KECS LEAD Extract Schoolwide (Aggregate) Report

Schoolwide (Aggregate) Report Logic

The Schoolwide (Aggregate) report generates an aggregated list of information for the school and selects records from the Detail report where:

- State ID is NOT NULL
- Report at the school level so students may have enrollments in multiple calendars or schedule structures
- If the report has more than one Enrollment ID for a student within the same school:
    - If multiple enrollments exist with the same Service Type, report the one where the Enrollment End Date is NULL or is the last day of instruction
    - Report the enrollment with Service Type = P
    - If no primary enrollments, report the enrollment with Service Type = S
    - If no partial day enrollments, report the enrollment with Service Type = N.

This report groups by: End Year, District Number, District Name, School Number, School Name, State Classification. It sorts by the following in ascending order: EndYear, DistrictName, SchoolName.
