Tool Search: Section Student Detail

The Section Student Detail tool provides a location where districts can collect course-related state reporting data for individual students in a course section. This data is not scheduling-related and can include both localized state reporting data elements provided by Campus (for example, Work-Based Learning) and custom [District Defined](#) data elements created by a district administrator. The following outlines the Section Student Detail options that are specific to the state of Indiana.

See the core [Section Student Detail](#) article for information on necessary tool rights, available Ad hoc fields, and guidance on adding and extracting Section Student Detail records.

The screenshot shows the 'Section Student Detail' screen for course 1002English 09 A. The top navigation bar includes 'Search Students' (with a search input field and magnifying glass icon), 'Display Records' (with buttons for 'Previous', 'Active', and 'Future'), and a star icon. The main content area displays student records in a table format:

Start Date	End Date	Applied Units	Course Outcome	Exclude from State Reporting
09/16/2023			01: Pass	Y: Yes
09/12/2023	09/15/2023	Y: Attempted Applied Units
