The Exiting Student Follow Up (FW) extract reports data from records on the [Follow Up Data \(FW\)](#) tab.

## Report Logic

A record reports for each student who has an [Follow Up Data](#) record with an Effective Date that falls during the extract Date Range. If a student has more than one record, data reports from the record with the most recent effective date. Records marked as State Data do not report.

## Generating the Extract

1. Select the *Exiting Student Follow Up (FW)* **Extract Type**.
2. Select the **Reporting Period** for which the extract is being generated.
3. Enter the **Date Range** in *mmddyy* format or by clicking the calendar icon and selecting a date. Follow Up Data records with an Effective Date within this date range are reported.
4. Select the extract **Format**. For submission to the state, use the *State Format (Fixed width)* option. To review data prior to state submission, use any of the other available Format options.
5. Select an **Ad hoc Filter**, if applicable, to limit data based on an existing [Ad hoc filter](#).
6. Indicate if the extract should **Include Protected Identity Info**, which reports Demographics information from Census > People > Identities > Active Identity > Protected Identity Information.
7. Select which **calendar(s)** to include within the extract.

8. Click **Generate Extract** to generate the report in the indicated format or **Submit to Batch** to schedule when the report will generate. If generating multiple extracts at a time, requests can only be submitted to the Batch Queue.

Users have the option of submitting a FW report request to the batch queue by clicking **Submit to Batch** instead of Generate Extract. This process will allow larger reports to generate in the background, without disrupting the use of Campus. For more information about submitting a report to the batch queue, see the [Batch Queue](#) article.

## Extract Layout

If the **Include Protected Identity Info** checkbox is marked in the extract editor, Demographics fields report from Census > People > Identities > Active Identity > Protected Identity Information.
