The Master Schedule Report collects data about student, course and staff information. This report collects data required to satisfy federal assurances for Indicators (b)(1), (b)(2), and (b)(3) of the State Fiscal Stabilization Fund (SFSF). In meeting the vast requirements of those indicators, this collection also provides data that was previously collected through Instructional Personnel (IPAL) and Math & Science Course Enrollment (CEDC).

It also includes enrollments for nontraditional students in designated Career and Technical Education classes.

Virginia Master Schedule Report Editor

Report Logic

The Master Schedule Report collects all students scheduled into 20 or more hours of course instruction on or before the Effective Date entered in the report editor when the following requirements are also met:

- The course must be linked to a State Reported Grading Task or Standard.
- The student may or may not have a final grade in the course.
- Courses are reported regardless of whether the student has dropped the course.
- This report honors State Exclude indications.
- Students with No Show flagged are not reported.

When generating the Fall extract F-Student Record, students report when they are enrolled in the course as of the Effective Date. For courses that are complete as of the Effective Date, students

report in the F record when they have a grade associated with any grading task or standard. For future courses, the student must be scheduled into a section with a teacher. Courses must have SCED data.

The Master Schedule's C, D, F, I and J records report course sections/students/teachers when the section start date is AFTER the Master Schedule report generation Effective Date when the Course > Perkins Code is NOT NULL (CTE) or the Course Type is J.

The future section must have a teacher or primary teacher associated with it and students must be enrolled in the section for reporting.

Teachers that are not active teachers of the course section on the effective date do not report unless they are the last instructor on the course and have not been replaced.

A second F record is created for the student when a Course section has a Section staff or other Teacher who gives instruction to that specific student and the instructor does not work with the entire roster of the course section.

The following collections only report when a Primary teacher is selected on the Section Staff History: C) Course, F) Students, and D) Teachers.

STEM Schools report when the School Type (System Administration > Resources > School Type) codes is STEM.

Provider ID

The following logic applies when determining the Local Provider ID.

- The Local Provider ID reports on the student's record based on the section's Primary Teacher in the Staff History of the course.
- The Primary Teacher may have any role code associated with their Section Staff History Record for the course.
- When there is a Primary Teacher for the section, they report as the Local Provider ID.
- Teachers that were an active instructor of the course as of the report's effective date are also considered for determining the Local Provider ID.
- A section staff member or other Teacher (non-Primary teacher) may report as the Local Provider ID when there is no active Primary Teacher as of the report's effective date.
- Section staff or other Teachers on the section with a Teacher Role of NULL or = O: Other (excluded from reporting) do NOT populate the Local Provider ID.
- When there is no teacher active as of the report's effective date, the Local Provider ID considers the most recently active Teacher by end date.
- When there is no Primary Teacher, but multiple section staff/other teachers report first from the most recently active teacher by End date. When the teachers have the same dates on the Section Staff history, the person with the lowest Person ID reports first.

Roster Verification

- When the teacher/section staff has a role code of 1, 4, 6, 7 then Campus checks to see whether there is a Roster Verification completed for that staff person for the course section.

- The Roster Verification must have a State Code of 01: MSC - End of Year.
- The Roster Verification must be certified.
- The Roster Verification must associate the instructor with at least one student on the roster, but not the entire roster of students (<100%).
- For each student associated with the staff person via the Roster Verification, when the instruction time is greater than zero, a second F record generates for the student with the Local Provider ID populated from the instructor indicated via the Roster Verification.
- When the teacher/section staff does not have one of the role codes (1, 4, 6, 7), a second F record does NOT generate for the student for that course section.
- When a qualifying Roster Verification does not exist, a second F record does NOT generate for the student for that course section.

Record Report Population Logic

The Master Schedule Report includes multiple different data collections. Marking the checkboxes in the extract editor determines which records are included in the report.

Record	Logic
A	Includes a header record. When multiple calendars are selected in the same year, only one A record reports.
B	<p>Includes a record for each teacher in the section into which the student is scheduled. Reports only one record for each teacher, regardless of the number of sections or courses they teach, the number of Credential or employment records, or the number of calendars. License Number is not necessary for a teacher to report.</p> <p>A record also generates for each staff member with a District Assignment record active on or before the Effective Date that has a Type of 07 or 08. No record reports when the Assignment Code is Null or section Staff History Role is O: Other (excluded from reporting).</p> <p>B records do NOT report for individuals with a Provider code of 1, 2, 3, or 5 (Census > People > District Assignment > Provider Description). When Sort by Calendar is selected on the editor, a record reports for each assignment in each calendar. When Sort by Record Type is selected on the editor, only one record reports per school.</p>

Record	Logic
<p>C</p>	<p>A single record reports per unique Section ID. When a Course Section is marked as State Exclude, the Course Section does not report.</p> <p>This collection only reports when a Primary teacher is selected on the Section Staff History.</p> <p>When the Course is for PK students, the C - Course record and all associated records report even when the course does not have a state reported grading task or standard associated with it. PK courses report when their SCED code is 01027, 05129, 01039, 02029, 03229, 04429, 05179, 08029, and 23002. These students report on the F record.</p> <p>CTE Course Section</p> <ul style="list-style-type: none"> • CTE Courses are indicated with a Perkins Code (Perkins Code on the course is NOT NULL). • A record reports for each qualifying CTE Course Section. <ul style="list-style-type: none"> ◦ A course section reports when it includes at least 1 scheduled, non-excluded student on the roster. ◦ For course sections completed or in progress as of the report Effective Date, students actively scheduled in the course at any point during the course section report. ◦ For future course sections in the report year, students scheduled to take the course as of the section start date report. <p>Regular Course Section</p> <ul style="list-style-type: none"> • Regular/non-CTE Courses are indicated by not having a Perkins Code (Perkins Code on the course is NULL). • Only regular course sections with at least one State Reporting Grading Task attached report. • A record reports when the Course Section has at least 1 scheduled, non-excluded student on the roster. • When the Course Section is completed or in progress as of the report Effective Date, only students scheduled for at least 20 hours of instruction as of the report Effective date reports. • Future Course Sections do not report.
<p>D</p>	<p>Includes a record for each teacher in the section into which the student is scheduled. Reports only one record for each Teacher with a License Number in a section and an Active Teacher Role on the Effective Date. When there is no active Teacher as of the Effective date of the report, the next qualifying teacher/ teaching team with the most recent Start Date reports.</p> <p>No record reports when section Staff History Role is O: Other (excluded from reporting). This collection only reports when a Primary teacher is selected on the Section Staff History.</p>

Record	Logic
E	<p>Reports a single record for each non-licensed teacher and/or non-administrator of the section into which the student is scheduled.</p> <ul style="list-style-type: none"> • Non-licensed teachers are only reported one time, regardless of the number of sections or courses they teach or the number of calendars. • Staff members reports an E record when either License Prefix or License Number is Null. • No record reports when section Staff History Role is O: Other (excluded from reporting). • When there is no active Teacher as of the Effective Date of the report, the next qualifying teacher/ teaching team with the next most recent Start Date reports. • When the teacher's district assignment records have the same date, data reports from the highest assignment ID. • When multiple calendars are selected and staff has multiple eligible records, a record generates from the district assignment with the most recent Start Date. When the Start Dates are the same, a record reports from the highest assignment ID. When a single calendar is selected, a record reports for each eligible calendar. <p>Sections of a Course marked as Course Exclude do not report. To report, the course section must meet one of the following sets of criteria.</p> <p>CTE Courses (indicated with a Perkins Code)</p> <ul style="list-style-type: none"> • CTE courses must have at least one non-excluded student actively scheduled into the course at any point on or before the Effective Date. • In progress and completed sections report based on the report Effective Date. • Future CTE course sections in the reporting year can also report based on the section Start Date instead of the report Effective Date. <p>Regular/Non-CTE Courses (Perkins Code on the course is NULL)</p> <ul style="list-style-type: none"> • In progress and completed sections report based on the report Effective Date. • To report, a qualifying Regular course section must have at least one State Reported Grading Task attached and at least one non-excluded student scheduled for at least 20 hours of instruction as of the report Effective date. • A record reports for each qualifying person with an active Section Staff record on the section staff history of the course section.

Record	Logic
<p>F</p>	<p>Reports students rostered into non-excluded course sections. Students enrolled on the Effective Date selected upon report generation report during the Fall Reporting Period.</p> <p>CTE Courses (indicated with a Perkins Code)</p> <ul style="list-style-type: none"> • CTE Course (indicated with a Perkins Code). <p>Regular/Non-CTE Courses (Perkins Code on the course is NULL)</p> <ul style="list-style-type: none"> • Non CTE courses reports when student is schedule as of Effective Date. For Regular/Non-CTE Courses (Perkins Code on the course is NULL), a qualifying Regular course section must have at least one State Reported Grading Task attached to report. <p>Enrollments, Calendar, or Grade Levels marked as State Exclude are not included in the extract. This collection only reports when a Primary teacher is selected on the Section Staff History.</p> <p style="background-color: #fff9c4; padding: 5px;">Students served a VDOE licensed Private School for Students with Disabilities do not report on the F record except for the following schools; New Community (0701), St. Mary’s (1241), and The Auburn School (1251).</p> <p>Students only report on the F Record when their Enrollment Serving Division-School field meets on of the following criteria:</p> <ul style="list-style-type: none"> • the Serving Division-School field is null. • the characters before the hyphen (-) is equal to the reporting district's State District Number (System Administration > Resources > District Information). • the Serving Division-School is 600-701, 600-1241, or 600-1251, OR • the first three characters before the hyphen (-) is NOT 600.
<p>G</p>	<p>Includes a record for each teacher in the section into which the student is scheduled when the teacher has a District Assignment active on or before the extract Effective Date with a Type of 7: Pupil Personnel Service Provider, 8: Administrator, or 10: Other Staff not connected to a section. Reports one record per teacher, per Type, per school, regardless of the number of calendars.</p> <p>District Assignment Code cannot be blank.</p> <p>Staff members that report a G record also report a B record. When Sort by <i>Calendar</i> is selected on the editor, a record reports for each assignment in each calendar. When Sort by <i>Record Type</i> is selected on the editor, only one record reports per school.</p>
<p>I</p>	<p>Includes a record for each CTE course, indicated with a Perkins Code.</p>
<p>J</p>	<p>Includes a record for each course with a Type of J.</p>

Record	Logic																		
K	<p>Reports the Course Sections of the course where the Interdisciplinary Flag (IF) is populated. The (IF) must be populated with the connected Section ID number.</p> <p>The following fields report this combination of values: <i>D + District Number-School Number-Course Number-Section Number</i>. Generate the Master Schedule

1. Enter an **Effective Date** in *mmdyyyy* format or by clicking the calendar icon and selecting a date. The report includes students who are scheduled into a course on or before this date for at least 20 hours.
2. Select the **Extract Type** to generate, *Fall* or *EOY*.

When you select **EOY**, the **Prior Reporting Date** field displays. Enter the same date as the Effective date of the Fall report generation. Doing this captures students who were reported in the Fall reporting period and students who entered after the Fall Effective Date of report generation.

3. Indicate which **Records** should be included in the extract by marking the checkboxes.
4. Select whether you want the report to **Sort by** *Calendar* or *Record Type*.
5. Indicate the **Format** in which the extract should generate. Options are *CSV*, *Tab Delimited* and *HTML*.
6. Indicate which **Calendar(s)** should be included in the extract.
7. Select the **Generate Report** button to generate the extract in the desired format.

Users have the option of submitting a report request to the batch queue by clicking **Submit to Batch** instead of Generate Extract. This process allows larger reports to generate in the background, without disrupting the use of Campus. For more information about submitting a report to the batch queue, see the [Batch Queue](#) article.
