Tool Search: On Track

The On Track tool provides a way to indicate whether a student is successful in school and is keeping up with grade level requirements to graduate on time. This information reports in the [On Track File](#). See the core [On Track](#) article for additional information.

Use the [Federal/State Program Updater](#) to import existing On Track records for students or to update records for multiple students.

Overlapping records are not allowed. When a student's program status changes, the current record needs to be ended, and a new record needs to be added with the new program status.
