Tool Search: Status by Weekday

Status by Weekday displays a count of absent and tardy attendance events (by students with an Attendance GRAD Score between 50 and 100) broken out by day of the week.

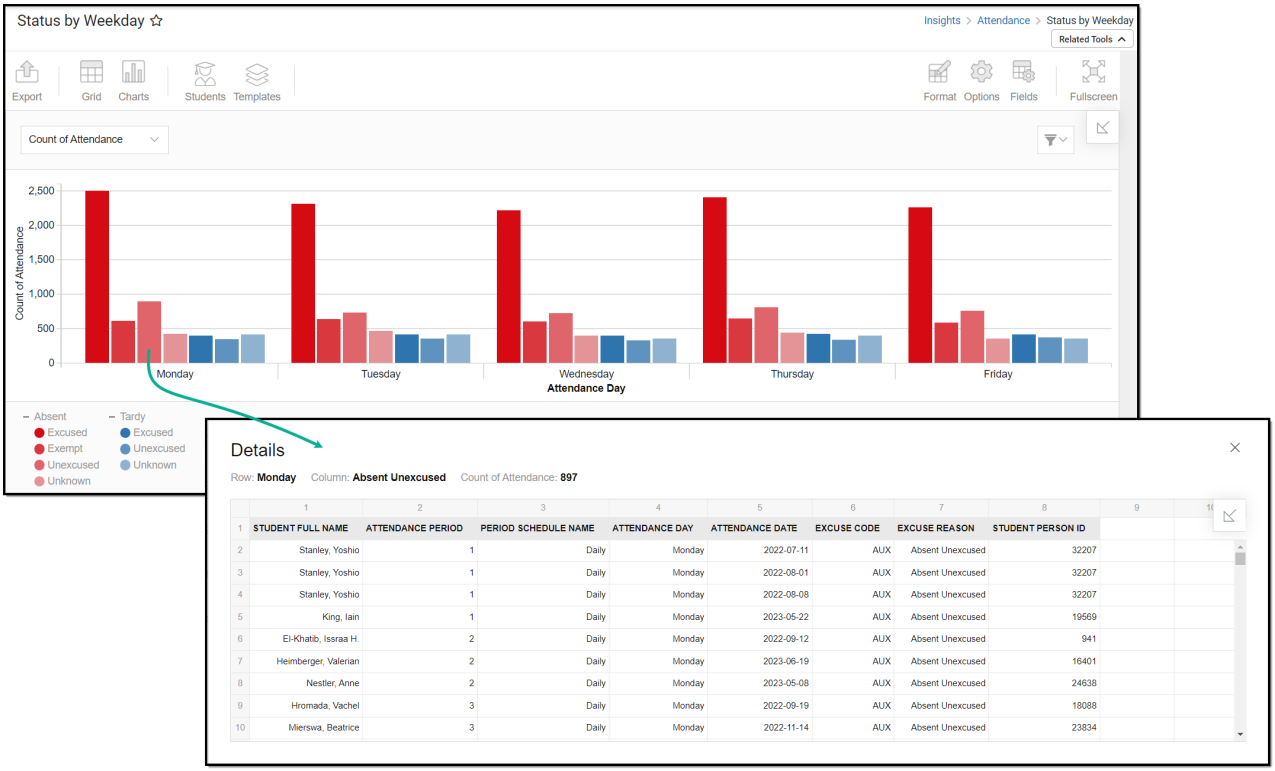

To view the chart, you must have at least Read tool rights for Status by Weekday. You must also have calendar rights assigned for any calendar(s) reporting data.

NOTE: Insights visualizations may contain PII and include data for tools a user may not have rights to access.

Understanding the Chart

The Status by Weekday chart is a useful way to see a large amount of absent and tardy data and easily identify trends between days of the week. You can quickly identify a certain day that is common for tardies or absences and use this knowledge for student engagement opportunities.

Double-clicking a bar will show you a table detailing all the data that makes up that bar.

STUDENT FULL NAME	ATTENDANCE PERIOD	PERIOD SCHEDULE NAME	ATTENDANCE DAY	ATTENDANCE DATE	EXCUSE CODE	EXCUSE REASON	STUDENT PERSON ID

Use the table below for help in understanding each sub-report column:

Column	Description
Student Name	The student's full name.
Attendance Period	The attendance period reporting data.
Period Schedule Name	The name of the period schedule reporting data.
article." data-original-title="" data-toggle="popover" title="">Attendance Day	The day of the week the absence/tardy occurred.
Attendance Date	The date of the absence/tardy.
Excuse Code	The excuse (reason) code for the absence/tardy.
Excuse Reason	The excuse reason for the absence/tardy.
Student Person ID	The personID for the student reporting data.

Using the dropdown list in the image below, you can filter data to display a count of students per absence/tardy reason per weekday.

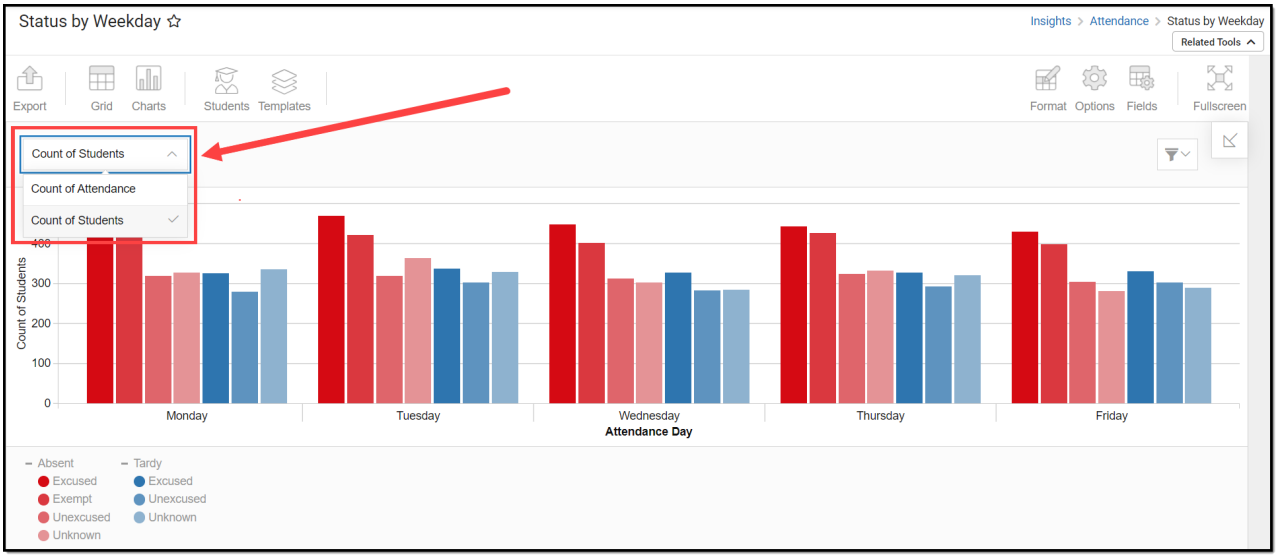

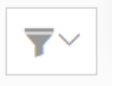

Chart Option	Description
Count of Attendance	Displays a count of absent and tardy attendance events per weekday.
Count of Students	Displays a count of students per absence/tardy reason per weekday.

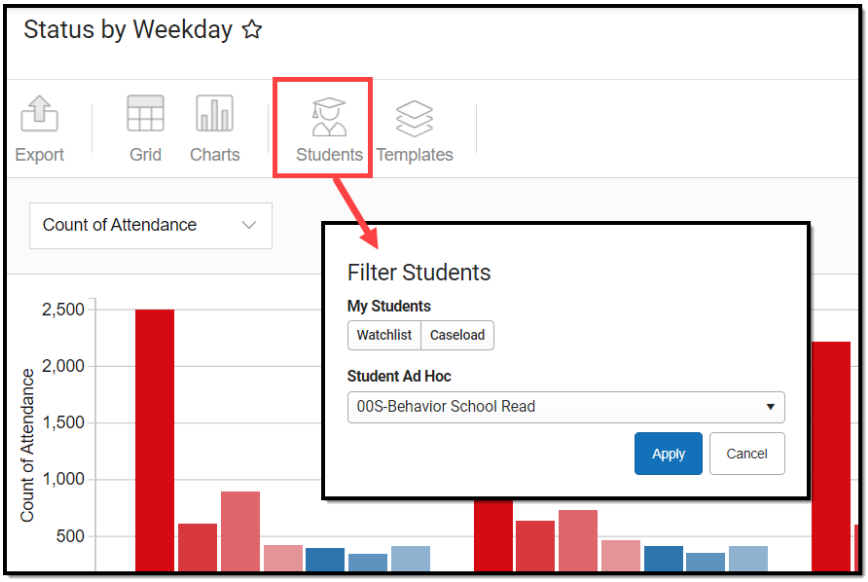

You can remove and filter any data from the bar graph by clicking the  button, selecting the data type you wish to filter, and unchecking the data you wish to remove from the graph.

Filtering Chart Data

You can filter chart data to only students in your Early Warning Watchlist, Counseling Caseload, and/or a specific Student Ad Hoc filter by clicking the **Students** button and selecting any combination of these options.

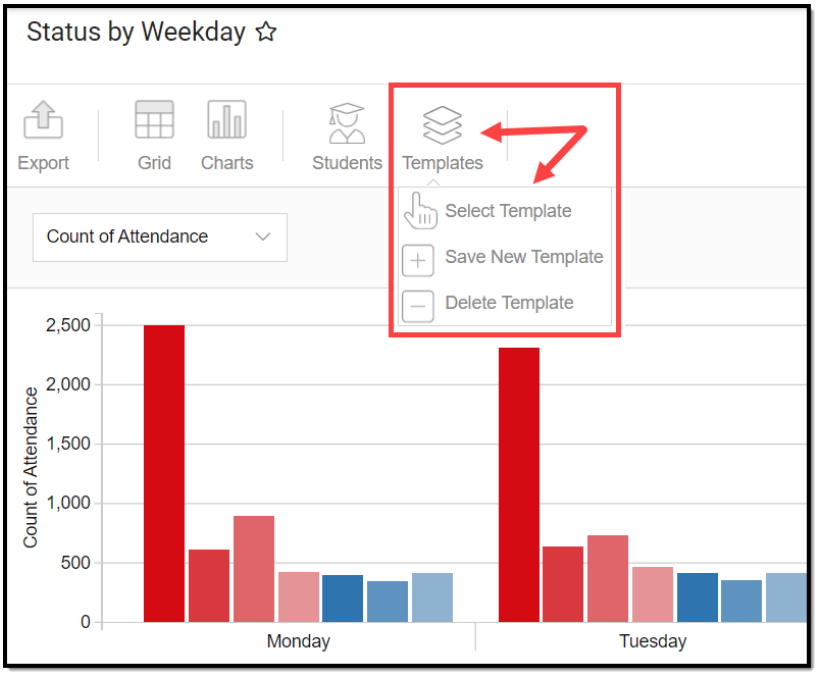

Ad Hoc Queries and Selection Editors are supported in Insights by filtering from the Student panel.

Pass-through SQL Queries are not supported in Insights.

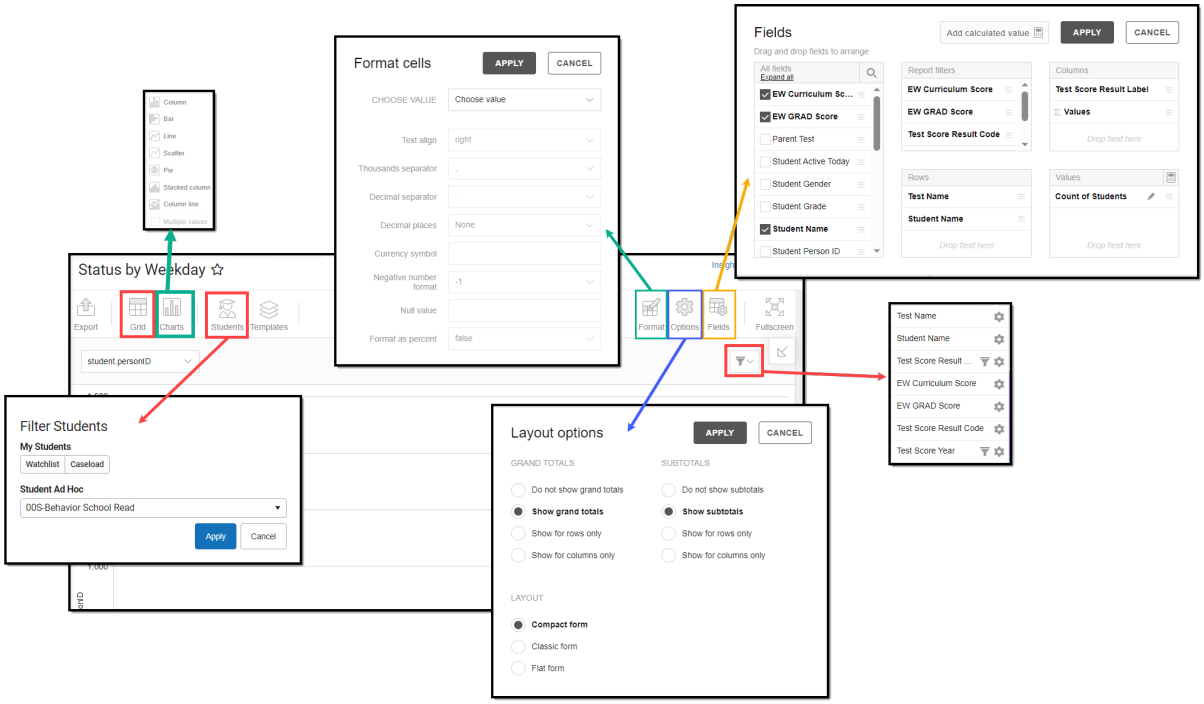

Creating Templates

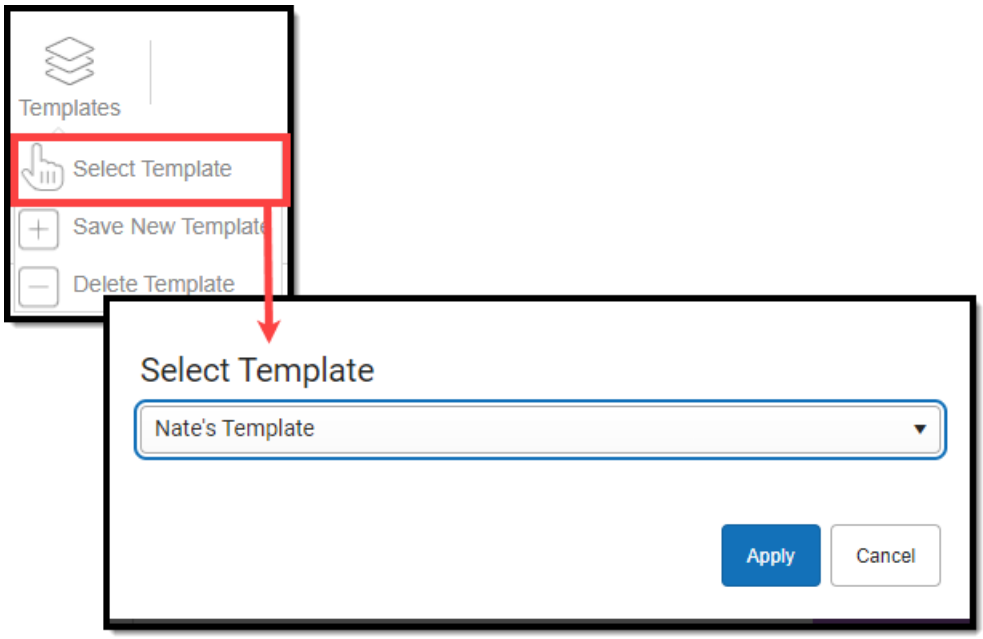

Templates allow you to save all filtering and formatting options you have set for a chart and have these options automatically applied each time you select a template. Templates are chart-specific, meaning they are only available and apply to the chart for which they were created.

For example, if you filter the chart data by Watchlist in the Student option (see section above) as well as modify any formatting and field options (any options shown below), all your selections can be saved as a template by clicking **Templates** and selecting **Save New Template**.

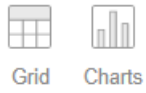

Once saved, each time you return to this chart you can automatically apply these options by clicking **Select Template**, choosing the template, and selecting **Apply**.
