

# Instructional Unit Identifier (IUID) Import (Oregon)

Last Modified on 12/14/2025 8:45 pm CST

[Import Logic](#) | [Generate the Report](#) | [Import Validations](#)

**Tool Search:** SSID/USID/IUID Imports

The Instructional Unit ID File import allows the importing of instructional unit IDs to the Course Section Identifier field. This file generates for the entire district for the School Year in the Campus toolbar.

The screenshot shows the 'SSID/USID/IUID Imports' page. At the top, a breadcrumb navigation shows 'Reporting > OR State Reporting > SSID/USID/IUID Imports'. The main content area is titled 'Consolidated Student ID (SSID) / Unique Staff Identifier (USID) / Instructional Unit Identifier (IUID) - Imports'. It contains three sections: 'Consolidated Student ID (SSID)', 'Unique Staff Identifier (USID)', and 'Instructional Unit Identifier (IUID) Import'. The 'Instructional Unit Identifier (IUID) Import' section describes the process of importing data from the state's Instructional Unit Identifier (IUID) system. Below this, an 'Import Options' section shows 'Import' selected and 'Instructional Unit Identifier (IUID)' chosen. At the bottom, there are 'Browse...' and 'Upload' buttons. The page is titled 'Instructional Unit Identifier Import'.

This is a two-fold process:

1. Generate the [Instructional Unit Identifier Extract](#) to find the courses or sections that need IUIDs. This is then sent to the state.
2. Once the IUIDs have been assigned, use the Instructional Unit Identifier Import to assign the IUIDs to the course sections.

**Read** - Access and upload files for the importing instructional unit files.

**Write** - N/A

**Add** - N/A

**Delete** - N/A

For more information about Tool Rights and how they function, see the [Tool Rights](#) article.

## Import Logic

When a match in the Import file is found with data that is an exact match for all required fields in Campus already, but that record already contains an instructional unit ID, **the new state ID IMPORTS and OVERWRITES the existing value.**

Instructional Unit IDs are NOT IMPORTED in the following situations:

- A file is not found.
- When there is no Instructional Unit Identifier assigned to the Course Section.
- When there is no Section ID assigned to the Course Section.

A header row is expected on the file. When the first row of the file contains course data, it is ignored.

# Generate the Report

1. Select **Instructional Unit Identifier (IUID)** from the **Import** dropdown list.
2. **Browse** for the file to import. When found, click the **Upload** button.

A Results file displays with a list of errors or warnings that need to be reviewed. Also noted is the total number of records that were inserted and the total number of records that were changed.

## *IUID Import Results*

See the Instructional Unit Identifier Report Layout for the fields that are imported.

# Import Validations

Condition	Result
Campus contains a match on all required fields but already contains a unit ID for the course.	<b>Data is imported.</b> The new unit ID overwrites the existing value.
Campus does not contain a matching Unit Number.	<b>Data is NOT imported.</b>
Campus does not contain a matching First Name.	<b>Data is NOT imported.</b>

Condition	Result
Campus does not contain a matching Middle Initial.	<b>Data is NOT imported.</b>
