[Object Triggering Logic](#) | [Scope Year Logic](#) | [Object Data Elements](#)

This association represents student information that is specific to a student's relationship with an Education Organization.

Object Triggering Logic

This table describes logic for triggering syncing of this object.

Action	Trigger
Post	When an enrollment is created and saved for a person and the enrollment overlaps a configured year. • Does not send a record when enrollment is in a calendar marked as State Exclude. • Does not send a record when enrollment is in a School marked as State Exclude. • Does not send a record when the No Show checkbox is checked on the enrollment. • Reports one Student Education Organization Association record for every unique school enrollment; when there are multiple enrollment records tied to the same school in a configured year, reports a single Student Education Organization Association record for each unique school.

Action	Trigger

Delete/Post	When any student data is edited for the person in the Data Elements fields below:
	• When the person's identity record is changed:
	   ○ Race/Ethnicity
	   ○ Gender
	   ○ Home Primary Language
	• When one of the person's household locations is updated/changed:
	   ○ Mailing, Private
	• When one of the person's household memberships is added/deleted/changed:
	   ○ Start Date, End Date, Private
	• When any data in the address the student is associated with changes:
	   ○ PO Box, Number, Prefix, Street, Tag, Direction, Apt, City, State, Zip
	• When a student's IEP is locked or unlocked and/or a student's disability is changed on the IEP, Enrollment or State Special Education tool.
	• When any of the Student Characteristics change:
	   ○ Single Parent: when a student's Special Population is changed.
	   ○ Foster Care: A student has a Foster Care record that overlaps the configured year, Start/End Dates are changed so record no longer overlaps configured year, the record is deleted.
	   ○ Parent in Military: A Military Connections record exists for a Guardian of the student, Start/End Dates are changed so record no longer overlaps configured year, the Guardian checkbox is checked/unchecked, the record is deleted.

Delete	This record deletes when the student no longer has an eligible enrollment in the District.
Delete	When a student had multiple unique school enrollments, and all of the enrollments tied to a single school are deleted, then only the Student Education Organization Association record tied to that school would be removed.

Resource Toggle and Resync Logic

This table describes the Resource Toggle and Trigger logic of this object.

Action	Business Rule
None	When a resource is toggled to 'OFF' after data has sent, all sent data remains in the ODS but no new data is sent.
Resync	When a record is in the Ed-Fi Identity Mapping table and not in the ODS, it is deleted from the Ed-Fi Identity Mapping table
Resync	When a record is in the ODS and it does not have a matching record in Campus or the Ed-Fi Identity Mapping table, it is deleted from the ODS.

Action	Business Rule
Resync	When a mapping is changed in Resource Preferences, a resync needs to be done to reflect the changes.

Natural Key Changes, Cascading Updates, and Deletes Logic

This table describes the Natural Key Changes/Cascading Updates and Deletes logic of this object.

Action	Business Rule
Post/Delete	Natural Key Change: When the LEA number changes, all data remains under the old number and a resync needs to be completed to populate data under the new number. The delete tool would need to be used to remove all data from the old LEA number. When an Ed-Fi ID changes, this happens with the cascading deletes from the Ed-Fi ID Change trigger.
Delete	Cascading Deletes: The logic for an Ed-FI ID change updates all resources impacted by this change.

Scope Year Logic

This table describes scope year logic of this object.

Logic
The record sends to the scope year for the school year the enrollment is associated with. • The enrollment must overlap with the scope year to report. • Data only sends for the years that have valid configuration.
When using data in Campus that has a single date, the following logic applies to determine the scope year(s) to report the data to. • Current Year: Records are compared to today's date to determine when the record is eligible to report. • Previous Years: The record's date must be on or before the schools year's end date defined in the School Years editor. When blank, the default date of 6/30/xxxx is used. • Future Years: The record's date must be on or after the schools year's start date defined in the School Years editor. When blank, the default date of 7/01/xxxx is used.

Logic
When using data in Campus that have start and end dates, the following logic is applied to determine the scope year(s) to report the data to. • **Current Year**: The records start date must be on or before today's date and the records end date must be on or after today's date. • **Previous Years**: The record's start date must be on or before the school year's end date and the record's end date must be after the school year's end date defined in the School Years editor. When blank, the default date of 6/30/xxxx is used. • **Future Years**: The record's start date must be on or before the schools year's start date and the record's end date must be on or after the school year's start date defined in the School Years editor. When blank, the default date of 7/01/xxxx is used.
