This event entity represents an occurrence of an infraction ranging from a minor behavioral problem that disrupts the orderly functioning of a school or classroom (such as tardiness) to a criminal act that results in the involvement of a law enforcement official (such as robbery). A single event (e.g., a fight) is one incident regardless of how many perpetrators or victims are involved. Discipline incidents are events classified as warranting discipline action.

Object Triggering Logic

This table describes logic for triggering syncing of this object.

Action	Trigger
Post	Reports a behavior incident when the incident's status is marked and saved as Complete. • Incident must have at least one behavior event associated and a Role that is mapped to an Ed-Fi Value. • Posting can occur when a new event is added after Incident is marked as Complete. • Does not send when the student is in a calendar marked as Exclude. • Does not send when the student's enrollment is in a school marked as Exclude. • Does not send when the student's enrollment is in a calendar marked as Summer School.
Put	When data that is not part of the Natural Key is changed. • When the student's role is changed.
Delete/Post	When the Incident's status is changed. • Deletes when the status is changed from Completed to In Progress. • Posts when the status is changed from In Progress to Completed.
Delete	When an event is deleted.
Delete	When all non-excluded enrollments in the school and year are deleted.

School Exclude, Calendar Exclude, Resource Toggle and Resync Logic

This table describes the School Exclude, Calendar Exclude, Resource Toggle and Resync logic of this object.

Action	Trigger
None	When a resource is toggled to OFF after data has sent, all sent data remains in the ODS but no new data sends.
Resync	When a record is in the Ed-Fi Identity Mapping table and not in the ODS, it is deleted from the Ed-Fi Identity Mapping table.
Resync	When a record is in the ODS and it does not have a matching record in Campus or the Ed-Fi Identity Mapping table, it is deleted from the ODS.
Resync	When a mapping is changed in Resource Preferences, a resync needs to be done to reflect the changes.

Natural Key Changes, Cascading Updates, and Deletes Logic

This table describes the Natural Key Changes/Cascading Updates and Deletes logic of this object.

Action	Trigger
Post/Delete	Natural Key changes: • When an Ed-Fi ID changes, this happens with the cascading deletes from the Ed-Fi ID Change trigger.
Delete/Post	When the Incident is deleted all dependent resources are deleted.
Dependent Resources	Discipline Actions **Note**: When a user deletes Student Discipline Incident Behavior Associations using the Delete Tool, the associated Discipline Actions are also deleted when Discipline Actions are auto selected because of the dependency. The user needs to resync the Discipline Actions after this type of delete.

Scope Year Logic

This table describes scope year logic of this object.

Logic
Discipline records only send to the school year that the incident date is aligned to. • Data will only send for the years that have valid configuration.
