KECS LEAD Extract Detail Report

Detail Report Logic

The report can be run against a district’s active year as well as any prior year in District Edition. The report will be produced with a custom name in the following format: KECS_LEAD_ReportName.csv/html. Enrollments and Courses must be active to be included in the report. Students must be rostered on the last day of the section to be included in the report. Calendar year should overlap the Extract Editor date ranges. Schools must have a State Classification of A1, A2, A3, A4, A5, A6, A7, A8, B1, B2, C1, C2, or D1 to be included in the report. Calendars, Grade Levels, and Enrollments marked as 'exclude' are included in this report. Enrollments marked as 'no show' and calendars marked as 'summer school' are NOT included. If a student has multiple enrollments, the most recent will be used. If there are multiple active enrollments with the same start dates and same end dates (or all end dates null), look at Service Type P, then highest enrollmentID.

Appendix E : KTS Exchange Logic

The logic to pull KTS Exchange is as follows. A course at the home school from the KTS Data Exchange will have:

- CourseCatalog.name = Calculated Value composed of the following:
 - Last two digits of calendar.endYear minus 1
 - hyphen (-)
 - Last two digits of calendar.endYear
 - space
 - KTS Course Catalog (HIGH SCHOOLS ONLY)
 - Example: 22-23 KTS Course Catalog (HIGH SCHOOLS ONLY)
- CourseMaster and CourseCatalog LEFT JOIN on catalogID
- KTSTechID is defined for the corresponding course

- customCourse.value is NOT NULL for CampusAttribute.object = 'Course' AND CampusAttribute.element = 'KTSTechID'
 - CustomCourse LEFT JOIN to Course on coursed and to CampusAttribute on attributeID
-
