Tool Search: SSID/USID/IUID Imports

The Instructional Unit ID File import allows the importing of instructional unit IDs to the Course Section Identifier field. This file generates for the entire district for the School Year in the Campus toolbar.

Instructional Unit Identifier Import

This is a two-fold process:

1. Generate the [Instructional Unit Identifier Extract](#) to find the courses or sections that need IUIDs. This is then sent to the state.
2. Once the IUIDs have been assigned, use the Instructional Unit Identifier Import to assign the IUIDs to the course sections.

Read - Access and upload files for the importing instructional unit files.

Write - N/A

Add - N/A

Delete - N/A

For more information about Tool Rights and how they function, see the [Tool Rights](#) article.
