

Course Planner - Video

Last Modified on 03/11/2024 8:47 am CDT

This video shows how the Course Planner is used during scheduling to set parameters and constraints for courses at a school. This tool is used after the setting of teacher constraints has been completed in the [Staff Planner](#). Consult the [Checklist For Scheduling](#) for an overview of which tools are used in scheduling and the order in which scheduling tasks should be completed.

The Course Planner is part of an ongoing project to update Scheduling tools in Campus. These new tools include the Scheduling Center, Scheduling Board, Staff Planner and Course Planner. Current tools (Schedule Wizard, etc.) will remain concurrently available while this project is in progress.
