Tool Search: Enrollments

The Enrollment tool displays all student enrollment occurrences in the district. Because this is an historical view, this list could be long.

Enrollments are sorted by grade level first and then by enrollment start date second. To reorder the list of enrollments, click the blue headers in the Enrollments Editor list. The list of enrollments can be sorted by Grade, Calendar, Start Date, or End Date.

See the core [Enrollments](#) article for information on necessary tool rights, available Ad hoc fields, and guidance on adding and printing Enrollment records.

General Enrollment Information

[Start Status](#) | [End Status](#) | [No Show](#) | [Service Type](#)

The General Enrollment Information editor describes the calendar, schedule, grade, start/end date, and reason for creating or ending the enrollment record. Both the *Start* and *End Status* fields are unique to the state of Oregon. Oregon reporting also relies heavily on *Service Type* when populating reports. These fields are further described below. All other fields in General Enrollment Information do not require unique, state-specific data. However, many of these fields are required and data entry in these fields is necessary. For more information on these fields, see the [Enrollments](#) article.

General Enrollment Information Editor

Start Status

Start Status indicates the reason for beginning the student enrollment, whether entering the school or district or continuing on from another grade.

Only enrollment start statuses that are mapped to a State Start Status Code report in state extracts.

Districts can map local enrollment statuses to state enrollment statuses when local statuses are very specific to a situation or to that district but still need to be included in state reports. For districts that use very granular enrollment statuses, this lets the district continue to use those values but still report the state-mandated enrollment statuses. This is done in the [Enrollment Start Status Setup](#) tool.

The Start Date indicates the start date of the enrollment record. When creating an enrollment for a student, students must have a Start Date and a Start Status. An enrollment cannot be saved without an entry in these fields.

End Status

The End Status indicates the reason the student has not or is not enrolled in the current school year. All students with an end-dated enrollment must also have an End Status assigned to the end-dated enrollment.

Only enrollment end statuses that are mapped to a State End Status Code report in state extracts.

Like the Start Status, districts can map local enrollment statuses to state enrollment statuses when local statuses are very specific to a situation or to that district, but still need to be included in state reports. For districts that use very granular enrollment statuses, this allows the district continue to use those values, but still report the state mandated enrollment statuses. See [Enrollment End Status Setup](#) for more information.

When a student has completed high school, be sure to select the proper completer End Status. Users are not allowed to save an end-dated enrollment without an assigned End Status. However, this condition does not apply when the **No Show** checkbox is marked. When the No Show checkbox is marked, you can enter an End Status without an End Date.

When the End Status field is populated, an End Date must also be entered. When an End Date is entered, the End Status field must be populated.

This code should be used for students who leave from subsequent enrollment after having received a credential, or students enrolled in Program Type 16 (Post Graduate Scholars). Do not use this code for students who have exceeded age requirements and withdrawn. |

No Show

A no show student is defined as a student who is enrolled in the school but never attends class and does not officially withdraw from the school. These enrollment records are ended after a certain number of school days, depending on district and/or state policy.

When No Show is marked, the student's enrollment is not included in state reports. When a district wants to report No Show students, select **Program Type 14: Student not enrolled, received credential/other outcome** from the Program Type field.

Service Type

The Service Type is used to indicate the type of enrollment and the intended service the student receives. Service Types include: (P) Primary, (S) Partial, and (N) Special Ed Services.

When a student has multiple active or overlapping enrollments during a reporting period, state reports pull that student's data from the Primary Enrollment.

[▶ Click here to expand...](#)

| Code | Description | Notes |
|------|---------------------|--|
| P | Primary | This type of enrollment is a student's primary enrollment. This is the school the student attends all or most of the time. System settings determine whether a student can have multiple active primary enrollments at one time. |
| S | Partial | A partial enrollment indicates a student attends a school <i>part</i> of the time. One example might be a middle school student who attends a high school class and has a partial enrollment at the high school. |
| N | Special Ed Services | A Special Education enrollment indicates the student ONLY attends the school to receive special education services. |

Updates to State Reporting fields overwrite previously entered data. To preserve this historical information, create a new Enrollment record when changes are needed. Deleting an Enrollment record is NOT recommended.
