dropdown list in the image below, you can filter data to display a count of behavior events resulting in a specific behavior resolution or a count of students assigned a specific behavior resolution.

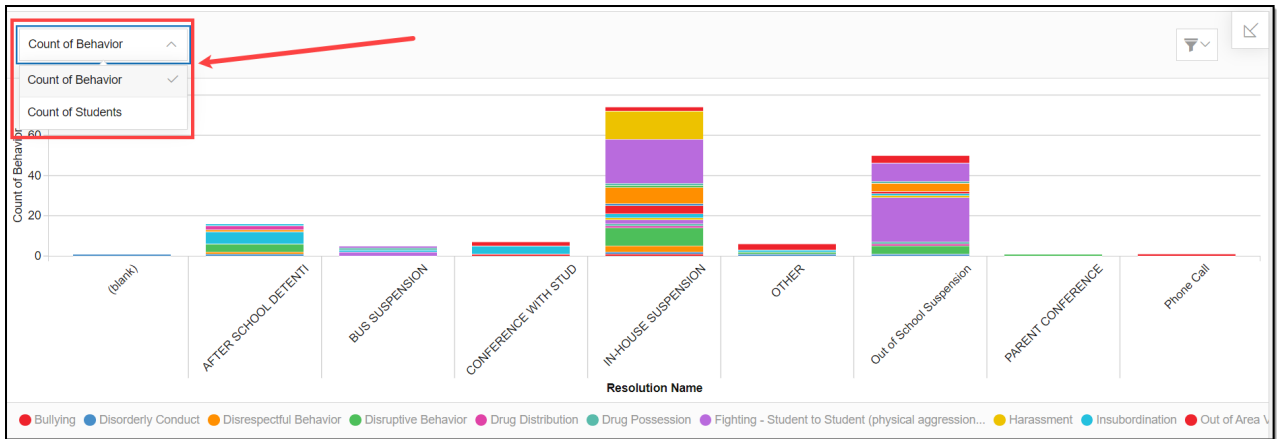

Chart Option	Description
Count of Behavior	Displays a count of behavior events where student offenders were assigned a specific behavior resolution.
Count of Students	Displays a count of student offenders assigned to each behavior resolution.

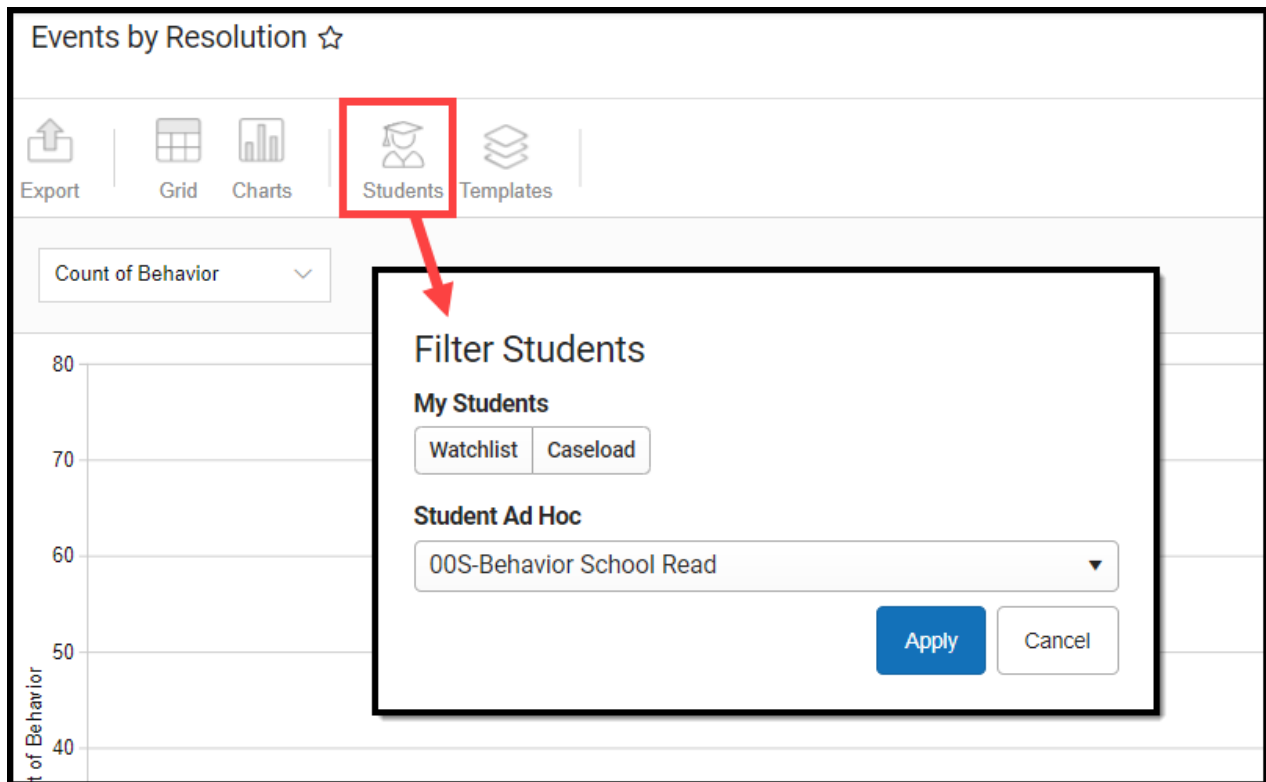

You can remove and filter any data from the bar graph by clicking the  button, selecting the data type you wish to filter, and unchecking the data you wish to remove from the graph.

Filtering Chart Data

You can filter chart data to only students in your [Early Warning Watchlist](#), Counseling Caseload, and/or a specific [Student Ad Hoc](#) filter by clicking the **Students** button and selecting any combination of these options.

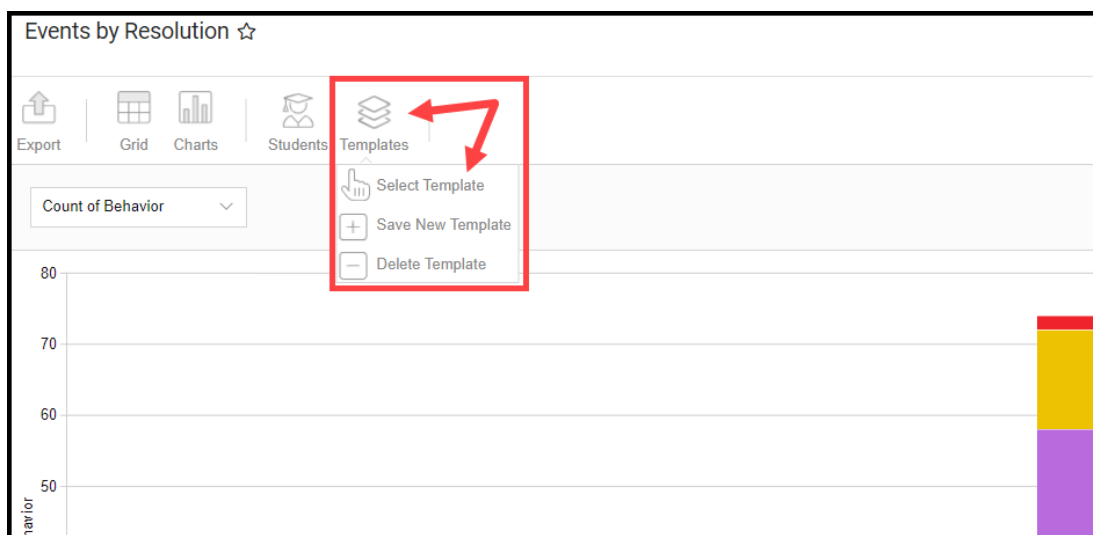

[Ad Hoc Queries](#) and [Selection Editors](#) are supported in Insights by filtering from the Student panel.

[Pass-through SQL Queries](#) are not supported in Insights.

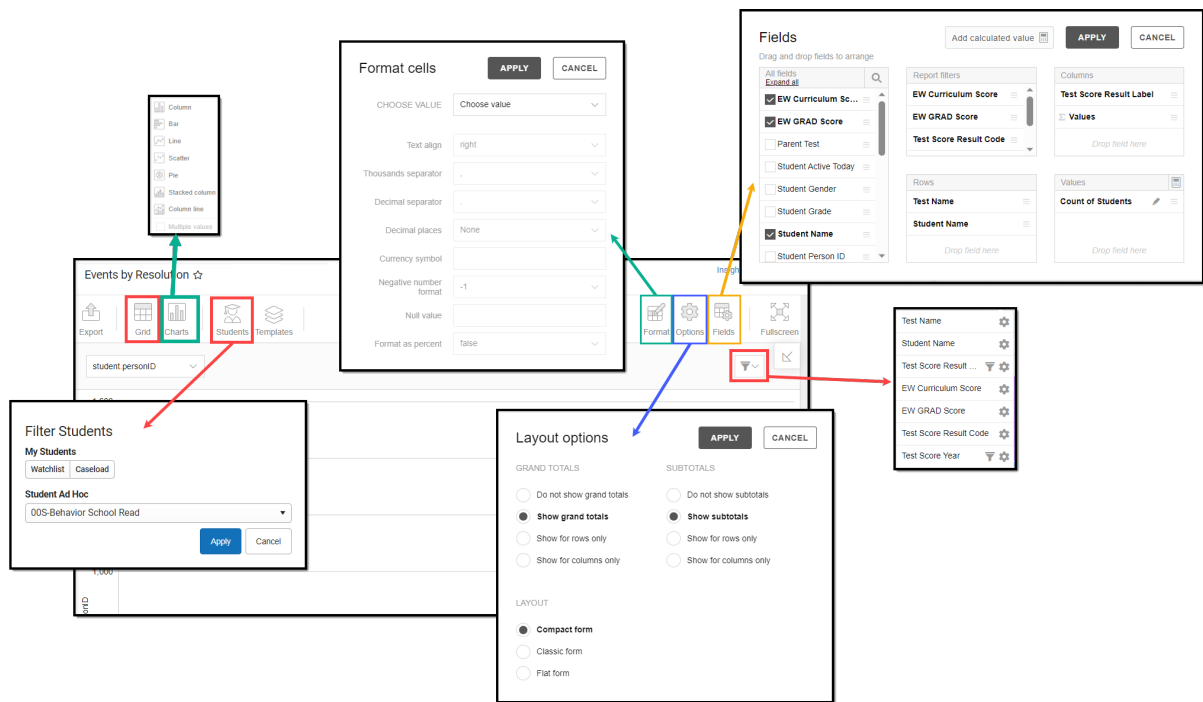

Creating Templates

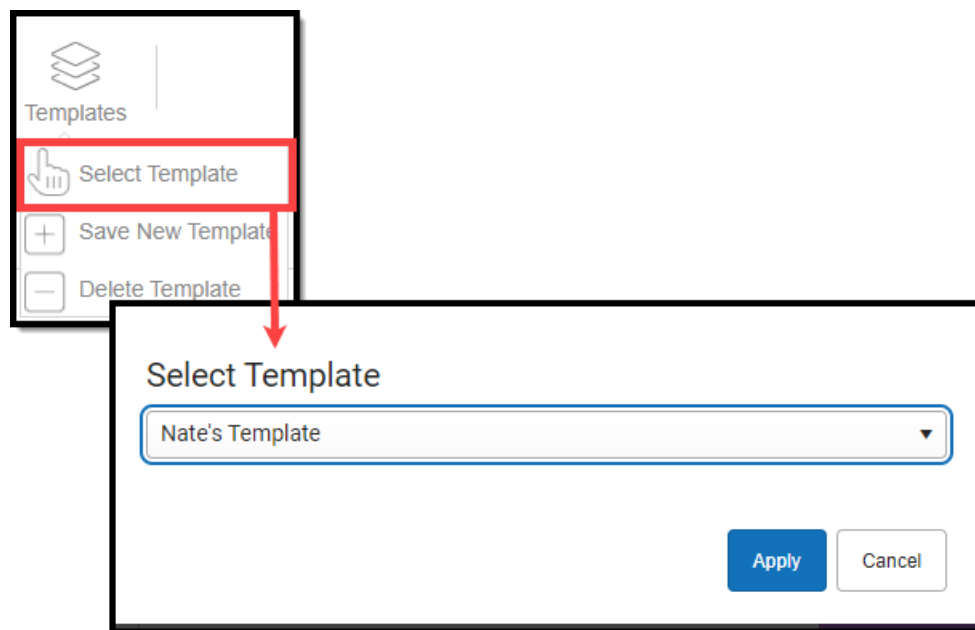

Templates allow you to save all filtering and formatting options you have set for a chart and have these options automatically applied each time you select a template. Templates are chart-specific, meaning they are only available and apply to the chart for which they were created.

For example, if you filter the chart data by Watchlist in the Student option (see section above) and modify any formatting and field options (any options shown below), all your selections can be saved as a template by clicking **Templates** and selecting **Save New Template**.

Once saved, each time you return to this chart you can automatically apply these options by clicking **Select Template**, choosing the template, and selecting **Apply**.
