Tool Search: SSID/USID/IUID Extracts

The Instructional Unit Identifier (IUID) collection provides an identifier for each class that a school/district offers, so data may be validated across the Staff Assignment and Class Roster data collections.

Each year districts submit a list of classes offered that includes the dates of the classes, the school in which it is offered and the course subject information to the Oregon Department of Education. The district receives an IUID number per class which is then uploaded into Campus using the IUID Import. The assigned IUID reports in the Staff Assignment and Class Roster collections.

*Instructional Unit Identifier (IUID) Extract*

This is a two-fold process:

1. Generate the Instructional Unit Identifier extract to find the course sections that need IUIDs. This is then sent to the state.
2. Once the IUIDs have been assigned, use the [Instructional Unit Identifier Import](#) to assign the IUIDs to the course sections.

**Read** - Access and generate the IUID extract.

**Write** - N/A

**Add** - N/A

**Delete** - N/A

For more information about Tool Rights and how they function, see the [Tool Rights](#) article.
