The CALPADS Student Absence Summary (STAS) reports chronic absenteeism to the state. It calculates the student's full day absences, but should not be used to for average daily attendance reporting.

CALPADS Student Absence Summary Editor

Report Logic

One line per enrolled school returns for a student. Students who move between calendars only report one line in the extract. When the student has multiple enrollments in the reporting calendar,

the student reports one time. When a student leaves school and returns, attendance is summed for those multiple enrollments (including for continuation students or community day students). When there are multiple enrollments with gaps between start and end dates, only the dates where the student is actively enrolled and scheduled into instructional attendance taking courses are included.

A student must have the following in order to report:

- An active primary enrollment
- A State ID

A student does not report when:

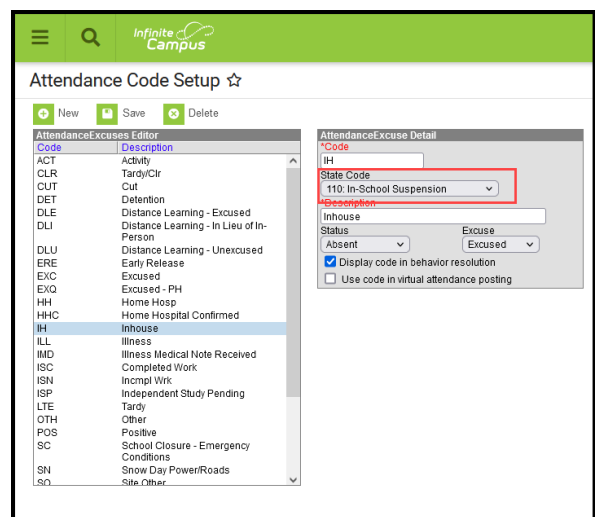

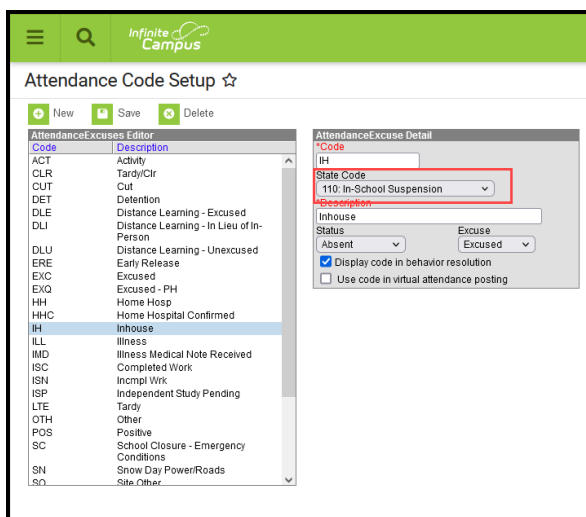

- An End Status of N470: No Show is assigned to the enrollment record.
- The grade level is marked as State Exclude, the Calendar of enrollment is marked as State Exclude, or the School of Enrollment is marked as State Exclude.

Absence equals a fully day for all student record. Half day attendance codes or period based attendance codes do not count in the calculation.

When a student has a short term Home Hospital enrollment, none of that's student's attendance counts during the Home Hospital period.

Attendance Codes Mapped to State Codes

To properly calculate the Days Absent Out-of-School Suspension and Days Absent In-School Suspension, the [Attendance Codes](#) must be mapped to a **State Code of 100: Out-of-School Suspension** or **110: In-School Suspension**.

Non-Binary Gender Reporting

Schools can assign students a gender of M: Male, F: Female, X: Non-binary. This is done on the [Identities](#) tool and/or the [Demographics](#) tool.

CALPADS Extracts use the Legal Gender field included in the Protected Identity Information to report student and staff identity information.

To record a gender of X: Non-binary, on the Identities tool:

1. Assign the **Gender of X: Non-Binary** in the standard identify fields.
2. Assign the **Protected Identity Information Legal Gender** of M: Male, F: Female, or X: Non-binary.
3. Save the record when finished.

Field	Description
Report Period	Selection determines which date option is used in calculating student attendance - Effective Date, Date Range or School Month.
Effective Date	When this option is selected, the report calculates student attendance from the start of the student's current active enrollment in the current active year through the effective date (the effective date is included in the calculation). Dates are entered in <i>mmddyy</i> format or use the calendar icon to select a date. Displays when the Report Period is set to Effective Date.

Field	Description
Date Range	<p>When this option is selected, the report calculates student attendance from the entered start date to the entered end date. Both the start and end dates (both must be entered) are used in the calculation.</p> <p>Dates are entered in <i>mmdyy</i> format or use the calendar icon to select a date.</p>
School Month	<p>When this option is selected, the report calculates student attendance based on the dates of the selected school month. Only one school month at a time can be selected.</p>
Transaction Type	<p>Indicates the type of transaction that occurs:</p> <ul style="list-style-type: none"> • Replace - existing student attendance information is replaced with new information. • Delete - student attendance information is deleted.
Calculation Type	<p>Determines which attendance calculation is used to calculate the absence summary.</p> <ul style="list-style-type: none"> • Traditional STAS - reports a student's full day absences. • Period-based STAS - reports a student's absences for each period using the Periods Present (attendance) divided by the Total number of Periods the student is expected to attend multiplies by the Days the student is expected to attend.
File Format	<p>Determines how the report generates. Select State Format (Caret Delimited) when submitting records to the state. Other formats available for testing and review purposes are CSV and HTML.</p>
Grade Selector	<p>Selection indicates which grade levels of enrollment are included on the report.</p>
Legal Name	<p>When marked, the student's legal name and gender information reports from the Protected Identity Information, instead of the student's name and gender.</p>
Unknown as Excused	<p>When marked, unknown attendance records (from teacher-recorded attendance) are reported as excused absences.</p> <p>This is an optional selection. When not marked, unknown teacher attendance is not included in the Days Absent Excused Non-Suspension calculation (Field 19).</p>
Unknown as Unexcused	<p>When marked, unknown attendance records (those from teacher-recorded attendance) are reported as unexcused absences.</p> <p>This is an optional selection. When not marked, unknown teacher attendance is not included in the Days Absent Unexcused Non-Suspension calculation (Field 20).</p>

Field	Description
Future Exempt Enrollments	When marked, students who enroll after the entered Effective Date, after the End Date of the Date Range and after the last day of the School Month are included in the extract. This affects the following fields: <ul style="list-style-type: none"> Field 13, Student Absence Summary Data Collection Exemption Indicator, reports Y. Fields 14-21 report blank.
Ad hoc Filter	Select which students to include in the extract by choosing a filter that was created in the Filter Designer.
Calendar Selection	Select the calendar of enrollment from which to pull student data. Calendars can be chosen by the active year, by the school name or by the year.
Report Generation	Choose the Generate Extract to display the results of the chosen items immediately. Choose the Submit to Batch option to generate the report at a specified time. This option is helpful when generating large amounts of data.

Generate the CALPADS Student Absence Summary

1. Select the desired **Report Period** option.
2. Enter the appropriate dates for the report (**Date Range** or **Effective Date**), or select the appropriate School Month.
3. Select the desired **Transaction Type**.
4. Select the desired **Calculation Type**.
5. Select the desired **File Format**.
6. Select the desired **grade levels**.
7. If desired, mark the **Legal Name** checkbox.
8. Mark the **Unknown as Excused** or **Unknown as Unexcused** checkboxes. Only one can be marked at a time.
9. If desired, mark the **Future Exempt Enrollments** checkbox.
10. If desired, select an **Ad hoc Filter** to report only those students included in the filter.
11. Select the desired **Calendars**.
12. Click the **Generate Extract** button to generate the report instantly, or click the **Submit to Batch** button to choose when the report generates.
