## Report Logic

One record per student reports for students in the selected school and year who have an English Learners (EL) record. As soon as a student qualifies to report for a certain state code, they no longer qualify to return any other value.

The following table lists the EL statuses that report in order of how logic checks for qualifying student data.

Students are included in the report when:

- They are actively enrolled on at least one date in the selected school year and in the reporting school year AND are in a grade level mapped to a state grade level of KG or 01-12.
- They are aged 3 through 21 on at least one date in the reporting school year.

- They were not born in the United States OR their Primary Home Language is NOT English.
